AUTOBIOGRAPHY

Native from Hong Kong but left her home country and went abroad since 16 years old. From Vancouver to Shanghai, she first completed her bachelor degree with a major in business administration. In a week before her graduation ceremony, she volunteered to help the board to design a graduation leaflet without any art or design background. Surprisingly, this experience seeded her passion in design. She decided to travel to San Francisco, a wonderful, international city to seek her path in design. She stayed in San Francisco and completed her second bachelor degree majoring in Graphic Design at the Academy of Art University. As proud as she could be, she told herself, "This is just the beginning of my design journey."

Combining with her business instinct and the experience of being a freelancer of graphic design, she strongly believes that a successful business is only possible with good marketing, branding, and visual design that sync well to present the company's story and values. She also realizes that under the technology influences, new media is the bridge to connect with audiences. Print design is no longer the dominant source to communicate; interactive design on screen can speak louder and more effectively. Bracing with this belief, she starts working as a visual designer and continues her master degree in New Media and Web Design at the Academy of Art University.

Designing for print and for screen are similar but different. Both are visual communication, but the visual aspects are different. Taking advantage of her prior aesthetic in graphic design, she is able to unlock her creative vision and design potential in the field of new media design. She ultimately identifies problems and provides creative solutions. Being proactive in her design path, she has a strong will to overcome different challenge lies ahead.

It is not enough that we build products that function, that are understandable and usable, we also need to build products that bring joy and excitement, pleasure and fun, and, yes, beauty to people's lives.

Don Norman

OVERVIEW

—

STATEMENT OF INTEREST

Being a coffee lover, coffee has been a daily need for them. Every morning, many coffee-drinkers wait in a long line for a cup of mediocre coffee. It is not easy to make coffee at home like a barista. With the food+tech trend coming out, there are more innovative technologies to make our lives easier. For my thesis, I would like to explore and expand the food+tech trend into the coffee industry with NEVO, an app that will help coffee lovers have a perfect experience when brewing their coffee at home.

Technology is supposed to make our lives easier, allowing us to do things more quickly and efficiently.

James Surowiecki

ELEVATOR PITCH

Many coffee lovers love to have a cup of coffee to start their day to boost up their energy during their work in the day.

There are many different kinds of coffee drinks which require different brewing methods, skills and equipment. When brewing a cup of espresso drink, there is a need to understand the correct amount of ingredients and the proper technique in order to extract out the coffee beans aroma and taste . Meanwhile, the quality of ingredients, such as: organic milk with calcium enriched, meticulously selected and roasted coffee beans, pressurized flavor-seal natural syrup also affects the outcome of a cup of perfection espresso drinks.

The Nevo coffee system can now help you to make a perfect cup of coffee drinks. Nevo is a smart phone application which is connected to the Nevo coffee machine which makes many different kinds of coffee drinks. Coffee lovers can shop in the app to order per-measured ingredients as assembled coffee kits, and then simply add the coffee kit items into Nevo machine to start brewing. The app also offers coffee kit stock management, scheduled brewing, and notifications. With Nevo, it requires low brewing skills and easy control to brew barista-quality espresso beverages.

RESEARCH 02

U.S. consumers who own a single-cup coffee brewing system from 2005 to 2016*

This statistic depicts the results of an online survey conducted by the National Coffee Association (NCA) from January 11 to January 26, 2016. U.S. survey respondents were asked if their household owns a single-cup brewing system. The survey results revealed that 29 percent of survey respondents own a single-cup brewing system in their household, up from 7 percent in 2011.

RESEARCH 03

Method of preparation among coffee drinkers in the United States in 2016

The statistic shows the results of an online survey conducted by the National Coffee Association (NCA) from January 11 to January 26, 2016. U.S. survey respondents were asked which preparation method they have used for their past-day coffee consumption. Some 50% of the respondents reported to have consumed coffee brewed by a drip coffee maker the day before. Drip coffee makers continued to be the most used coffee preparation method, followed by single-cup brewing systems.

2015 Food+Tech Trends:

Grocery Delivery Explodes, Gadgets

Enable Transparency + More

<http://www.foodtechconnect.com/2014/12/18/2015-food-trends-grocery-delivery-explodes-gadgets-food-transparency/>

01

“Same-Day Delivery”

Online Grocery Shopping Goes 24/7. This trend allows everyone who sells food and beverages to be in the same-day delivery business without having to add additional operational infrastructure.”

02

Tech & Retail Giants Expand Services

[Google Express](#) delivery service from stores like Costco, Whole Foods and Target. [Amazon Fresh](#) offers same-day grocery delivery service in New York, San Francisco [Walmart To Go](#), retailer’s on-demand delivery, same-day services to meet the needs of customers.

03

Startups Revolutionize Grocery Delivery

Personal grocery shopping service [Instacart](#) grew by 15-20 % week over week in 2015.

04

Uber, Overstock & More Join the Party

Uber’s [UberEssentials/Uber Eats](#), which offers 10-minute grocery delivery. [Overstock](#) launched a locally-focused Farmers Market.

05

Connected Kitchen Gadgets & Scanners

More and more kitchen smart gadget involved in the market. Smart scale ([Prep Pad](#)), smart oven ([Oven June](#)) are linking nutritional data to cooking, and serving it up in real-time.

THESIS ABSTRACT

Problems

Busy urban life people are more used to having a cup of coffee to start their day, especially coffee lovers, which help to boost their energy for their work in day time. There are many different kinds of espresso drinks, some coffee lovers like to have an americano; some may like a latte, and some will like to have a caramel macchiato. These espresso drinks can be prepared with different kinds of brewing equipment, such as: coffee-makers, espresso machines, capsule machines, french presses, etc. These equipment require different level of brewing skills. It is never easy to be a barista, and one will also easily end up making a mess and wasting after a brewing section in the morning for just a cup of refreshing coffee. There is also not a single coffee maker that can brew all different kinds of coffee beverage with simple steps in a short period of time. Moreover, the quality of different ingredients also affects the outcome of the cup of coffee. It is not that easy to understand and get the correct matching ingredients in small amount to brew a cup of tasty coffee.

Solution

Nevo is designed for users who can brew their coffee beverage with easy simple steps. Users no longer need to care about how much brewing skills they need, or making a mess with measurement and brewing process. A full package of Nevo includes: the **Nevo app**, **Nevo coffee machine** and **per-measured ingredient Nevo coffee kits**. Users insert the coffee ingredient kit into the Nevo coffee machine and brew their coffee beverage with the control on the Nevo app at the desired time they want. Coffee lovers now can brew different coffee everyday with simple brewing process.

Online Shopping for Pre-measured Ingredient Nevo Coffee Kit

User can easily order coffee ingredient capsule kits in the app to reduce extra grocery time shopping

Coffee Kit Stock Management

The Nevo app tracks user's capsule inventory, so user know exactly what can be brewed and when to reorder

Brewing Schedule

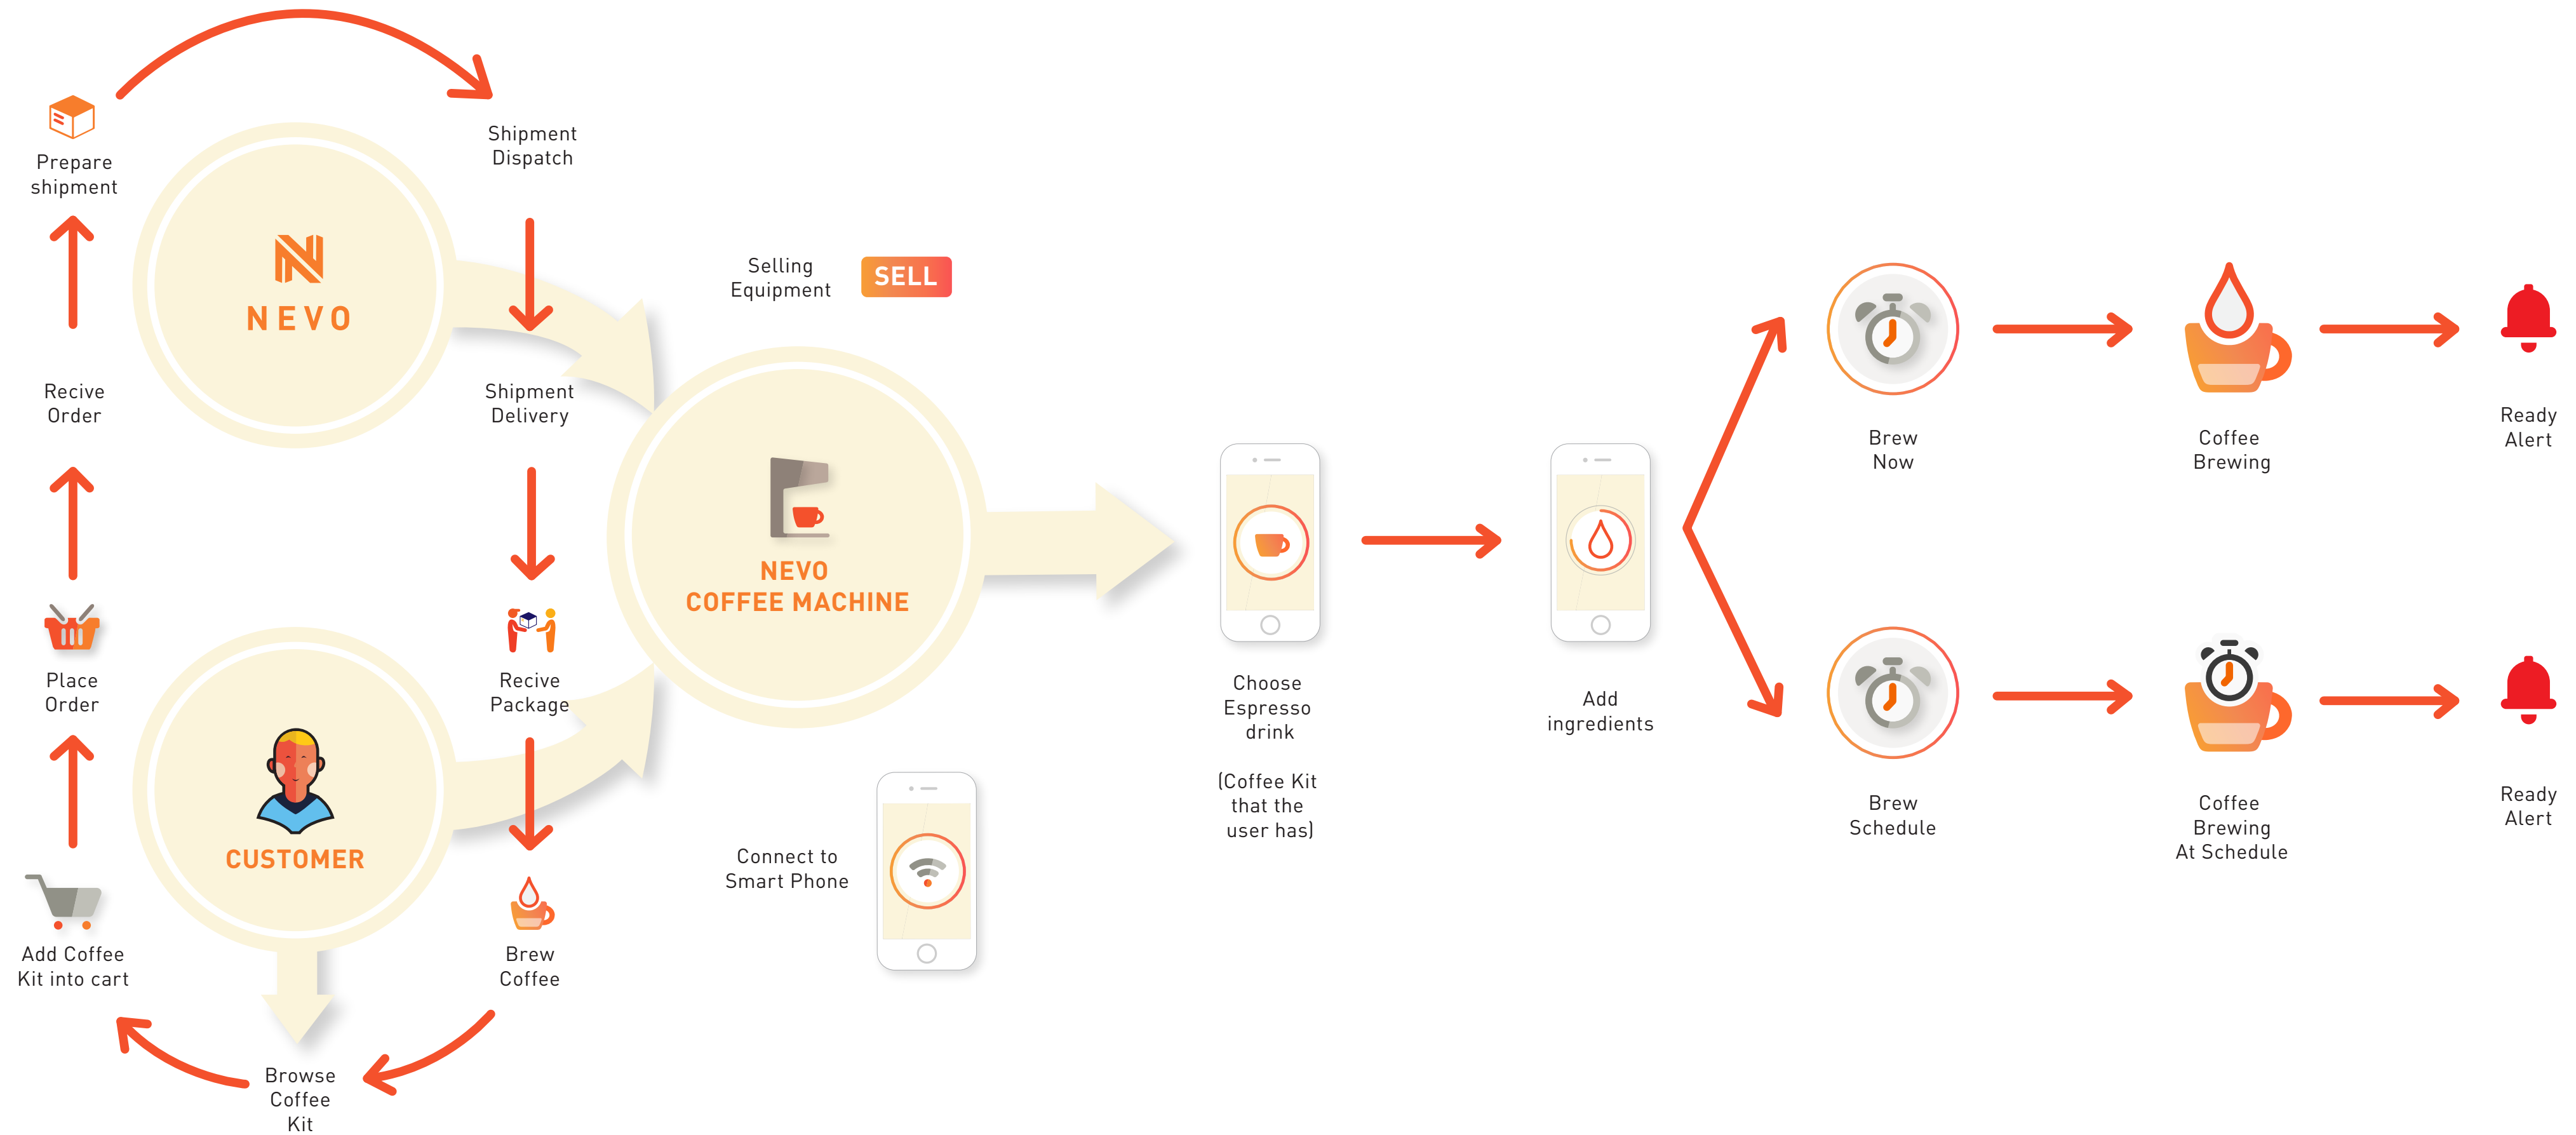

Users Set brewing schedule at the desired time, so they can treat themselves to a moment of pleasure and enjoy coffee through the Nevo app

Smartphone Connection

Real time control on Nevo app of your Nevo coffee machine with simple clicks and steps which provide remote experience with WIFI connection

NEVO BUSINESS MODEL

NEVO MACHINE

The Nevo coffee machine is designed with an Eco-friendly, on-demand water heater for fast brewing. Precise brewing technology are embedded which automatically adjusts the exact temperature, water, and time duration to make sure each and every drink is perfect. Nevo is more than a coffee maker; it provides a café experience in a stylish, easy-to-use compact system which can become your own barista.

☕ **3D MODEL RENDERING VIDEO:**

<https://vimeo.com/tammieleung/nevocoffeemachine>

NEVO MACHINE FEATURES

- Brews different kind of coffee beverage
- Milk storage with cool control
- Auto start brewing
- Ingredients input tracking
- App control
- Water quality tracking
- Notification
- Brewing Schedule
- Capsule stock management
- Coffee kit online shopping

NEVO COFFEE KIT

Sustainable

When the world is highly aware of the environmental protection, Nevo is also part of it. At Nevo, sustainability is at the heart of everything. Nevo coffee capsule pods are recyclable. It is composed by 99% biodegradable materials which will produce less pollution to the world.

Nevo committed to integrating sustainability across the value chain, including giving the capsules a second life through recycling. With the Nevo recycling program, it provide several options to send back used capsules, free of charge.

STRATEGIC PROCESS

COMPETITORS

NESPRESSO

The Nespresso app offers buying their coffee capsules, espresso, capsule machines and accessories on the go or at home. It can also be connected to their Prodigio Machine. It offers capsule stock management, water tank tracking, brewing schedule.

Pros

- Easy online order shopping experiences
- Capsule stock management
- Brewing schedule

Cons

- Less energetic look & feel
- Brew only espresso
- Confusing timer interface
- Crowded UX/UI design on main screen

<https://itunes.apple.com/us/app/nespresso/id342879434?mt=8>

COMPETITORS

Saeco Avanti

Saeco Avanti App is an app that connect and control their super-automatic espresso machine. It offers 18 drink options and customize coffee by personalizing strength, length, temperature, and taste.

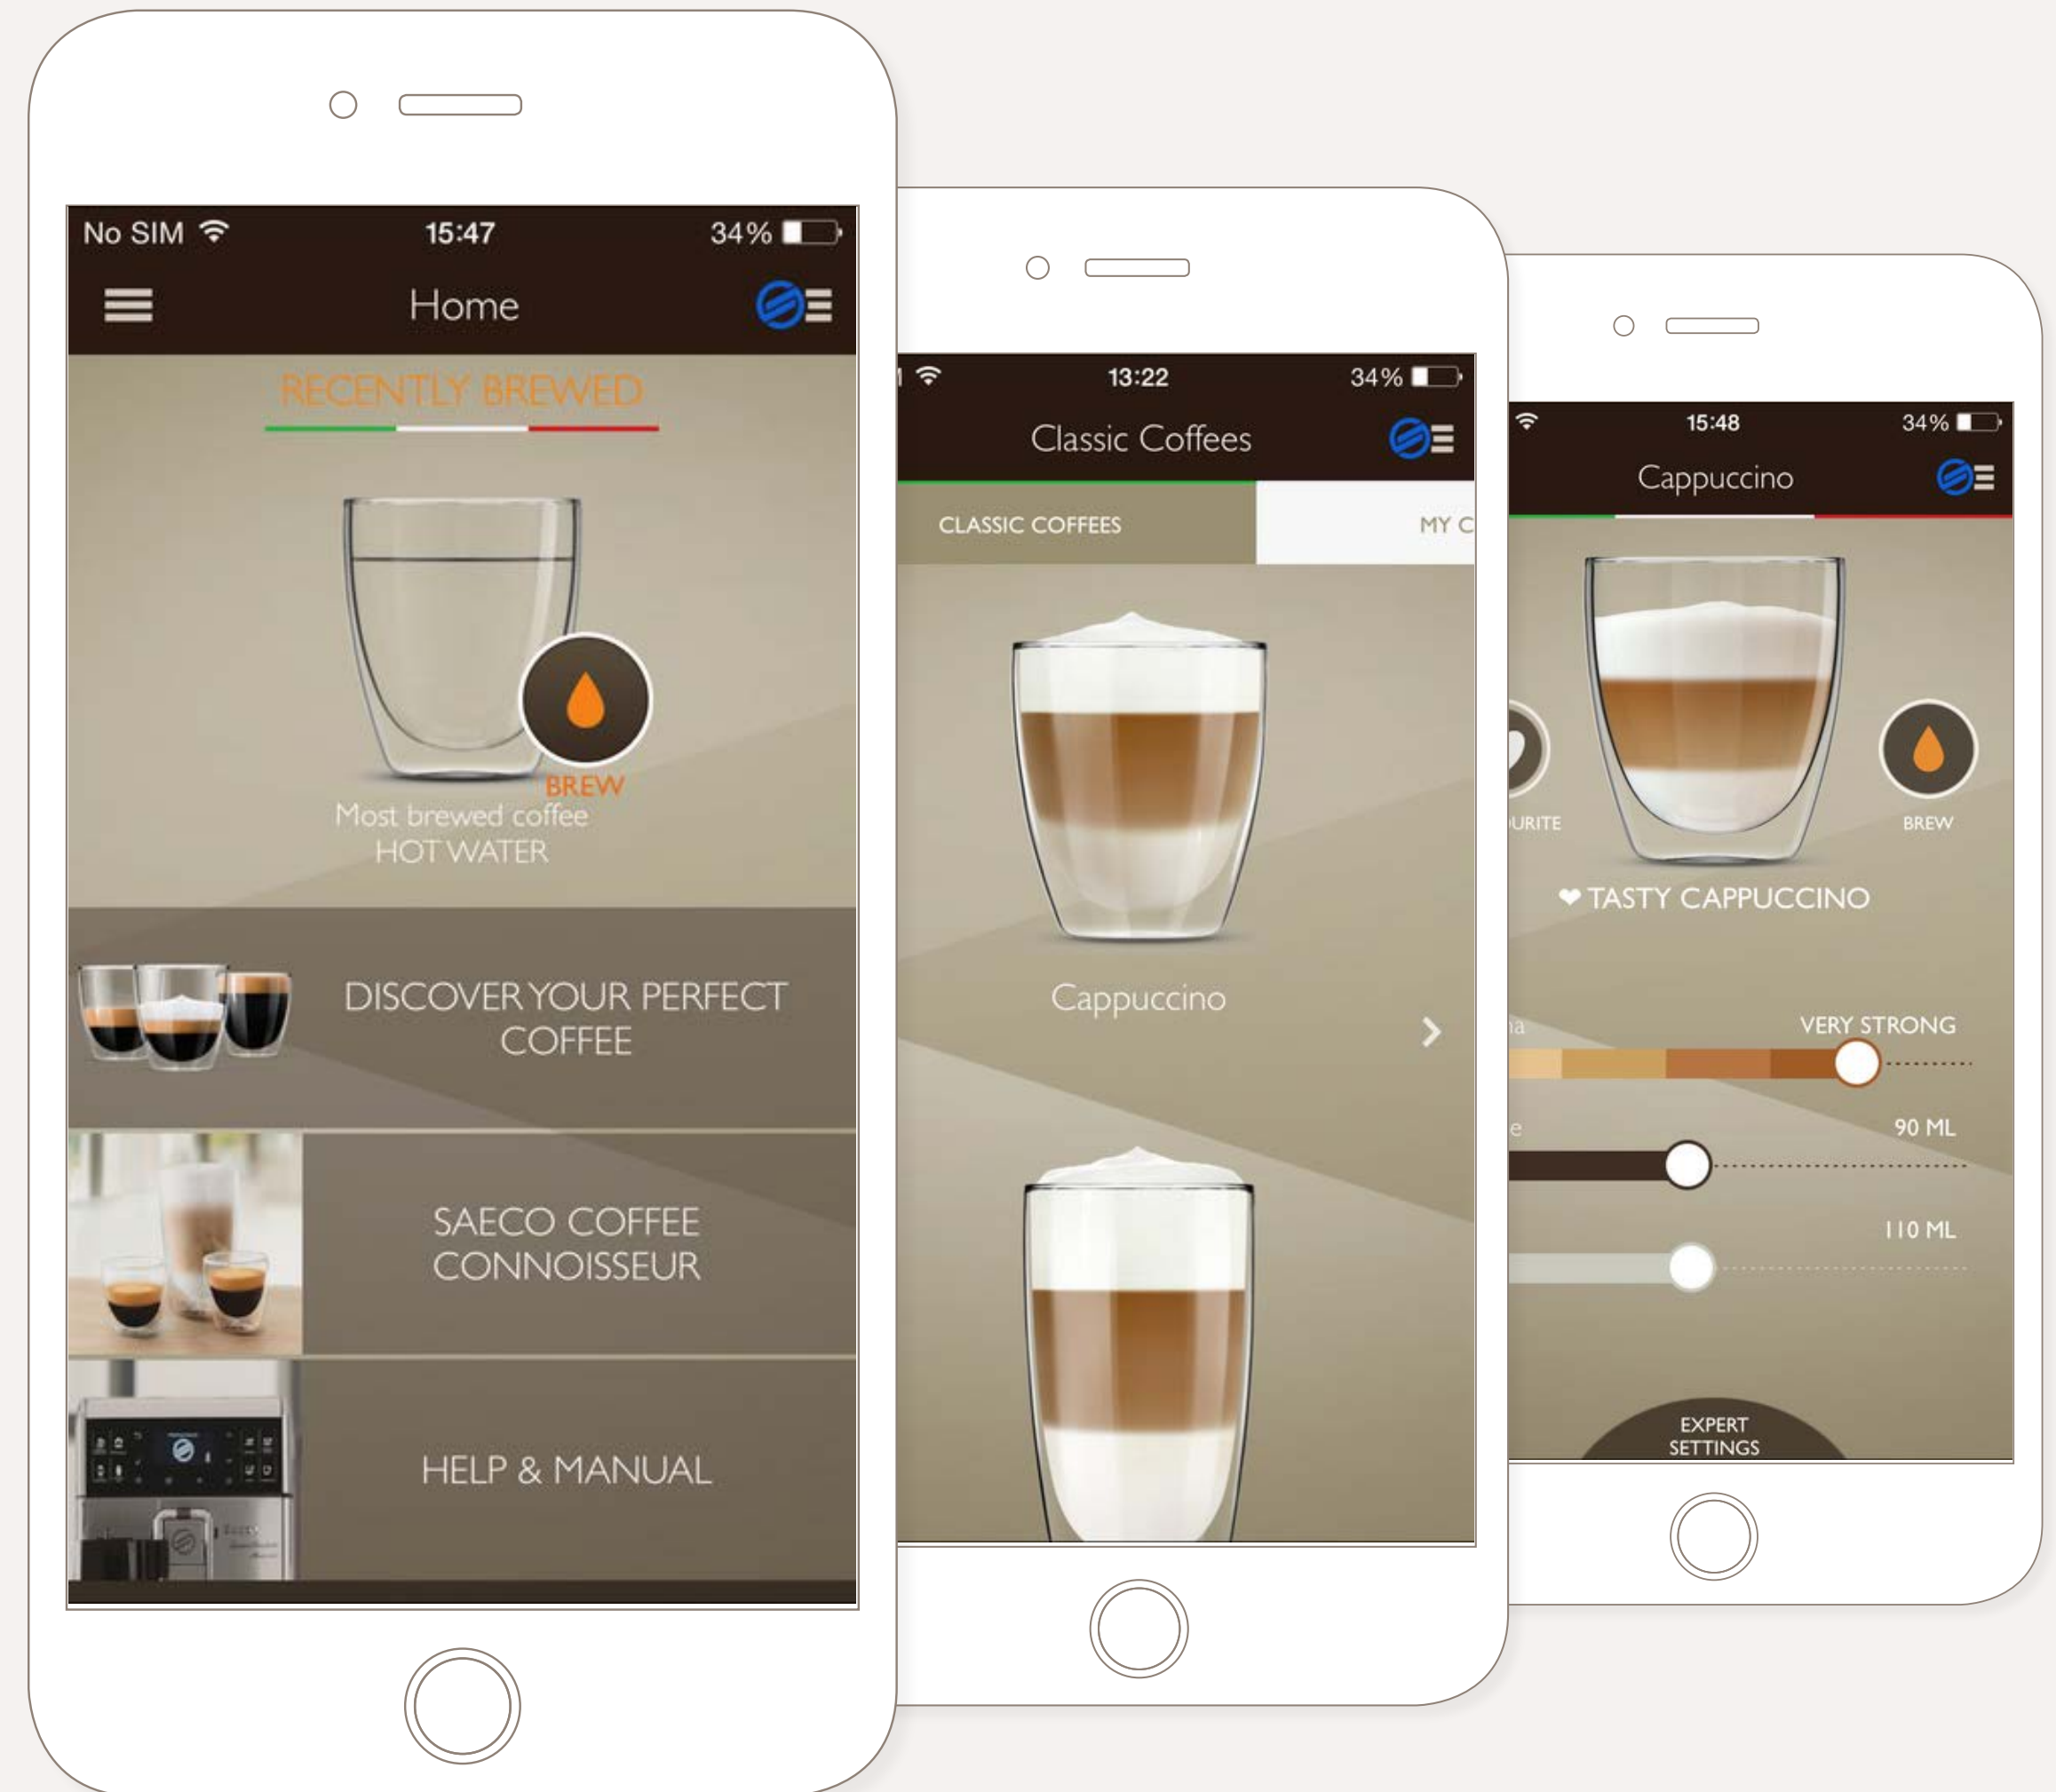

Pros

- Many espresso drinks options
- Easily clean and maintain
- Coffee drinks customization

Cons

- Boring old UX/UI design
- Does not have brewing schedule

<https://itunes.apple.com/us/app/saeco-avanti-for-super-automatic/id897410668?mt=8>

INSPIRATIONS

BLUE APRON

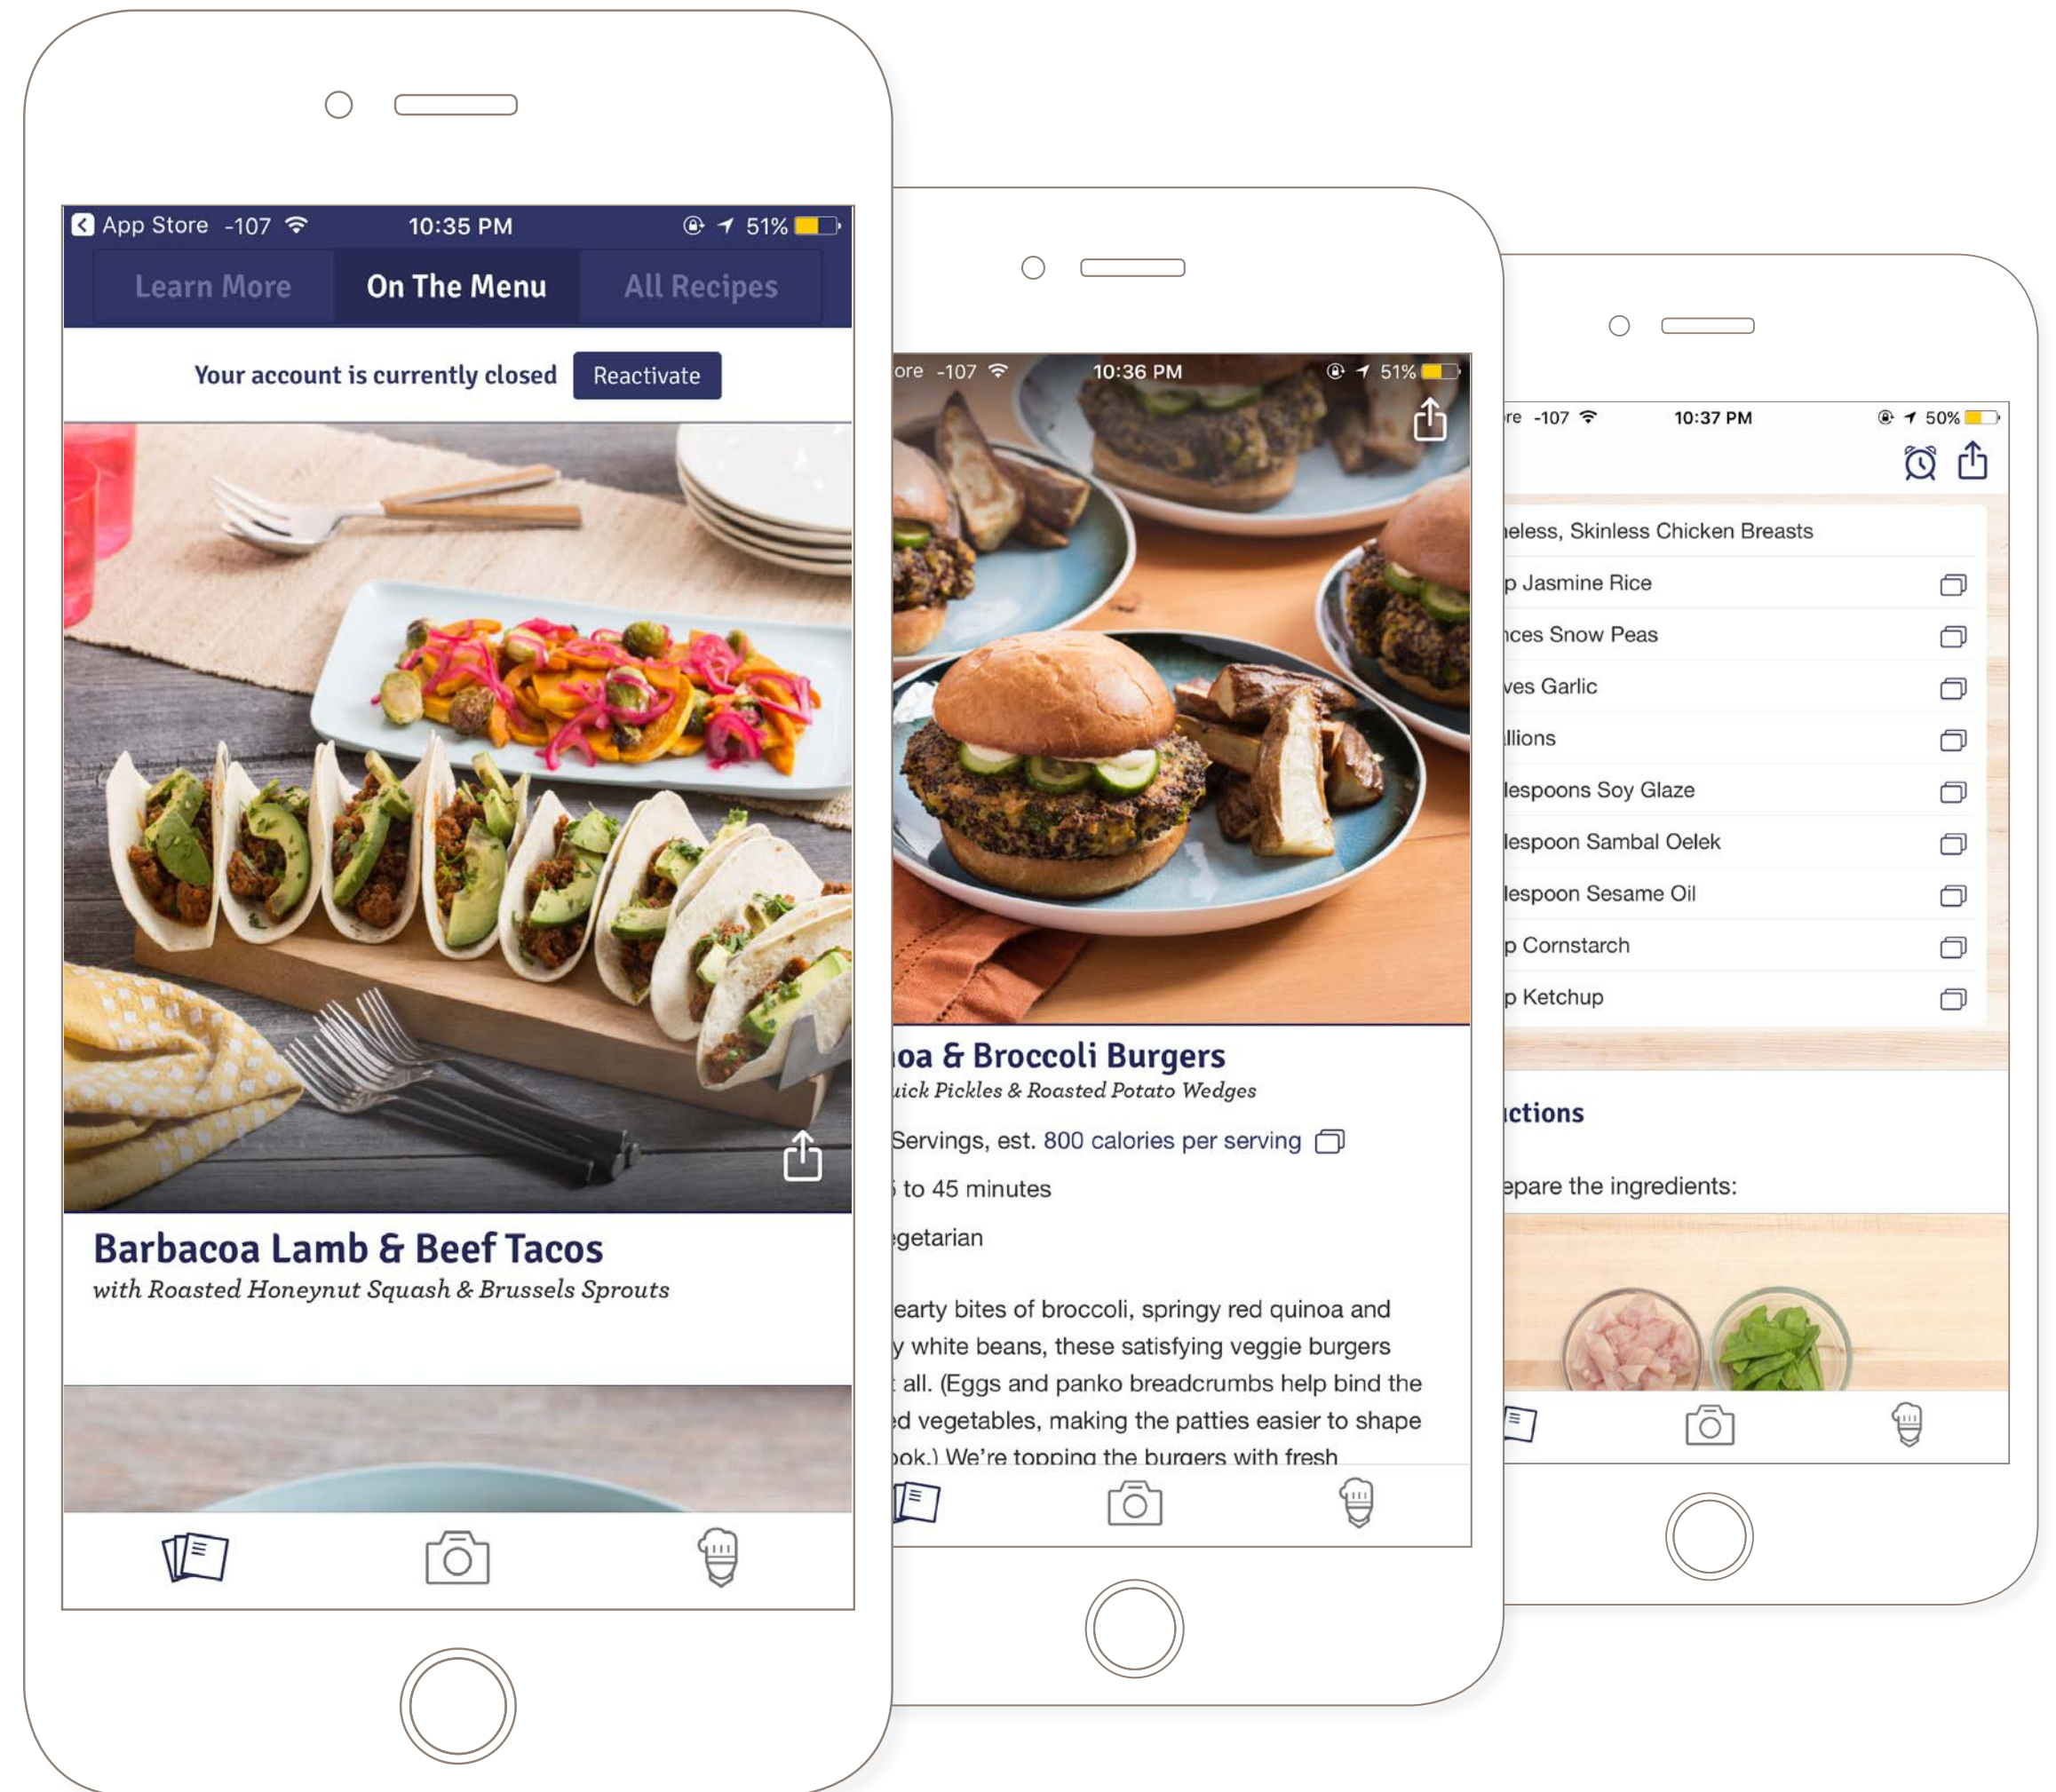

Blue Apron is a recipe app which offers 10 recipes each week that are designed to be prepared in 35 minutes. It also offers pre-measured ingredient kits for these recipes which will be delivered to customer in a weekly base subscription.

Inspiration Features

- New recipes and cooking tips each week
- Fresh organic pre-measured ingredients kit
- Easy weekly subscription
- Customization of food choice (meat, seafood, vegetarians)
- Clean UX/UI design on screen

<https://itunes.apple.com/us/app/blue-apron-fresh-ingredients/id976642810?mt=8>

INSPIRATIONS

DROP RECIPE

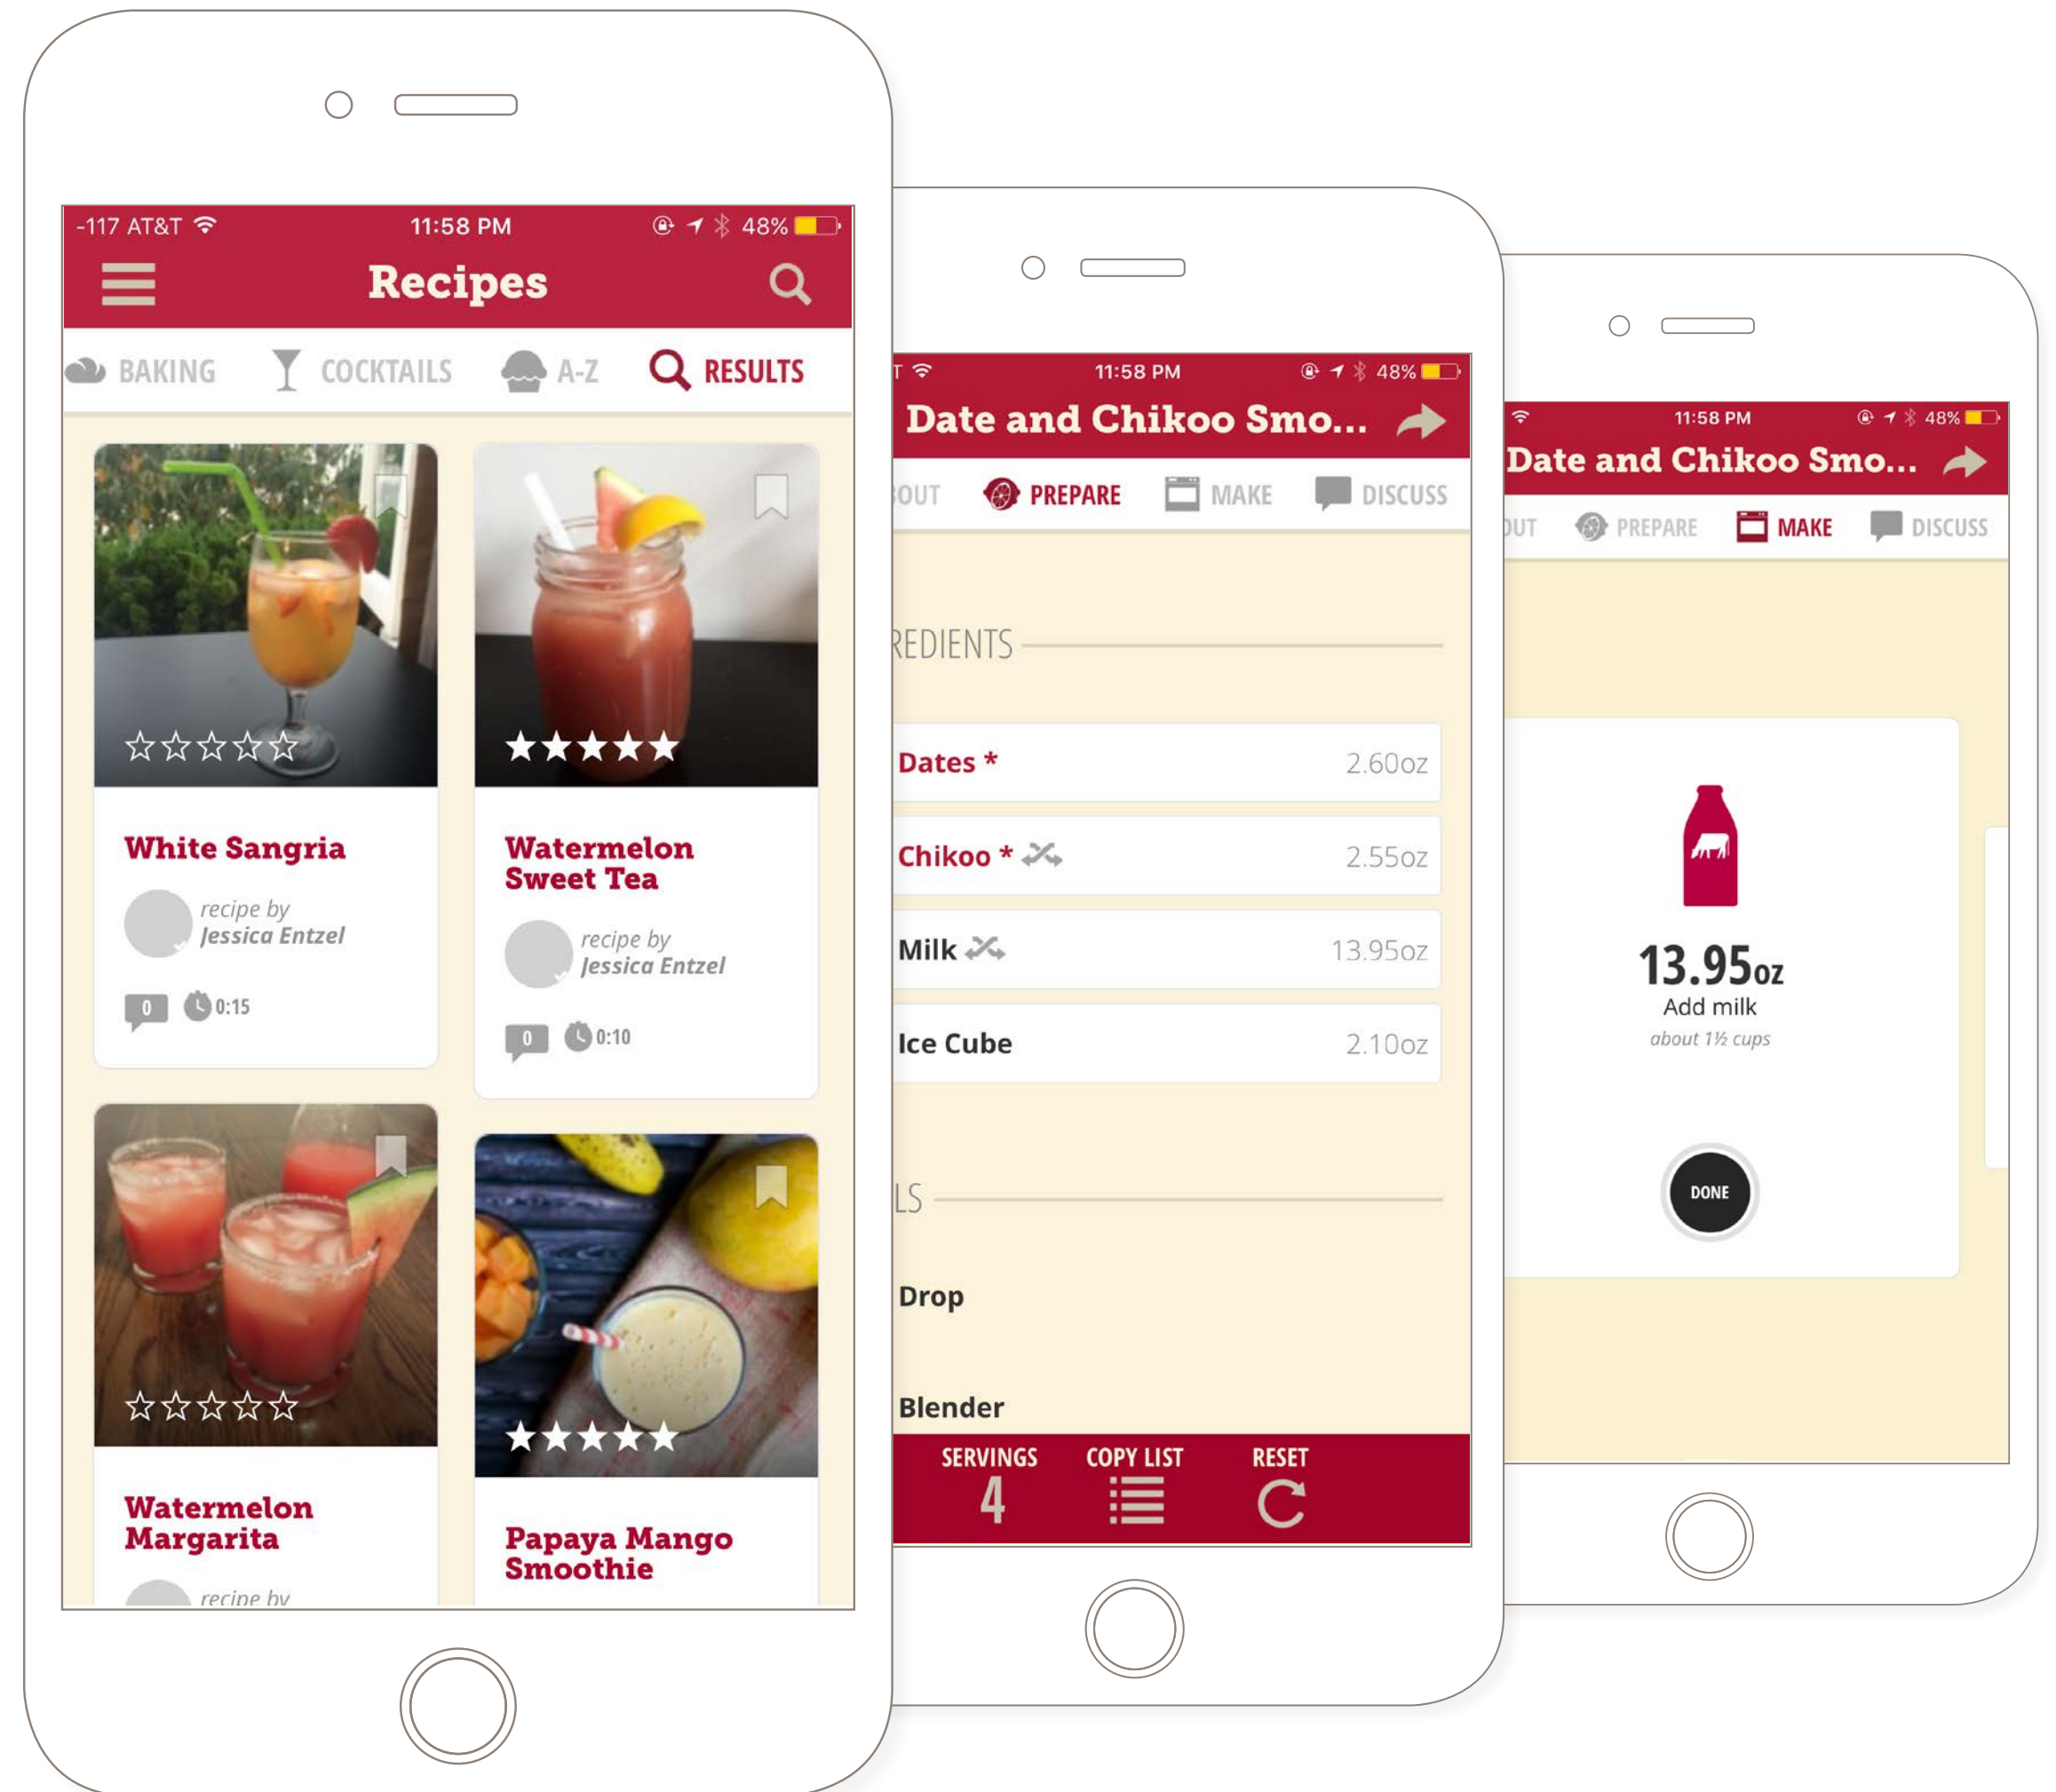

The Drop Recipes app is an interactive recipe book app. The app is paired with the optional Drop Scale, it can help user in preparing food. It can also resize a recipe ingredients units and amounts.

Inspiration Features

- Wireless connect with the Drop Scale
- Responsive scaling and volume visual presentation
- In-app timer
- Ensure perfect preparation and experiences.

Open syrup compartment on the right

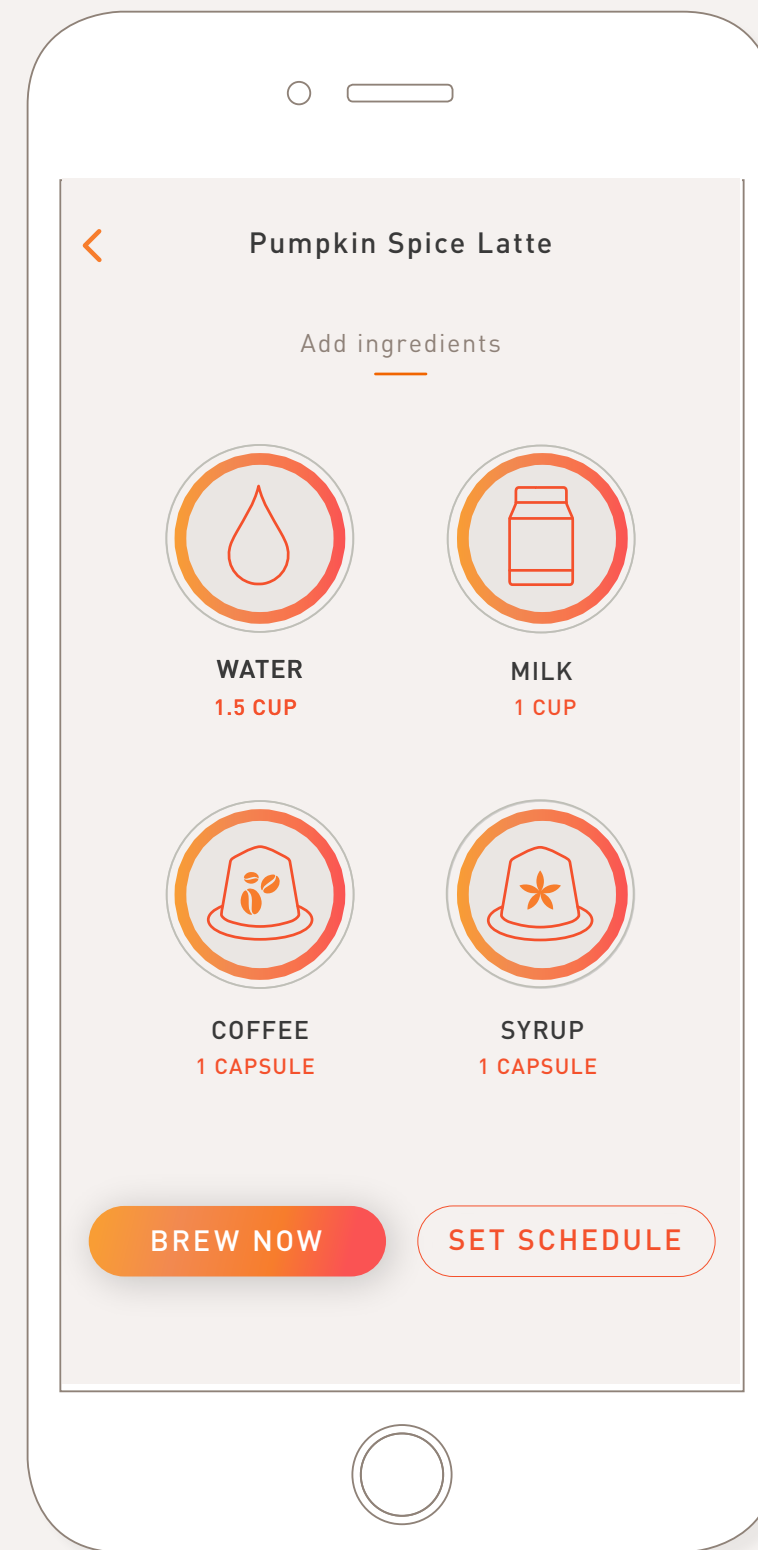

PROTOTYPE

2

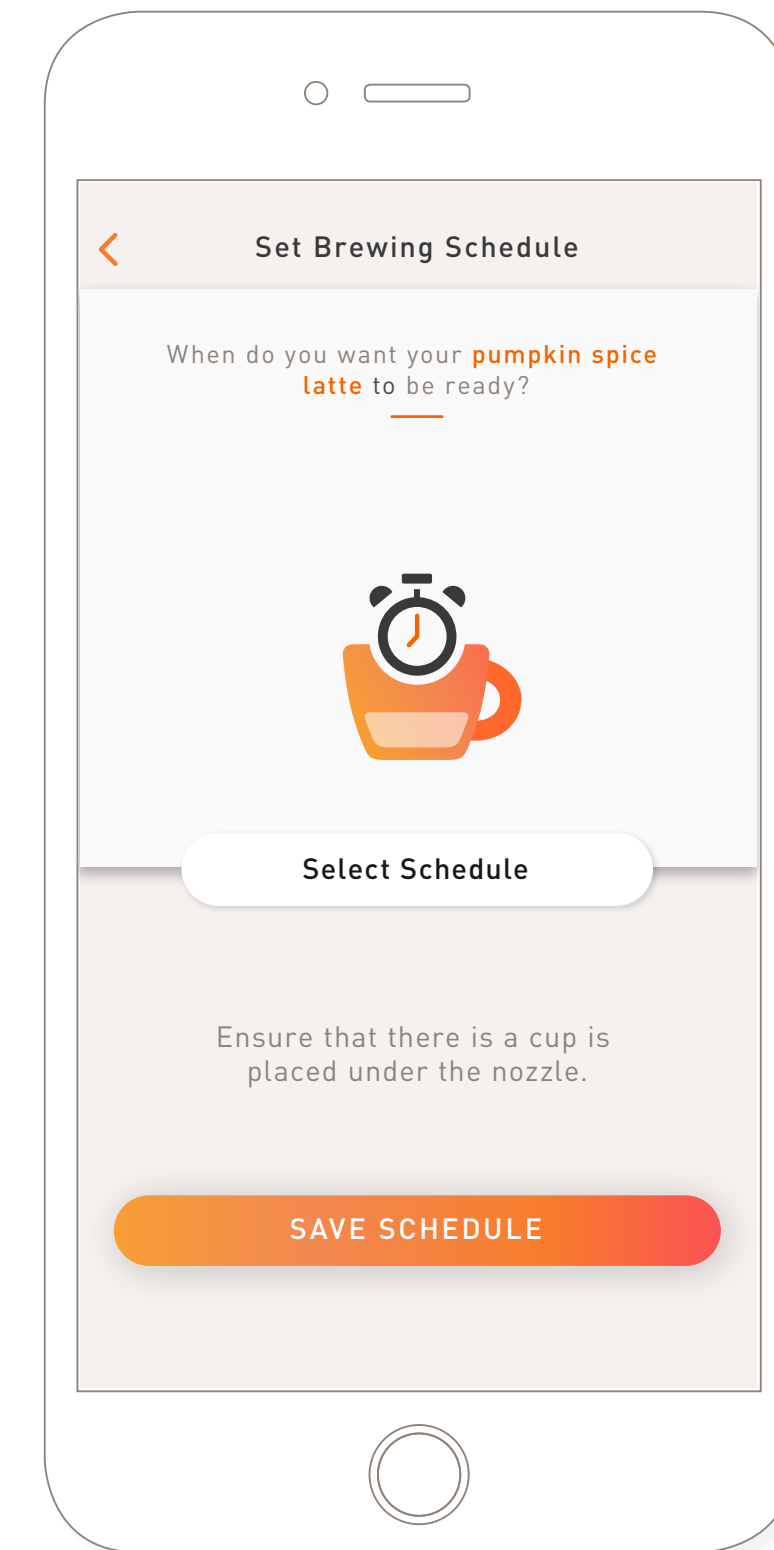

13/16 Add Syrup Capsule

Insert syrup capsule into the syrup compartment

13/16 Add Ingredient

After the last ingredient is added, that icon will light up to indicate it has been added. It also activated the "brew now" and "set schedule" button. User can select either one.

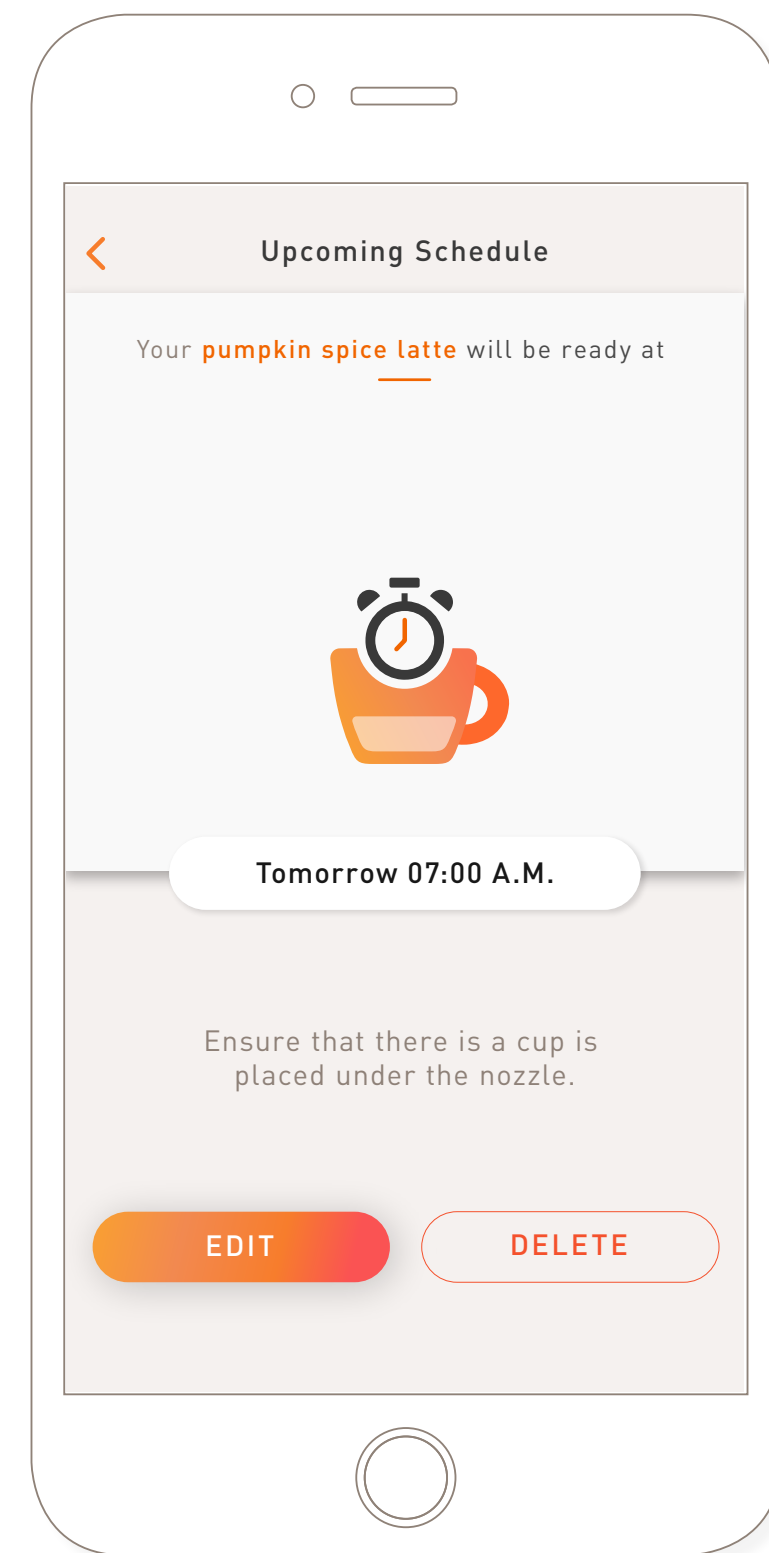

14/16 Set Brew Schedule

Select the date and time for your coffee drink which will be ready at in the future and click save.

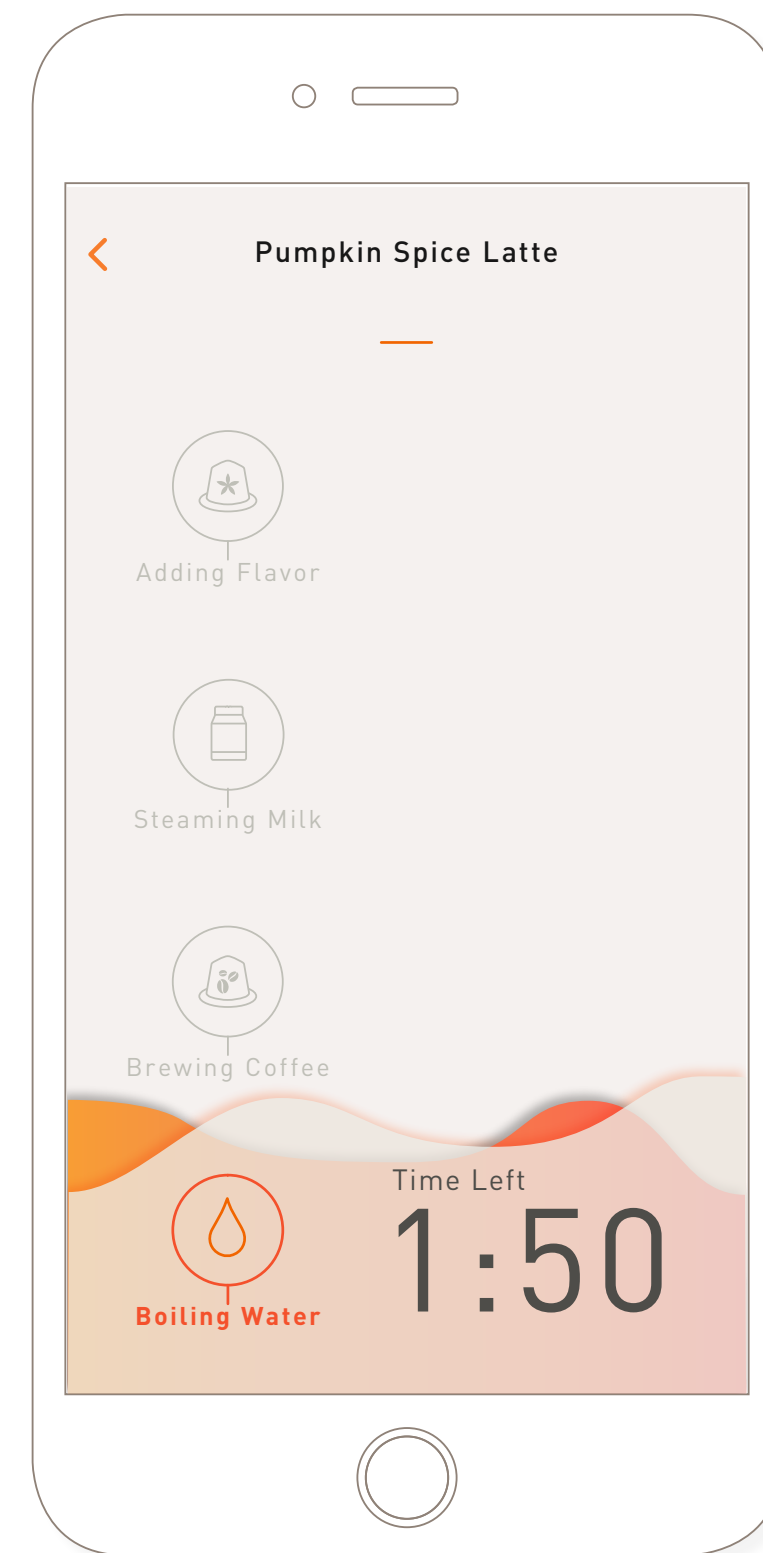

PROTOTYPE

2

14/16 Edit Saved Brew Schedule

This screen shows the saved schedule. User can edit it or delete.

15/16 Brewing

The machine will auto start brewing before the schedule. This screen shows the brewing progress and time left.

16/16 Finish Brewing

After brewing, this screen shows up. Users can click to brew another cup or save this as a favorite on the machine.

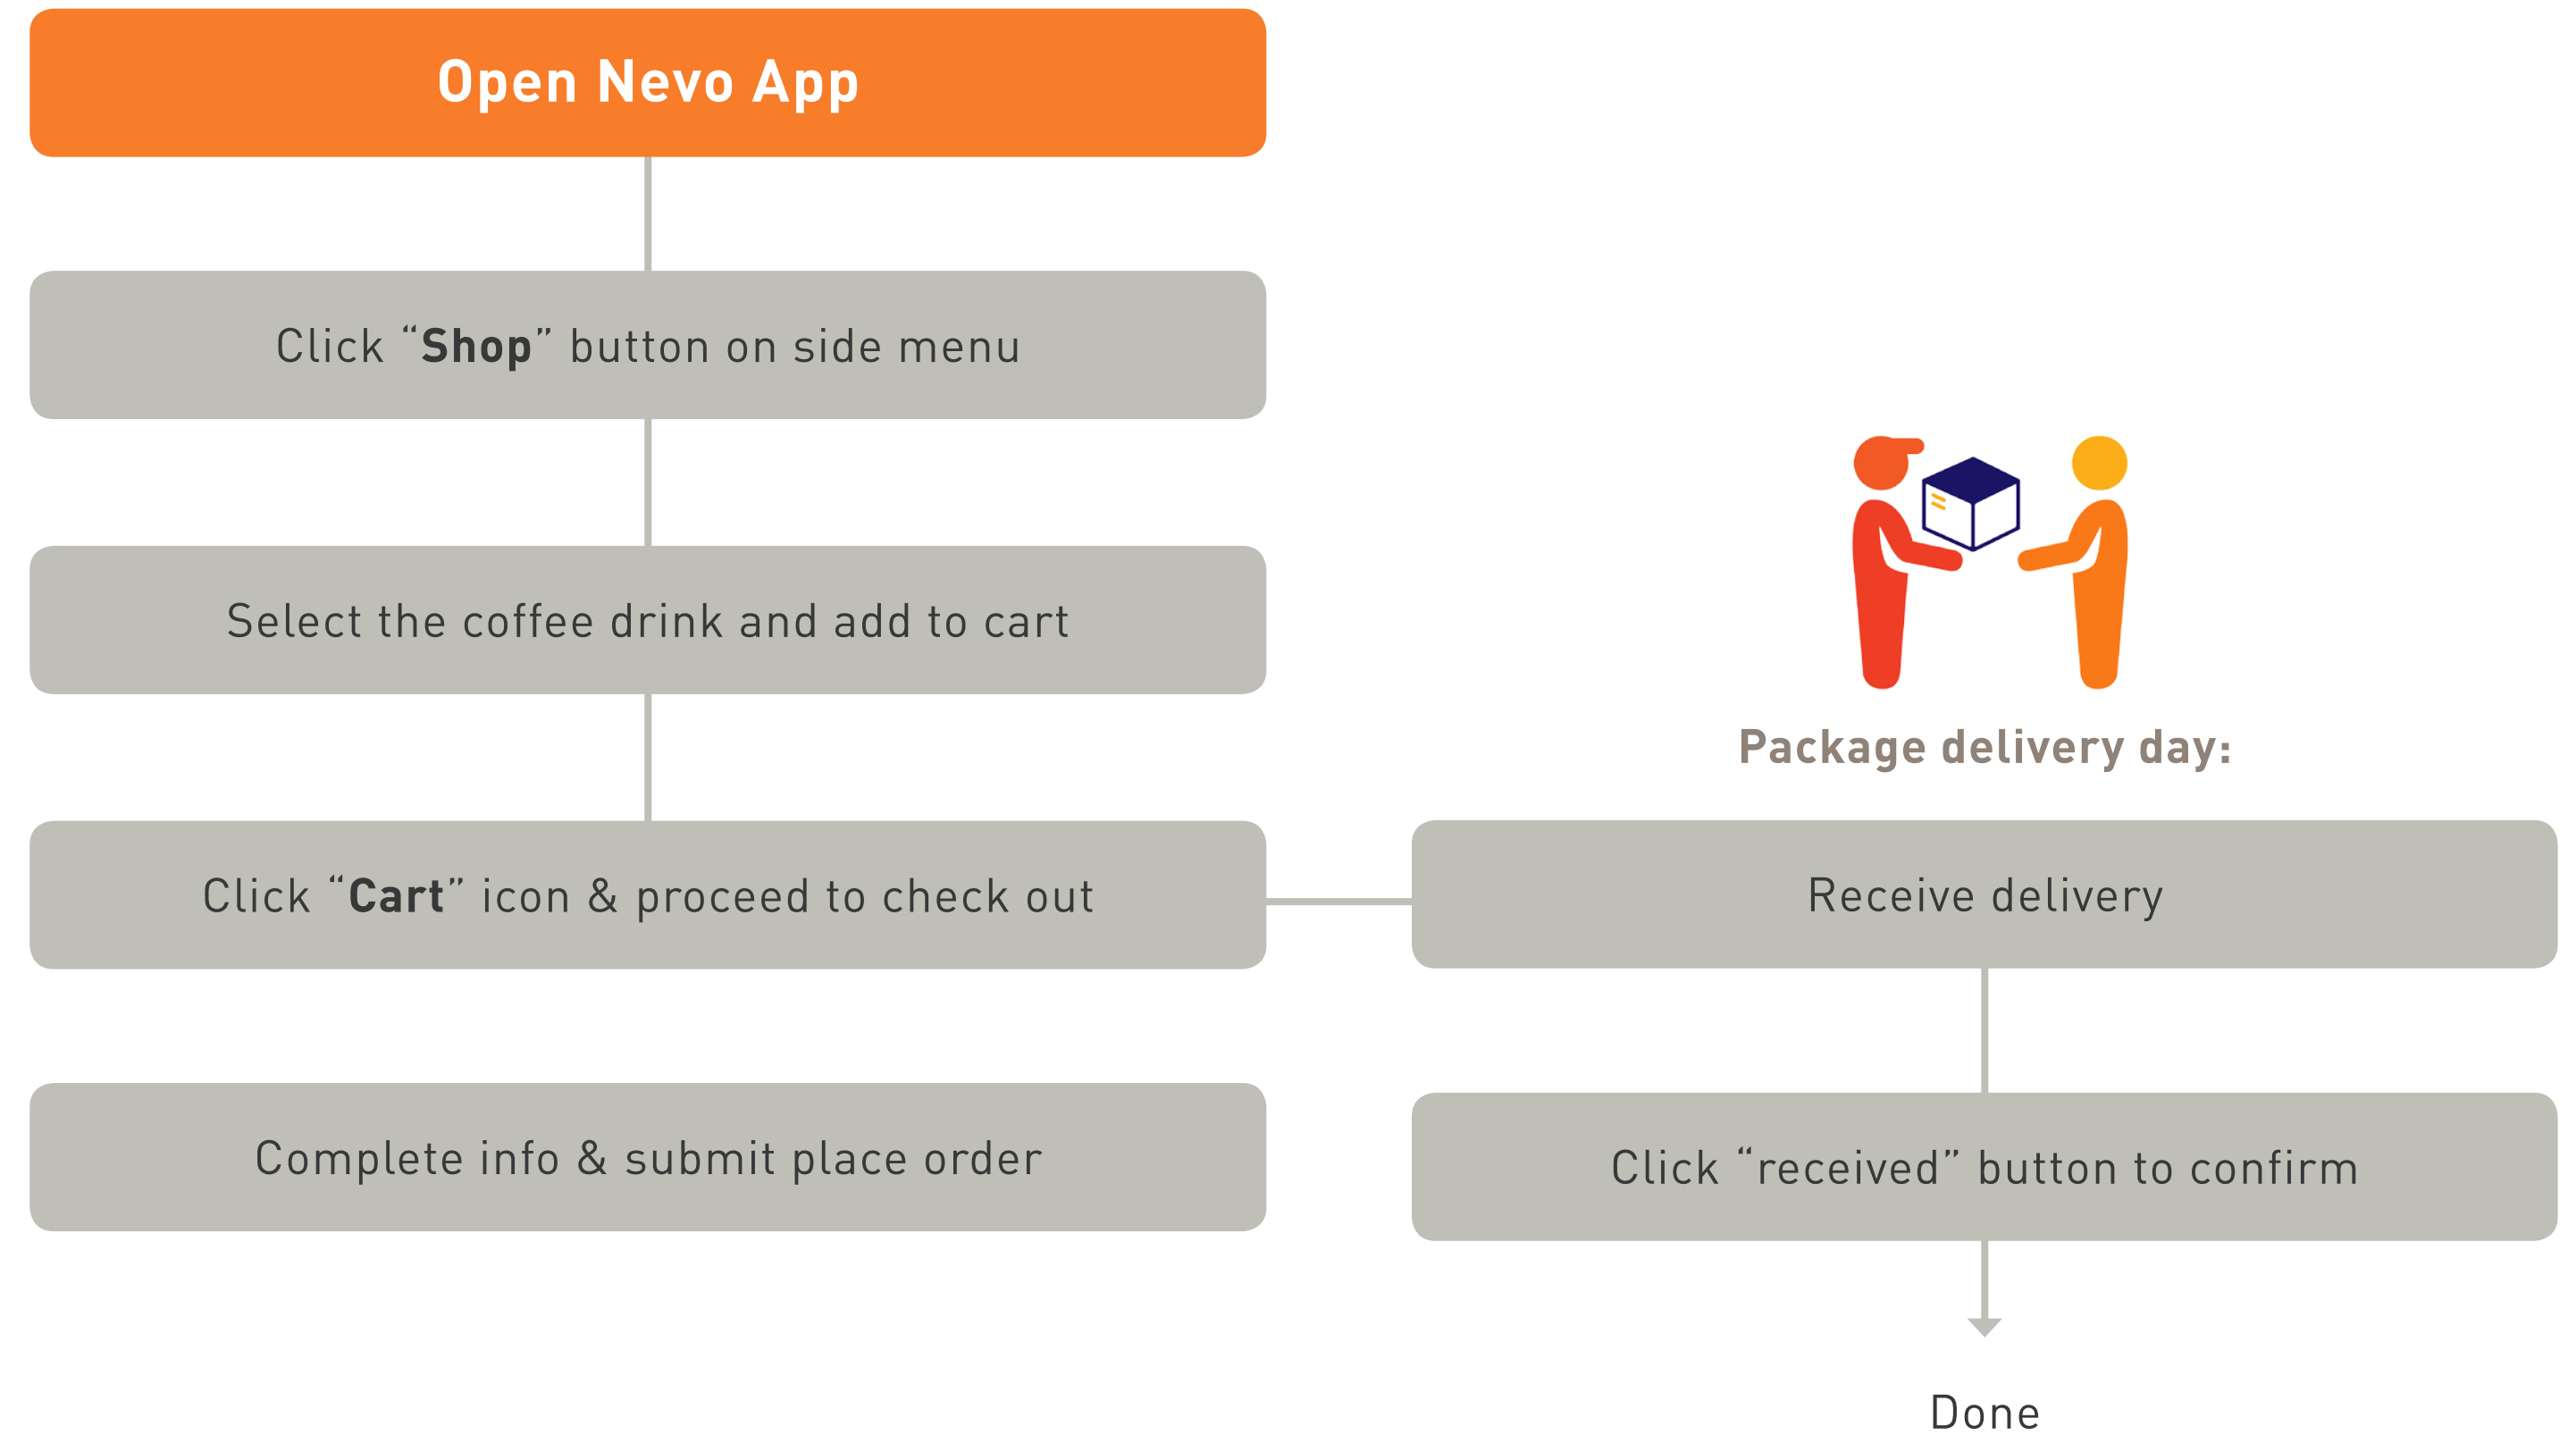

TASK 3

Heather Davis

She expects simple and easy online ordering for per-measured coffee ingredient kits in the app and expects it to arrive on time. It helps her to reduce grocery shopping time and coffee preparation time and mess.

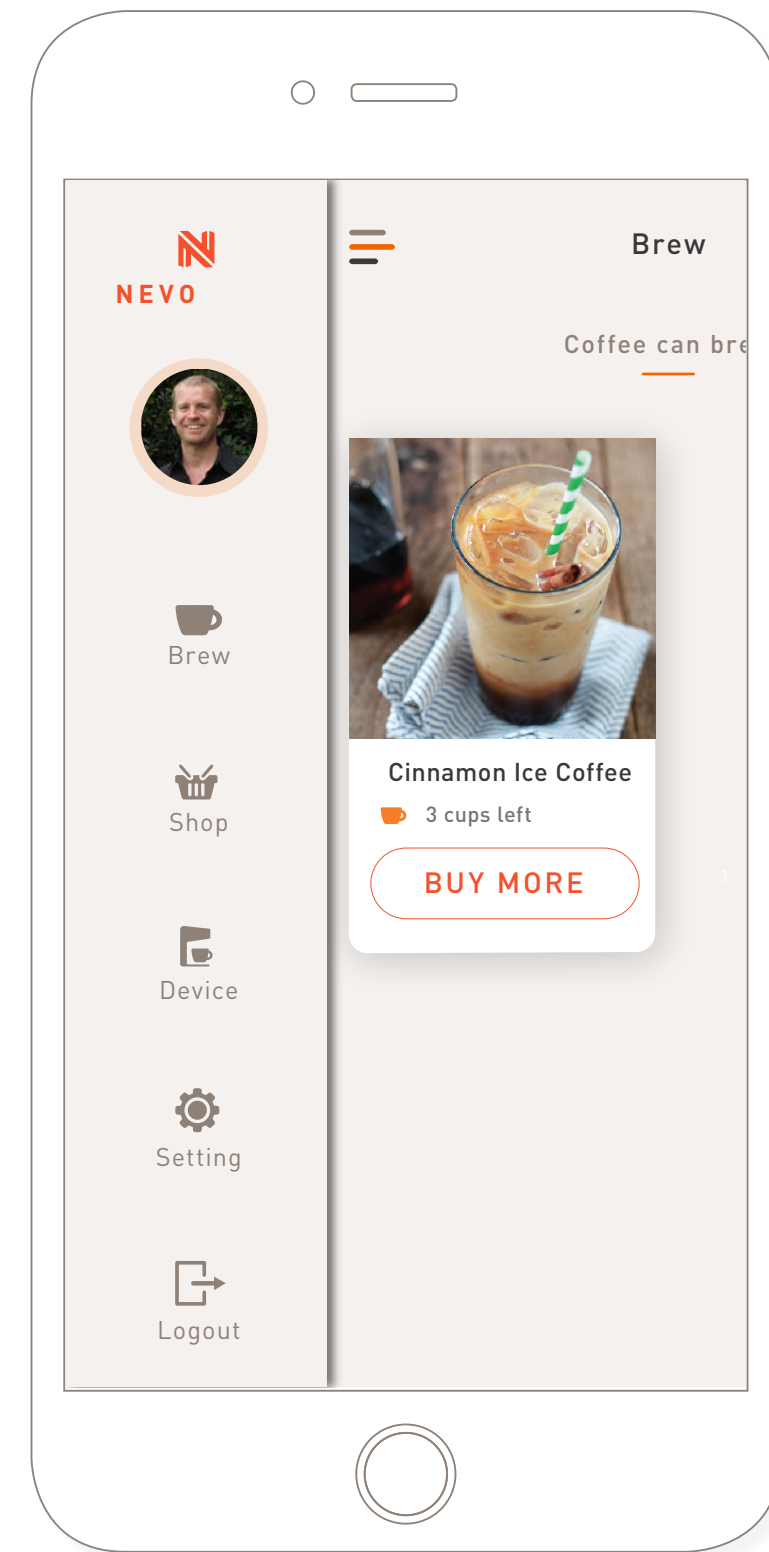

PROOF OF CONCEPT VIDEO: [VIMEO.COM/TAMMIELEUNG/NEVOTASK3](https://vimeo.com/tammieleung/NEVOTASK3)

PROTOTYPE

3

RETURN USER — SHOP FOR PER-MEASURED COFFEE INGREDIENT KIT AND CHECK OUT

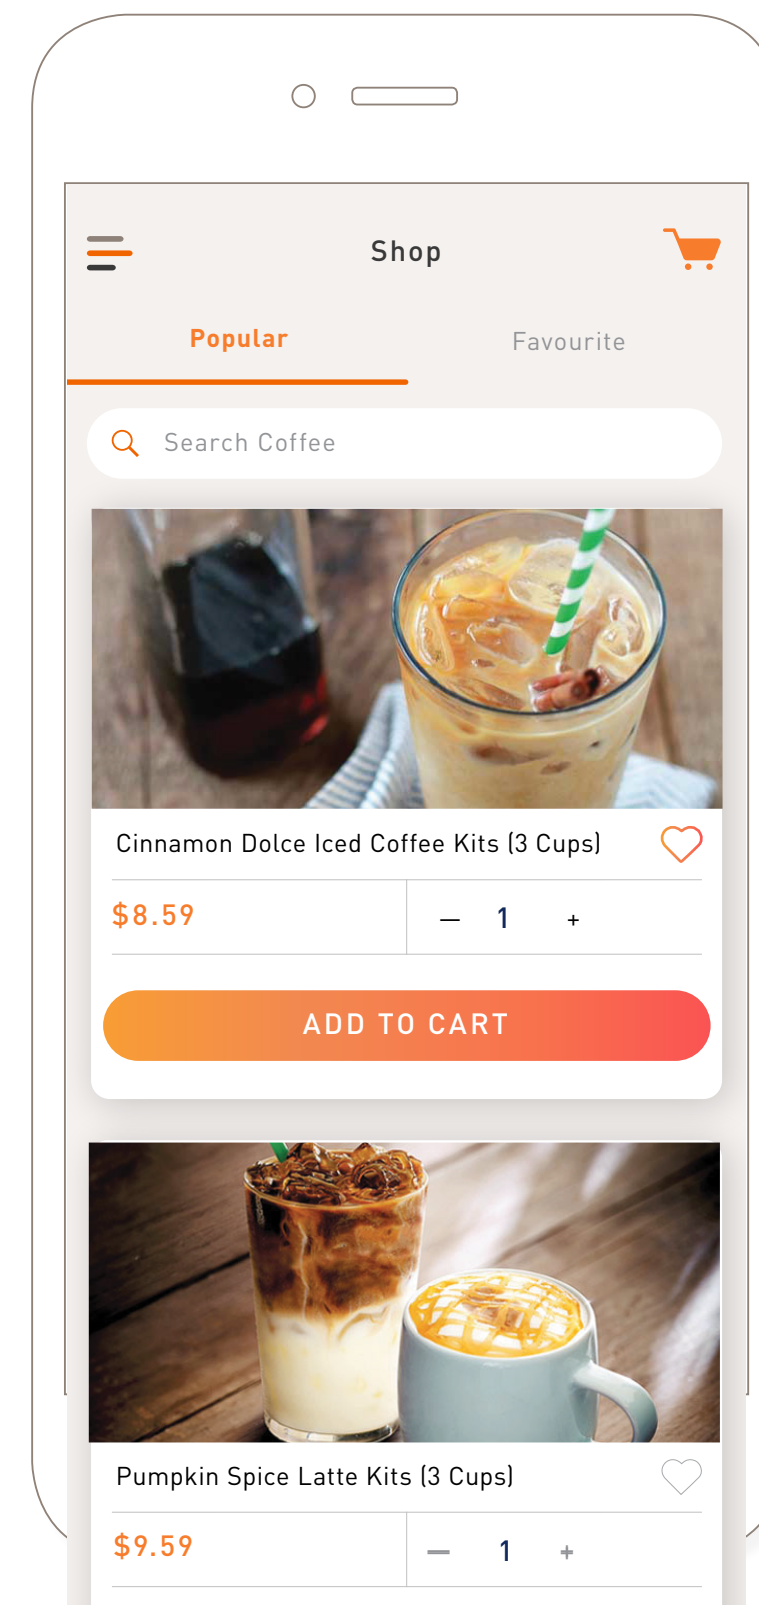

1/10 Side Push Navigation

Click menu icon to open the side push navigation

tap shop button

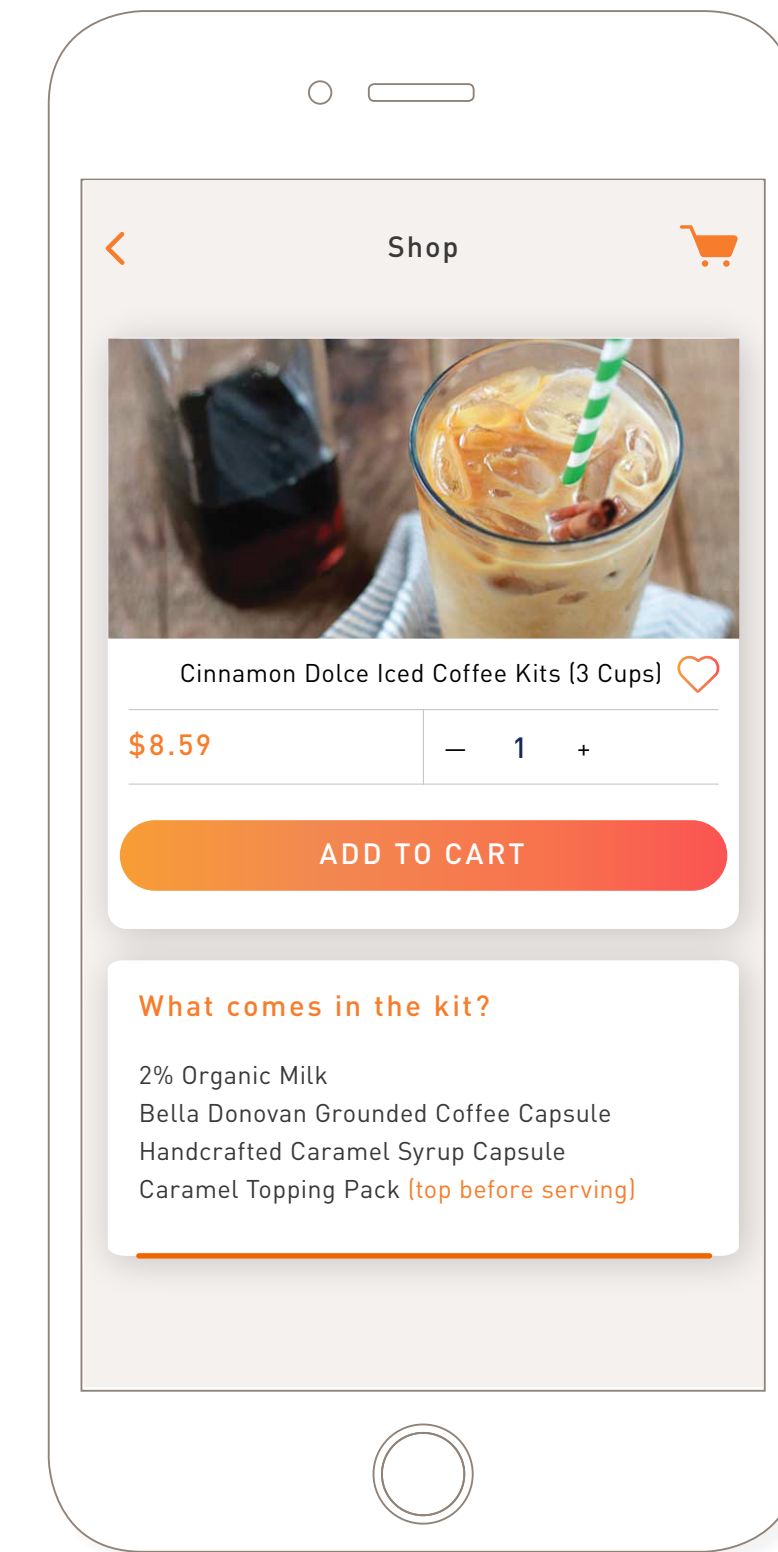

2/10 Shop

Coffee kits can be browse and purchase in this screen. User can add to favorite by clicking heart icon.

tap product image

3/10 Coffee Kit details

The product detail page will open and shows what is included in the kit. User add items into cart.

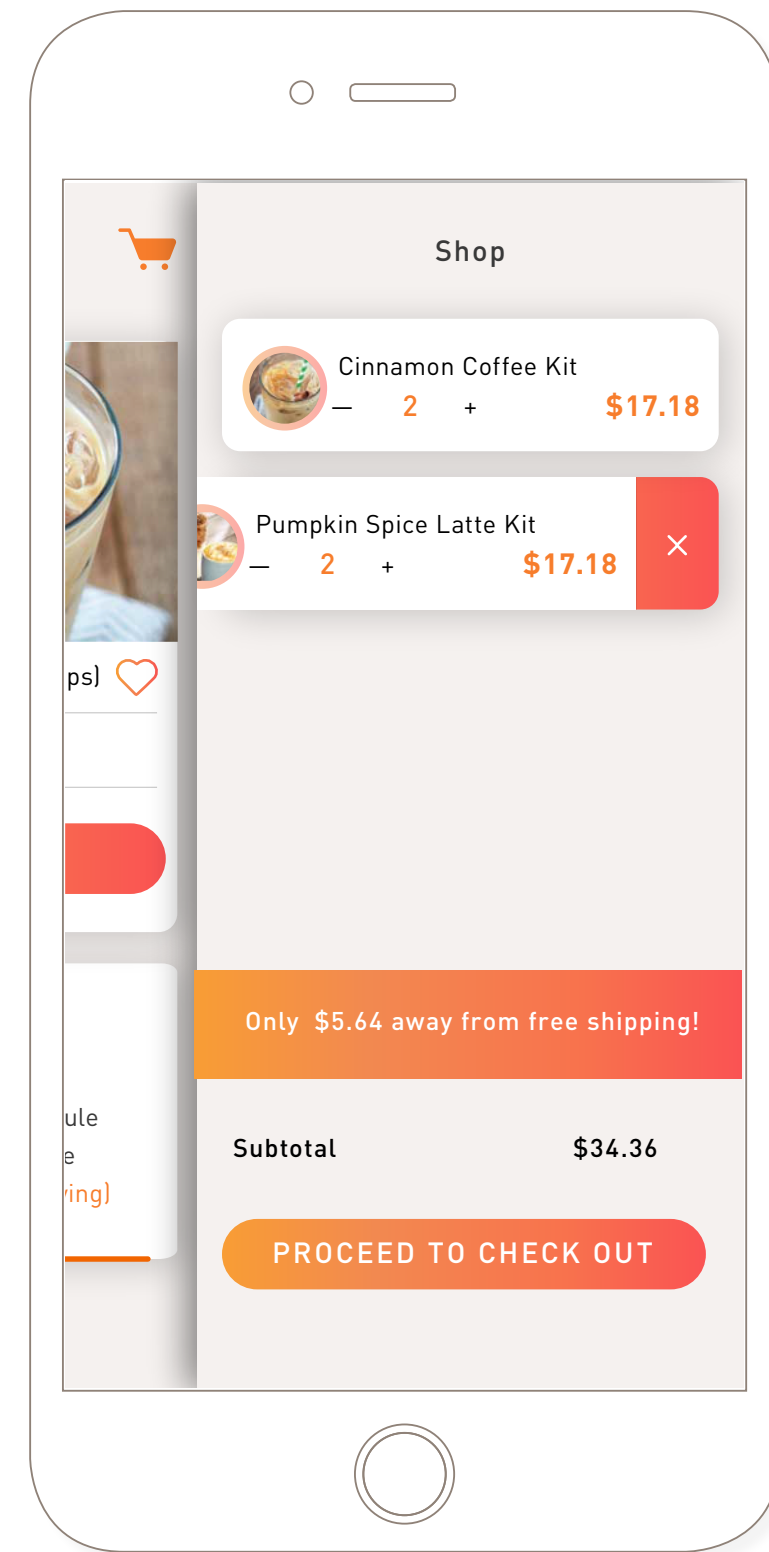

tap quantity and add to cart button

tap cart icon

PROTOTYPE

3

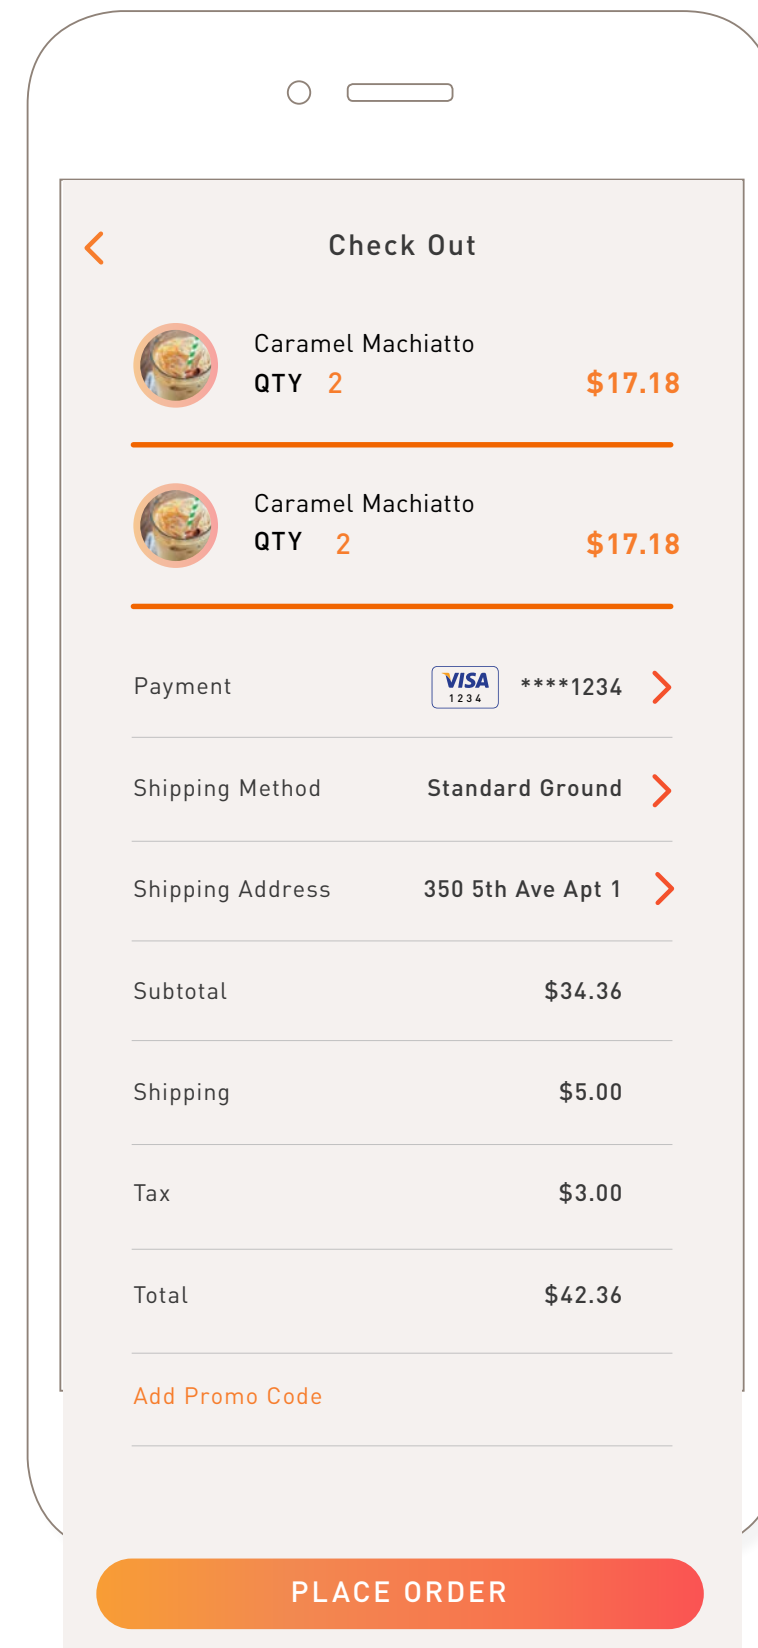

4/10 Cart

User click cart icon to open and view items in cart. User can edit amount or delete item. Click “proceed to check out” to continue.

tap
proceed to
check out
button

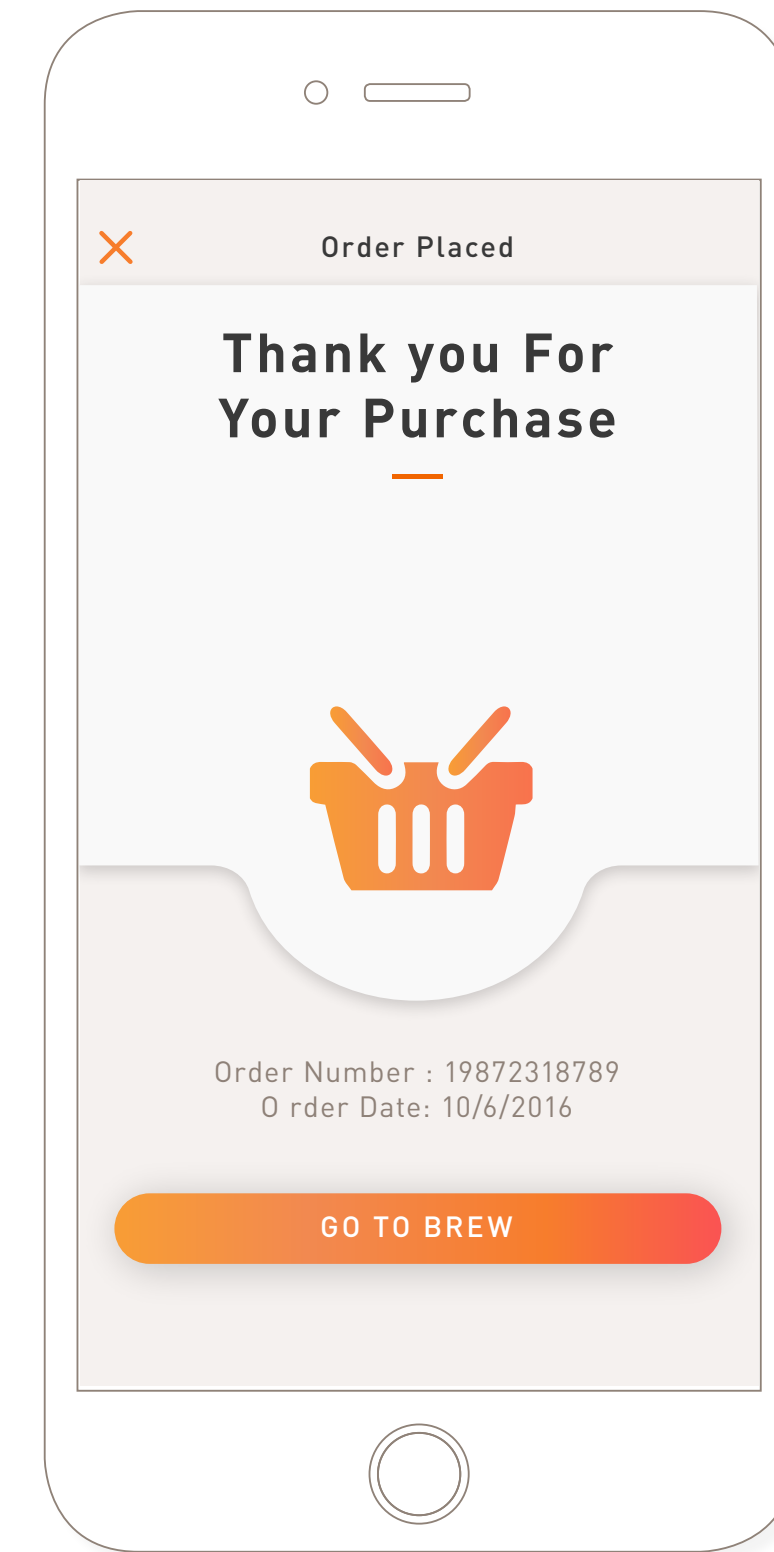

5/10 Check out

Check out detail will show. Users can edit payment and shipment info.

tap place
order button

6/10 Order Placed

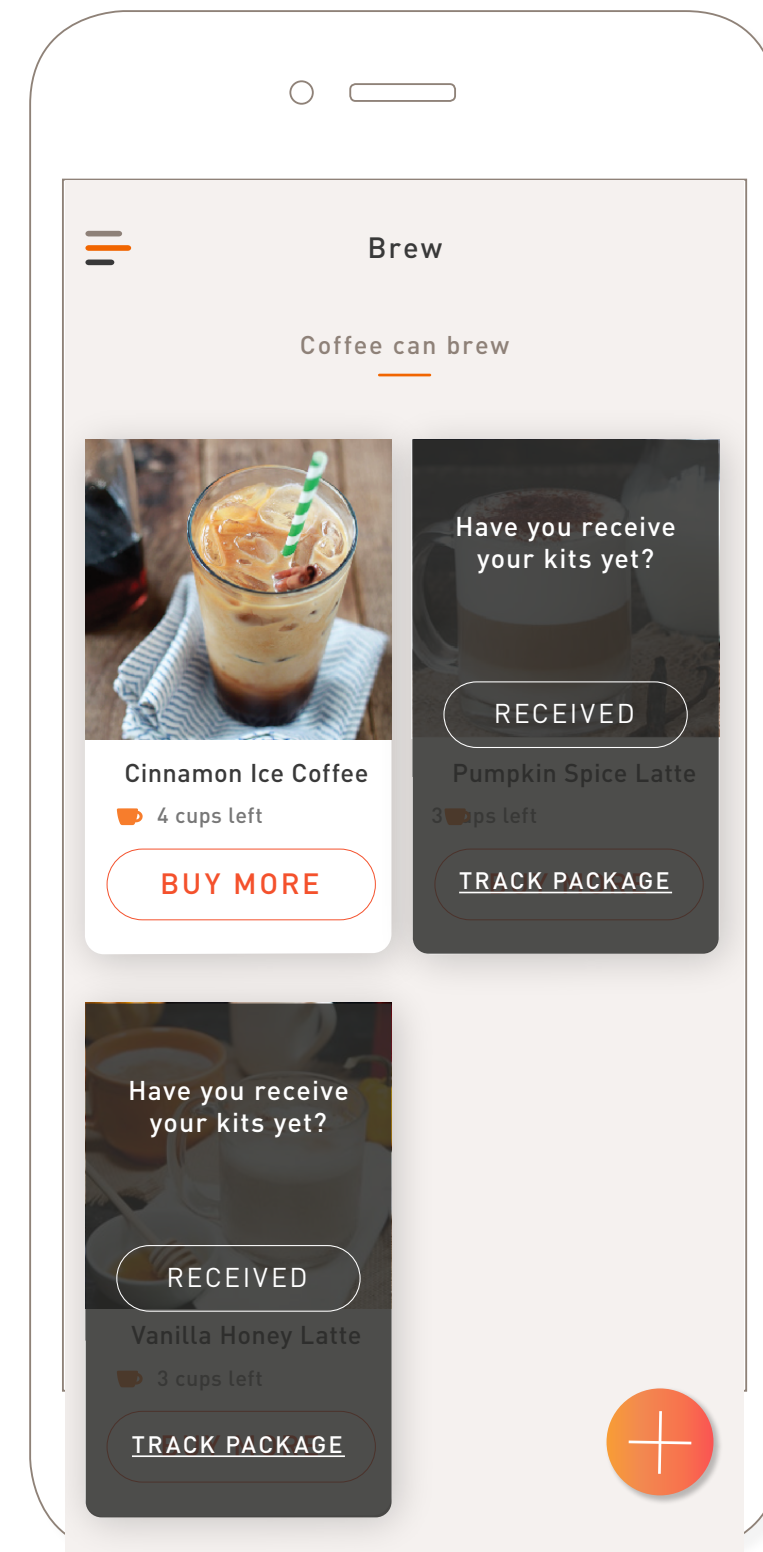

Order placement confirmation shows. It includes order date and order number.

tap go to brew
button

PROTOTYPE

3

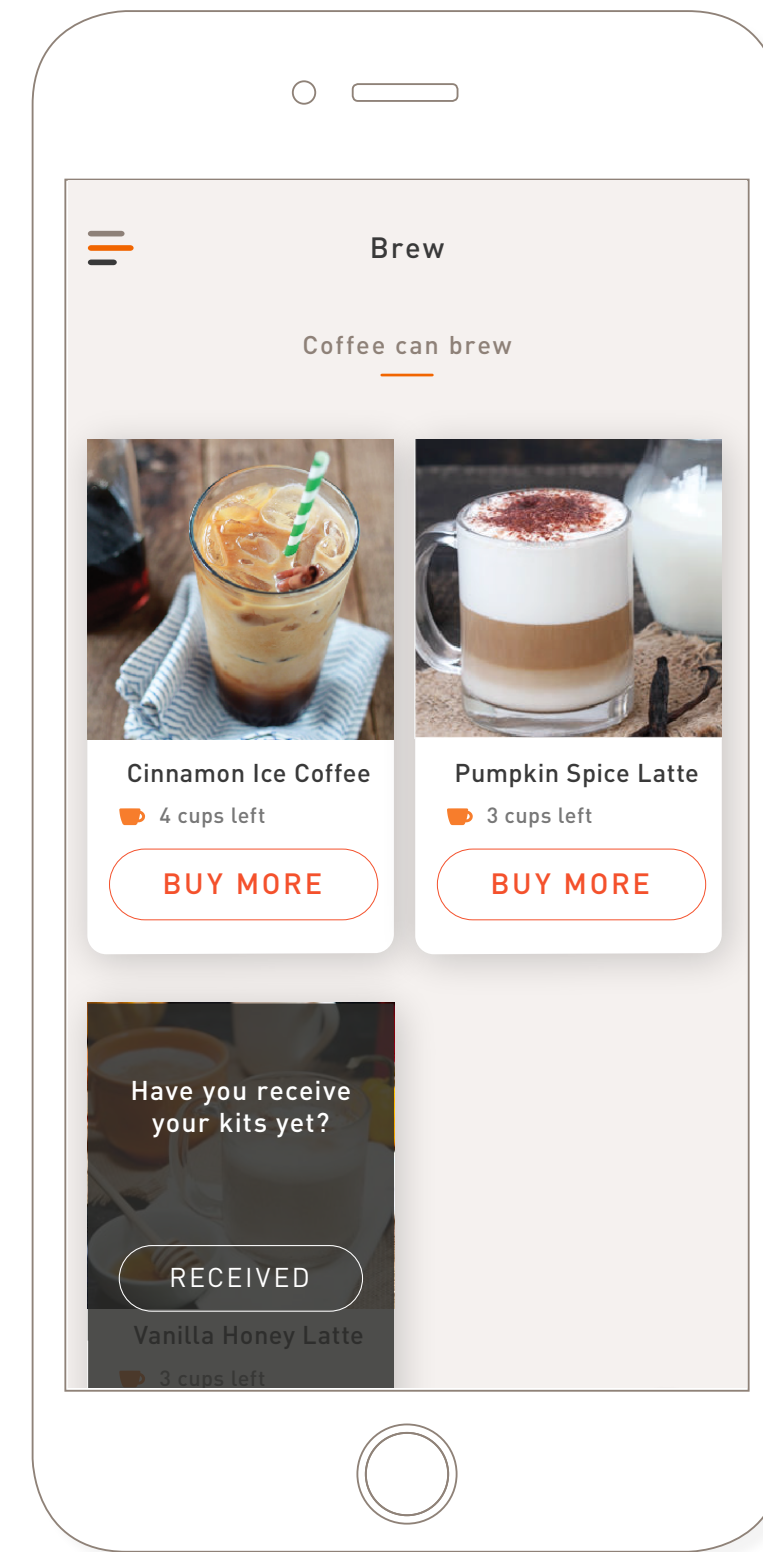

7/10 Brew

Now, users can see their brew inventory has added the new ordered items

After receiving shipment

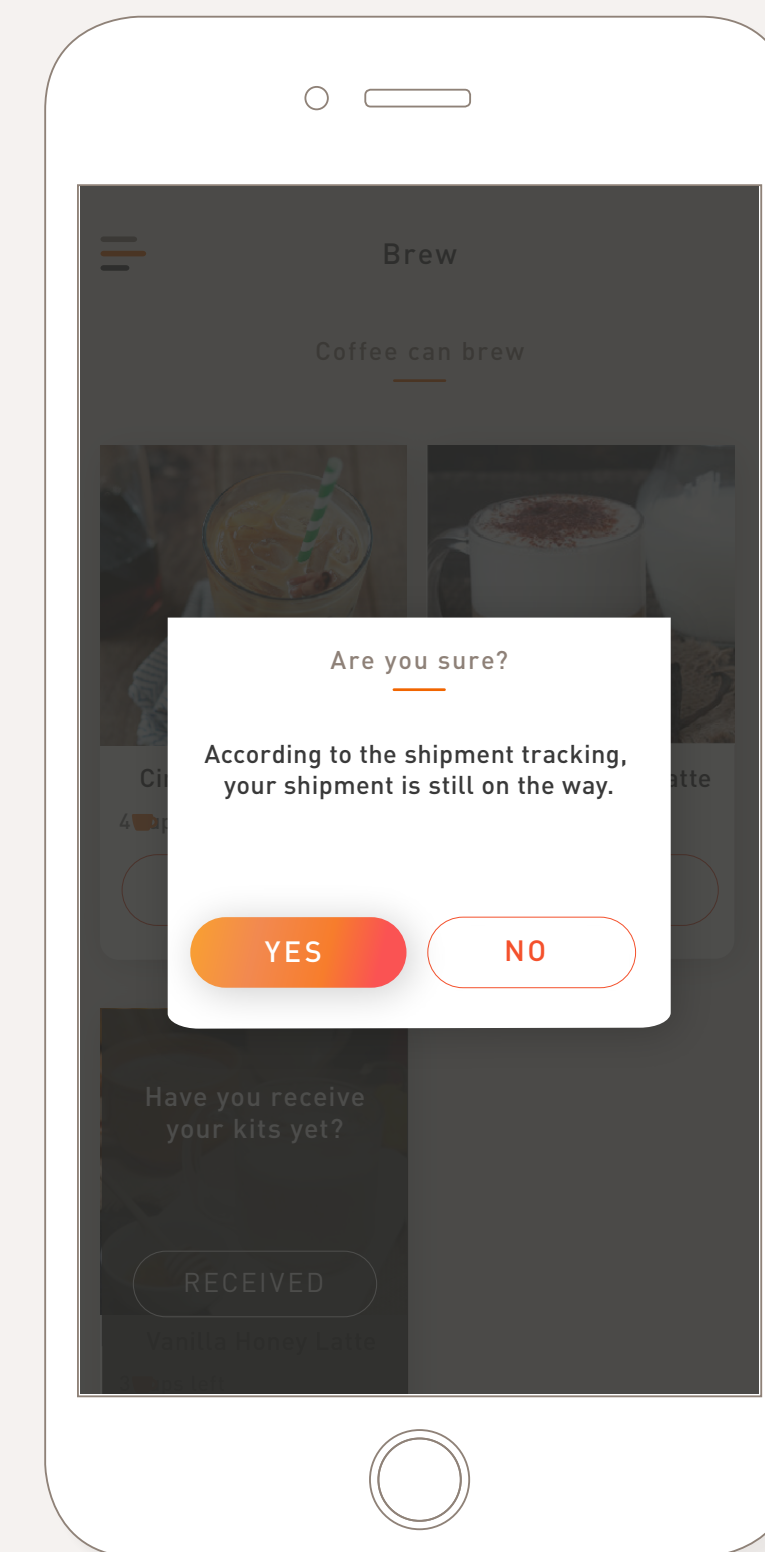

tap received button

8/10 Confirm Receive

After receiving the package, users click on the receive button to activate the item to brew

Extra / If shipment has not been delivered

If shipment is not delivered yet and users accidentally click on "receive" button, pop up alert will shows.

UX PROCESS

TARGET AUDIENCE

Coffee Lovers

Our target audience is coffee lovers who likes to drink different kinds of espresso drinks everyday. Their ages are between 32 to 50 who have graduated and have a high relative income (\$100,00+). These people are smart phone users and are familiar with smart apps. With their professional career, they have longer intense working hours (40+ hour/week) with more brain work, so they like coffee drinks and are likely to have caffeine in-take to start their day. With their education background and living standard, they care about quality and how to upscale their life style. They will purchase higher-cost products to elevate their lifestyle and enjoy their life.

PERSONA 1

Kevin Stephens

Age: 44

Location: San Francisco, California

Education: Graduate

Occupation: CEO of a start up company

Income: \$200,000+

Working hours: 40 or more / week

Status: Married

Children: 1 kids (5 years old)

Coffee habit:

- Drinks different espresso drinks every day.
- Enjoys having a higher value cup of coffee.
- Prefers brewing his own coffee

Lifestyle:

- Busy with meetings and works
- Take care of his daughter
- Care about life style
- Open-minded with new technology products

Needs & Goals:

- Simple set up
- Easy connection
- Less brewing skills
- Perfect taste and experiences
- Brewing Schedule

Kevin is a C.E.O. of a startup company. He has a busy life everyday with client meetings. Although he has a busy life, he enjoys his leisure time with high quality standard. He likes to explore new innovatively designed products. He occasionally drinks coffee and recently would love to add a new gadget to his smart kitchen collection.

He purchases his first Nevo. The Nevo coffee machine comes with a coffee kit. He wants to set up his Nevo machine and tries to brew his first cup of Nevo coffee.

This is a new smart coffee machine. It looks like a great fit for me

Working hours: 40 or more / week

Status: Married,

Children: 2 kids (7 & 4 years old)

Coffee habit:

- Drinks a cup of coffee every morning
- Likes to drink coffee every morning
- Likes trying different espresso drinks

Lifestyle:

- Busy with work and taking care of family
- High-tech products user
- Time management intensive
- Frequent online shopping habit

Needs & Goals:

- More choices of coffee beverage
- Simple control, perfect tasting
- Reduce grocery shoppings
- Reduce preparation
- Brewing schedule option

Heather is a bookkeeper. She enjoys her life by using technology products and having a higher quality standard. She likes to brew her coffee drinks everyday. However, it takes so much grocery time to find matching ingredients for each recipe. Nevo online shop for pre-measured ingredients kit can help her to solve her needs.

Heathers wants to use the Nevo App to easily places an order for coffee ingredient kit which are already pre-measured. This helps her to reduce grocery shopping time and avoid preparation waste.

Enjoying my life with a cup of joe in a regular base without making a mess

JOURNEY MAP

2

PHRASE	RUN OUT OF INGREDIENTS	GROCERY SHOP	GO TO DIFFERENT STORES	FIND NEEDED INGREDNETS	BACK HOME AND BREW
SCENARIO	<ul style="list-style-type: none"> • Want to brew coffee • Run out of an ingredients • Cannot brew 	<ul style="list-style-type: none"> • Drive to grocery store • Looking for ingredients • Walking around in store 	<ul style="list-style-type: none"> • Try to go to another store • Hope to find the ingredients • Walking around in store 	<ul style="list-style-type: none"> • Find the item • Grab it and go to cashier • Happily leaving 	<ul style="list-style-type: none"> • Back home • Start to brew • Enjoy coffee drinks
THOUGHTS	<ul style="list-style-type: none"> • "Should have buy it earlier" • "Now I cannot brew my drinks drinks..." 	<ul style="list-style-type: none"> • "Do they have that ingredient?" • "Which asiel can I find it?" • "Do they have substitute item?" 	<ul style="list-style-type: none"> • "Will this store has it?" • "Wish they have it" • "I dont want to go another store" 	<ul style="list-style-type: none"> • "Thanks god I find it" • "So I dont have to go to another store now" 	<ul style="list-style-type: none"> • "Now i can brew it..." • "It smells good" • "Clean up after..."
FEELINGS	<ul style="list-style-type: none"> • Feel so dissappointed • Feel stupid • Feel upset 	<ul style="list-style-type: none"> • Hoping to find it easily • Feel unhappy • Feel dissappointed 	<ul style="list-style-type: none"> • Feel annoying • Hope to find it • Feel numb 	<ul style="list-style-type: none"> • Feel happy • Want to go home and brew the coffee drinks 	<ul style="list-style-type: none"> • Feel enjoyable and engetic • Want to rest and taste it • Greatful and happy

TESTING PLAN

PRODUCT UNDER TEST

- At first (1st—3rd GDS classes), using low-fidelity prototype to test.
- After more feedback and refinements (4th—6th GDS classes), clickable prototype was used to test for actual functionality and design.

TEST GOAL

- To understand more different users needs and getting more feedbacks on thoughts and design.
- Results, comments and feed backs are used to refine the UXUI design.

PARTICIPANTS

- Users who likes to drink coffees and are willing to brew coffee at home.
- Users who will purchase brewing equipments and better quality ingredients.
- Users who want to be engaged in brewing experience and enjoy coffee drinks.

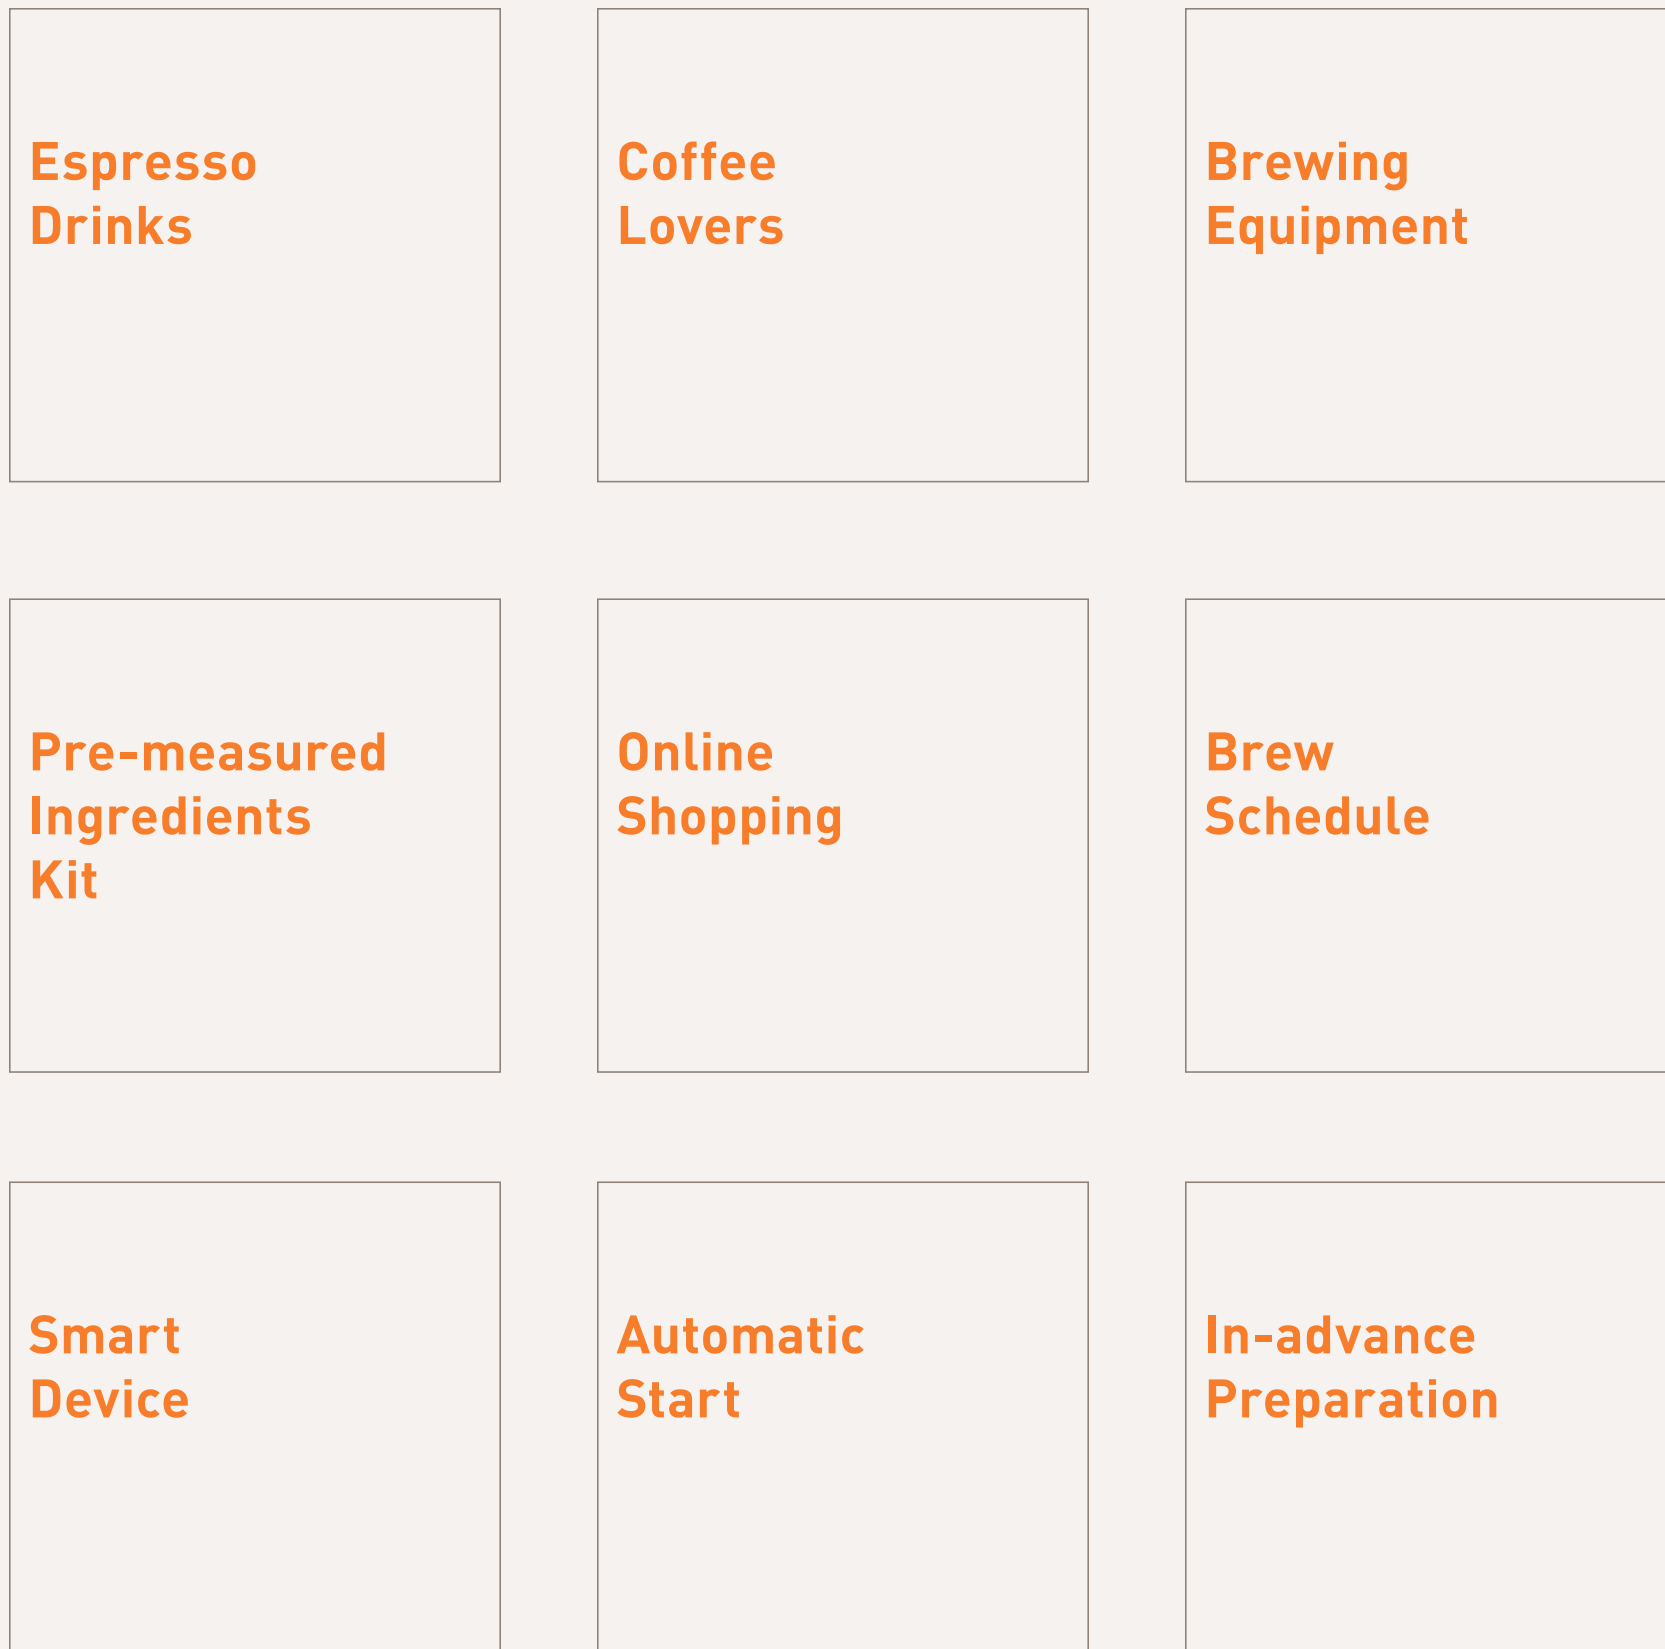

TEST TASK

- Test for new users and return users task.
- Return user—prepare and brew coffee
 - New user—easy connect and set up for the Nevo coffee machine
 - Return user/New user—shopping for coffee ingredients kits.

TESTING PROCESS

Phase	Time	Participants	Testing Type
Narrow Down the Market	September 2015	1 sales in coffee boutique	Brain Storming
Interview with Coffee Lovers & Brewing Device Customers	September 2015	3 students & 3 professional adults	Interview
Card Sorting	September 2015	3 students	Interview
Low-Fidelity Prototype (Round 1)	October 2015	3 students	Invision Prototype
Low-Fidelity Prototype (Round 2)	November 2015	1 students & 2 professional adults	Invision Prototype
High-Fidelity Prototype (Round 1)	November 2015	4 designers & 4 professional adults	Invision Prototype
High-Fidelity Prototype (Round 2)	May 2016	2 professional adults	Invision Prototype & Invision Prototype
High-Fidelity Prototype (Round 3)	September 2016	2 professional adults	Clickable Prototype
High-Fidelity Prototype (Round 4)	November 2016	3 professional adults	Clickable Prototype

CARD SORTING

1ST ROUND KEYWORDS

I narrowed down the market existing products and target audiences' needs

2ND ROUND KEYWORDS

I narrowed down the target audiences and their needs with suitable background that can and will afford to engage with the Nevo system. The Nevo system is designed to help them to brew espresso drinks which require lower brewing skills but still have a great brewing/ coffee experiences.

3RD ROUND KEYWORDS

I narrowed down the target audiences and their needs with suitable background that can and will afford to engage with the Nevo system. The Nevo system is designed to help them to brew espresso drinks which require lower brewing skills but still have a great brewing/ coffee experiences.

Spec/tech
 - 5in touch screen
 - wifi connectivity
 - weight sensors
 - Superdinator brains CPU
 - cavity temperature
 - Custom made for buy people
 - tech thinker
 - serious drinker
 - coffee lover
 - Mission Control for your coffee

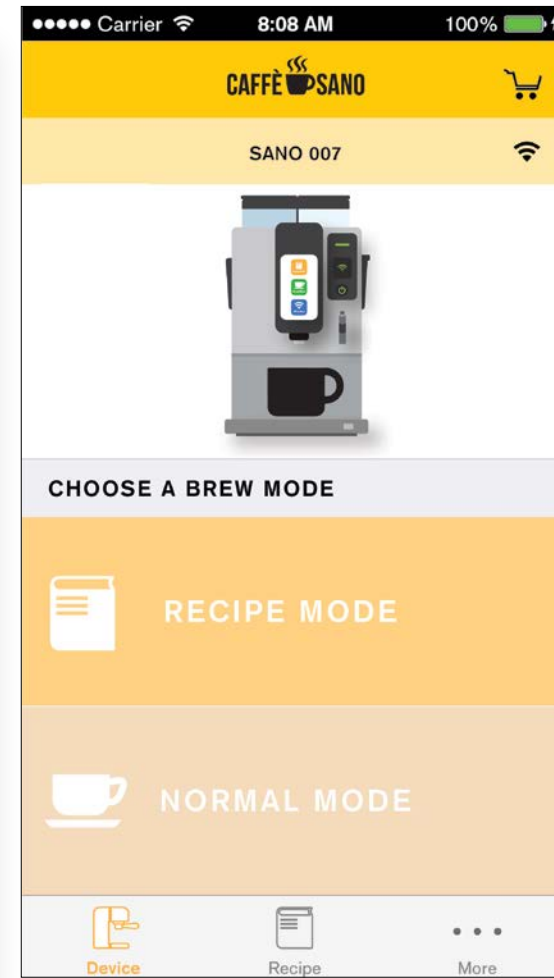

WIREFRAME ROUND 1

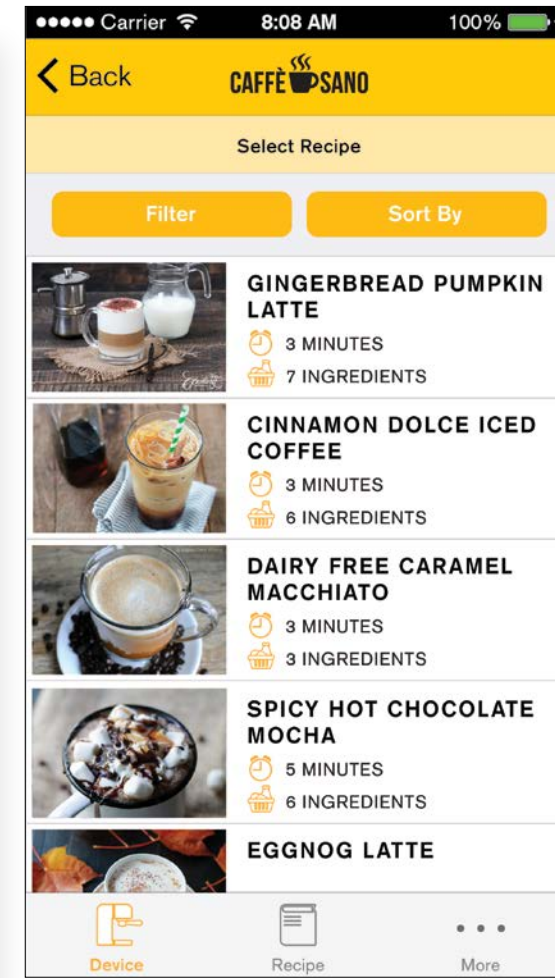

Too narrow layout, need more spaces

Hierarchy is missing

Confuse about mode

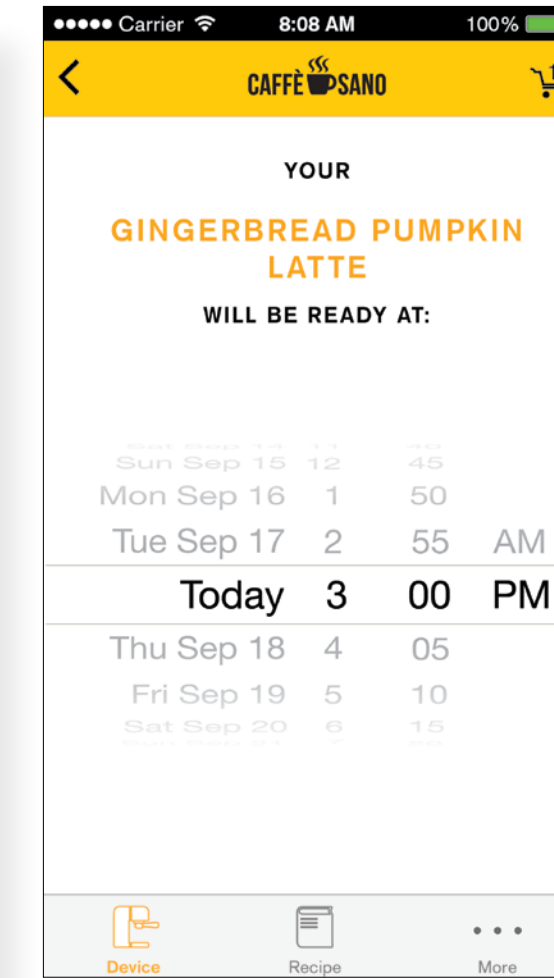

Need more spaces

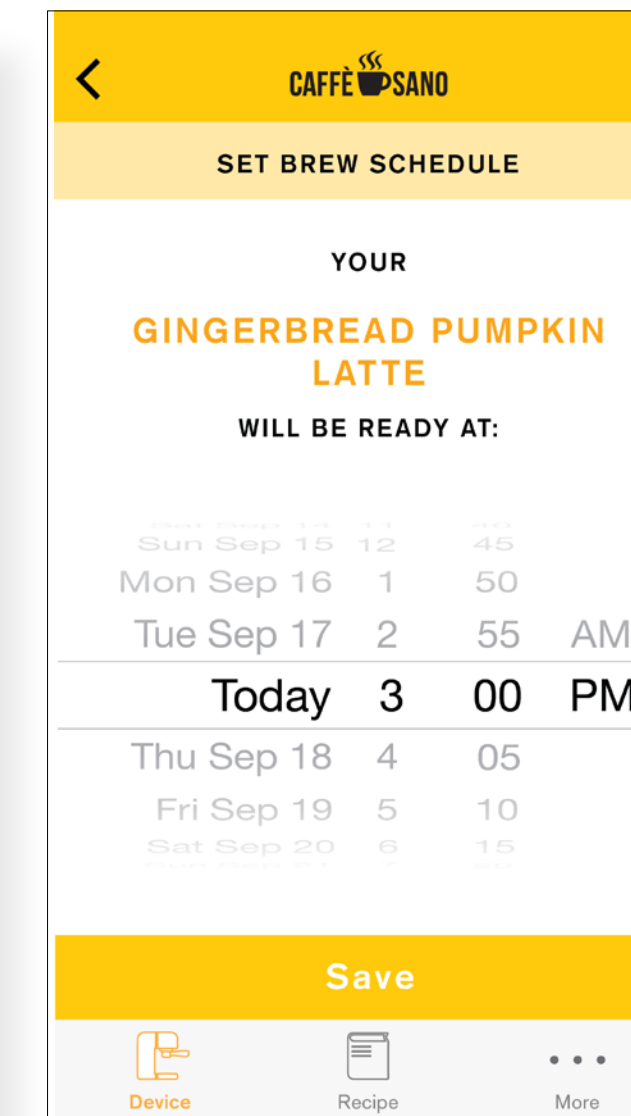

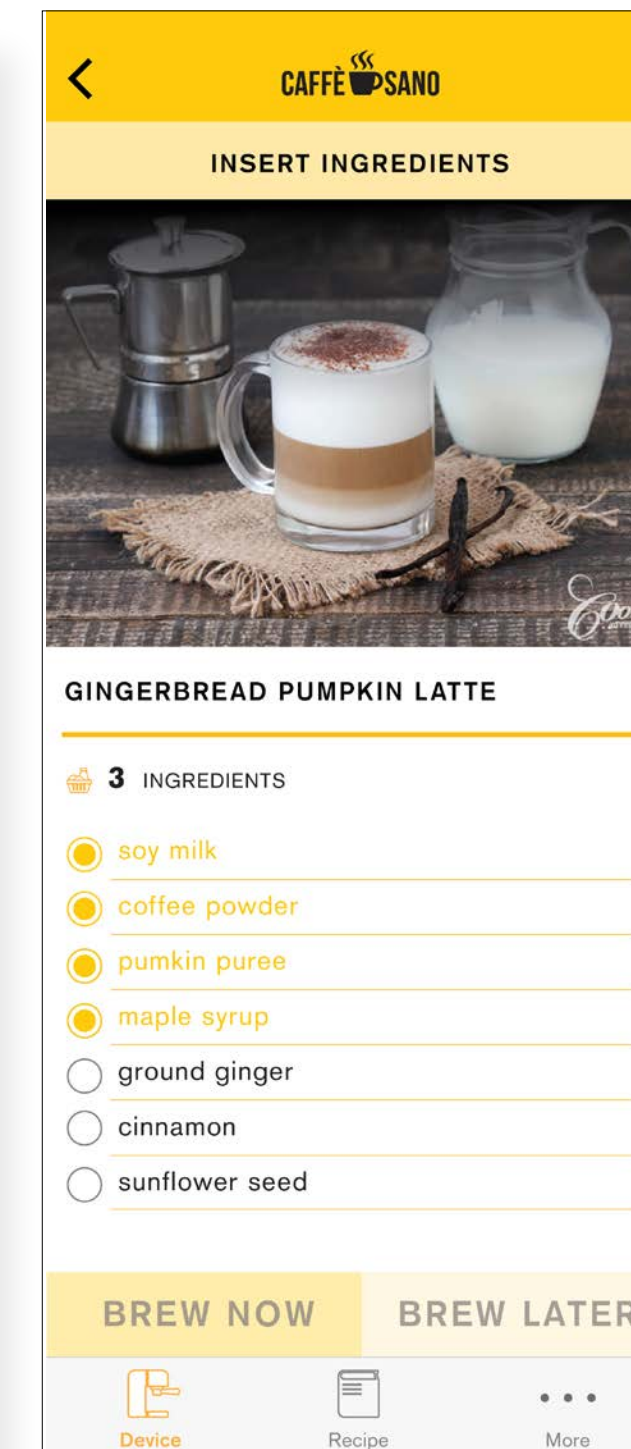

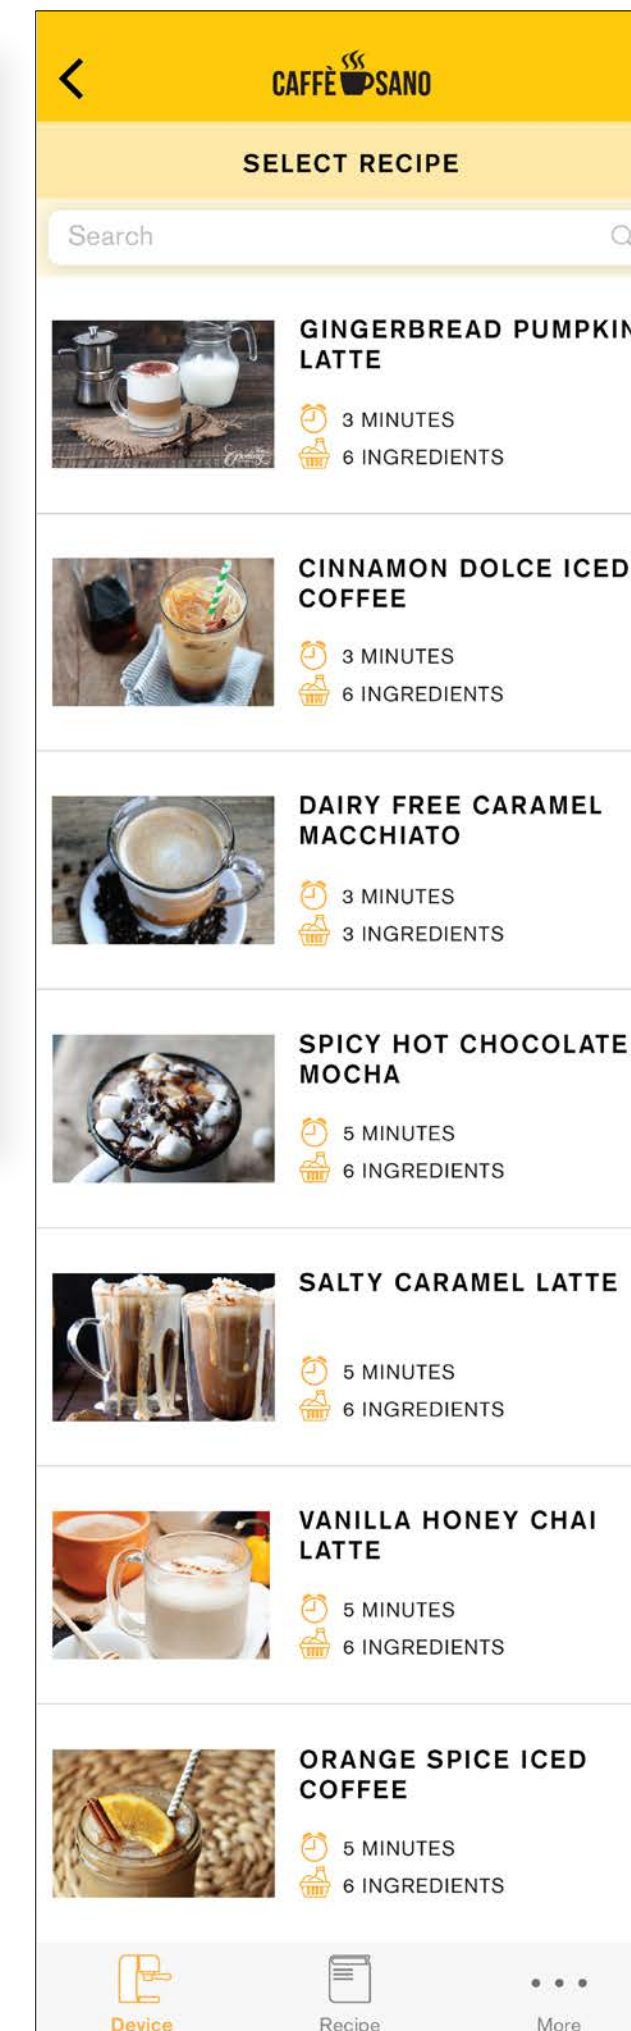

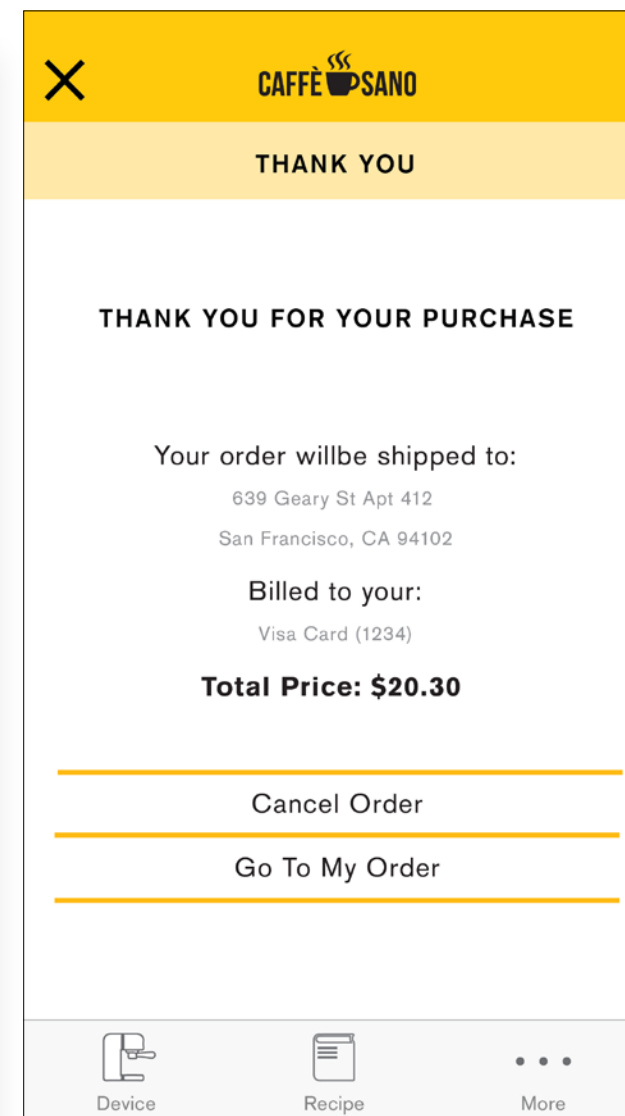

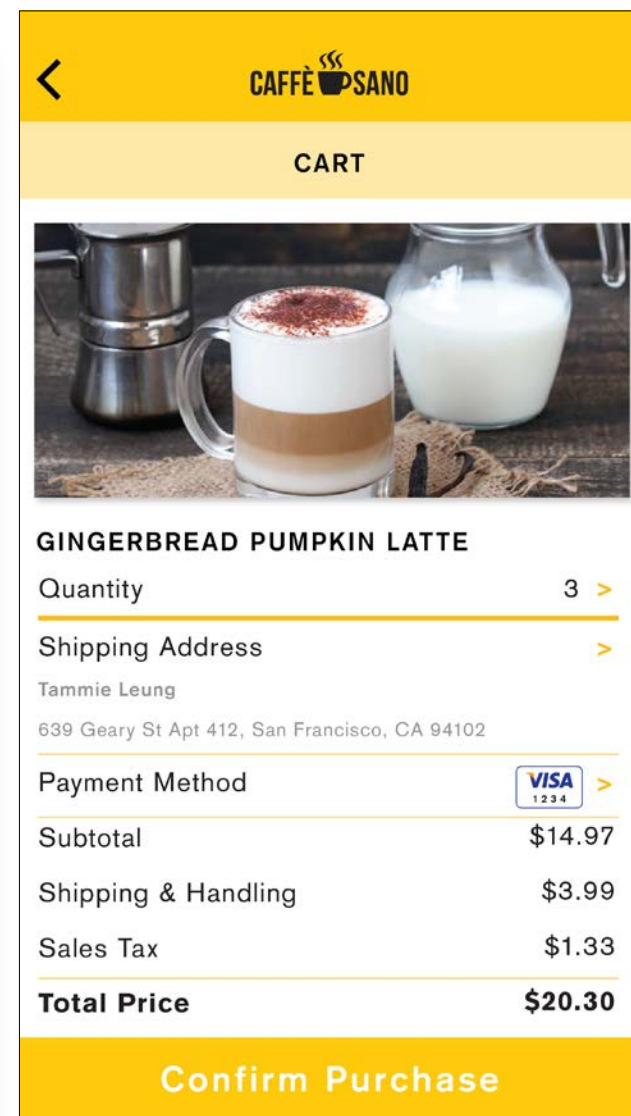

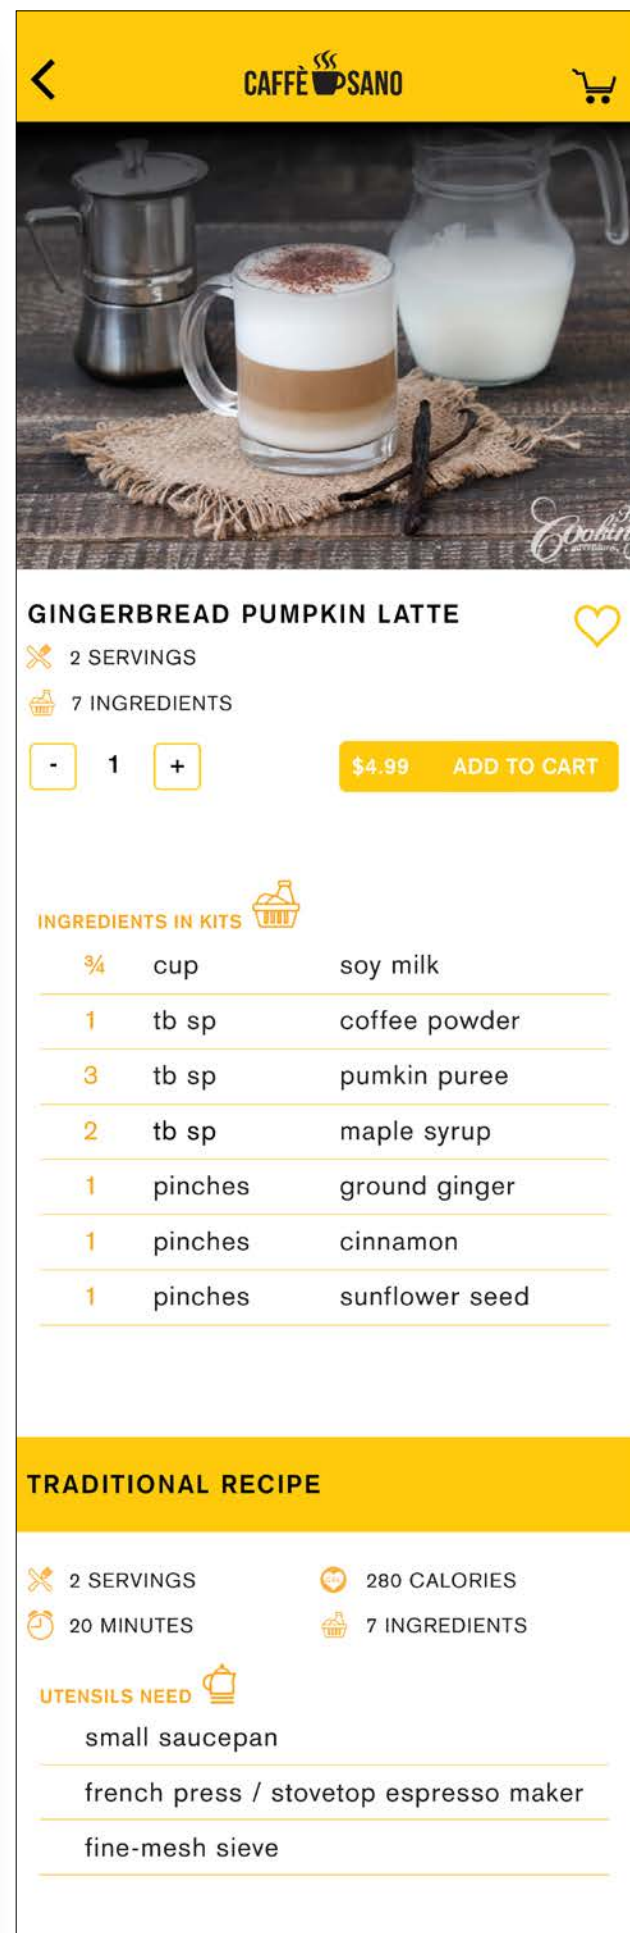

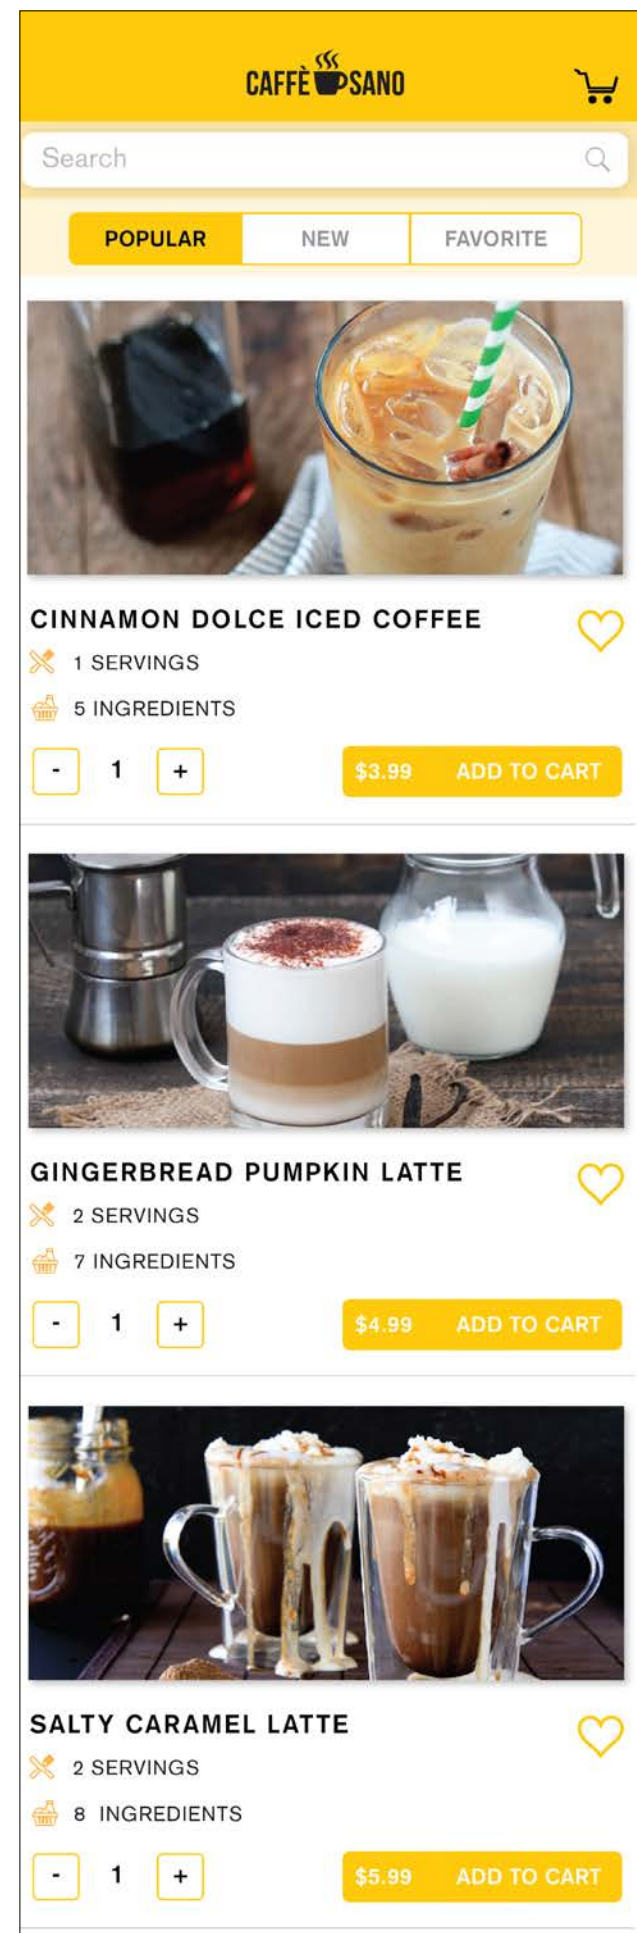

Lack of instructions

Lack of instructions

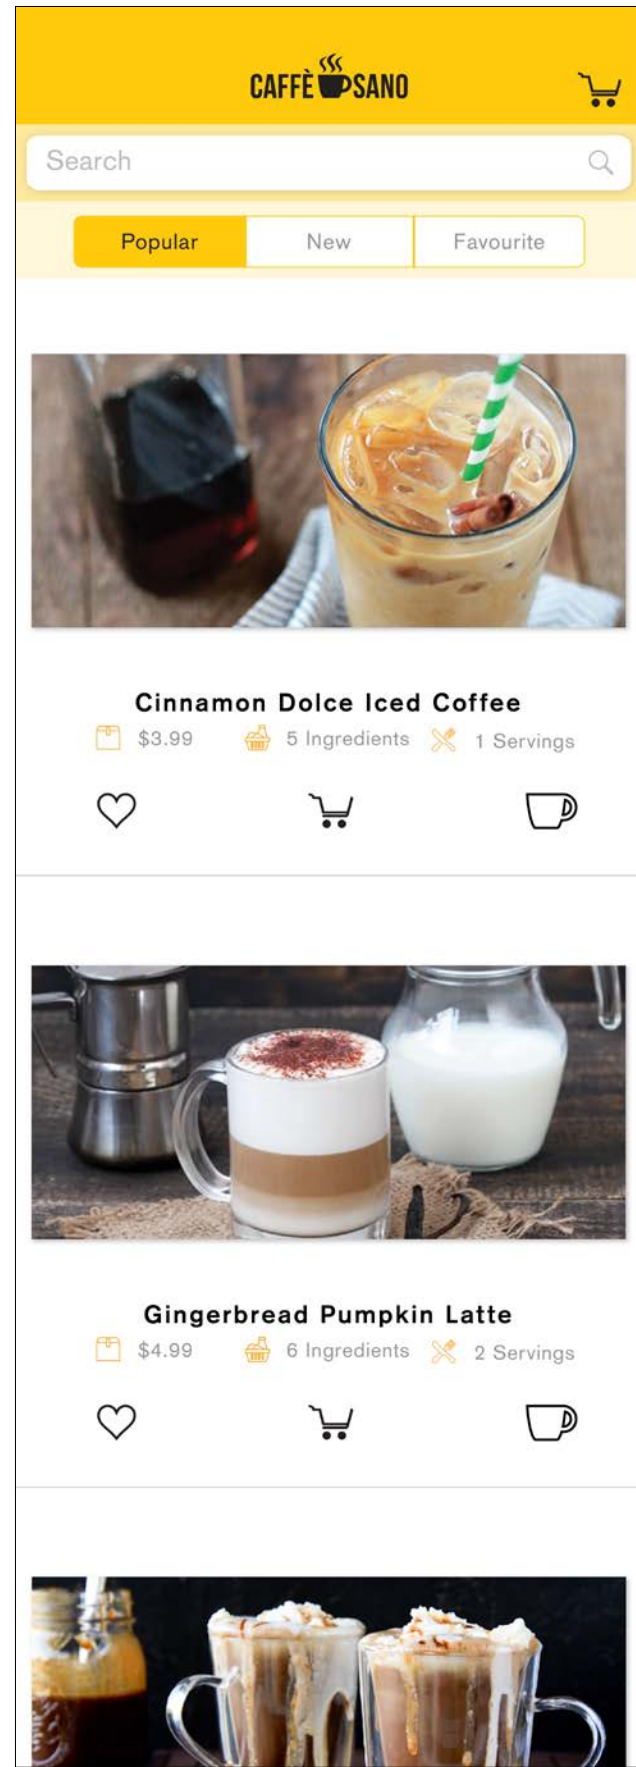

WIREFRAME ROUND 2

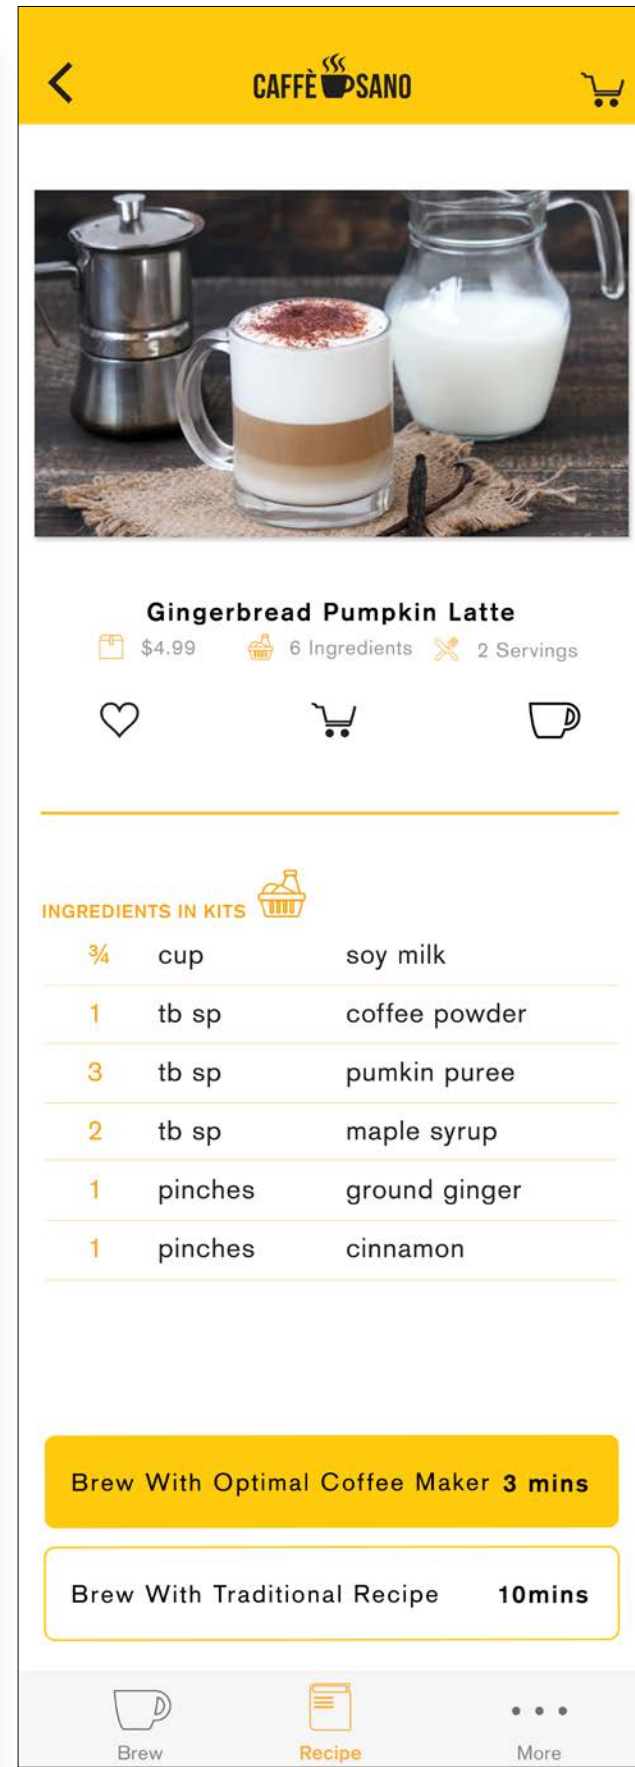

Confusing "circle icon", looks like is a clickable items

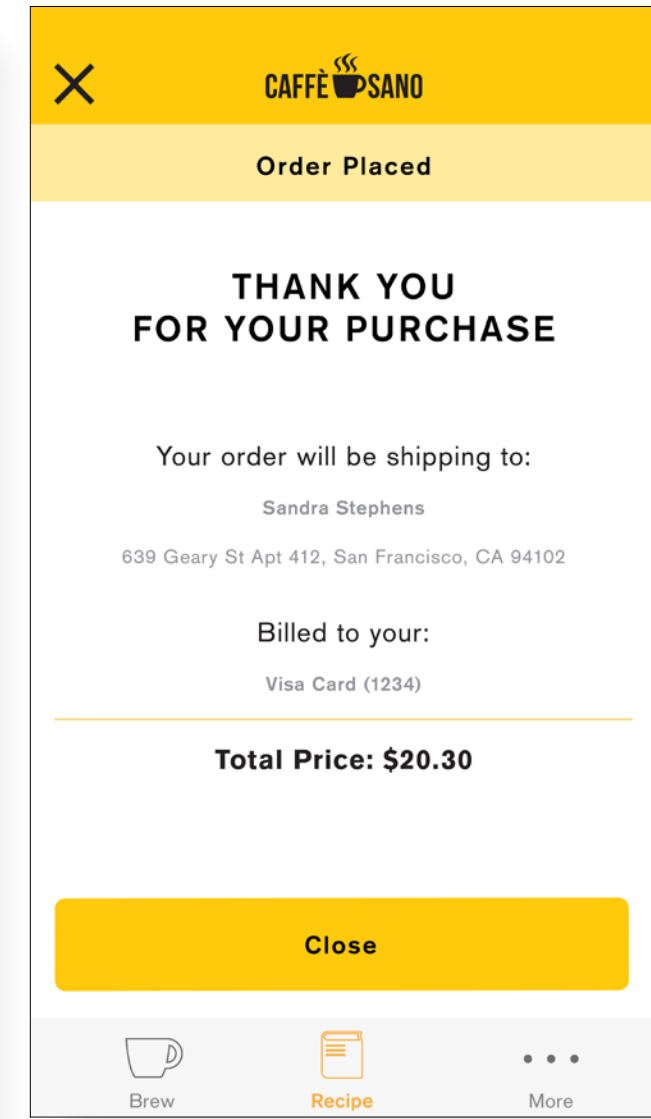

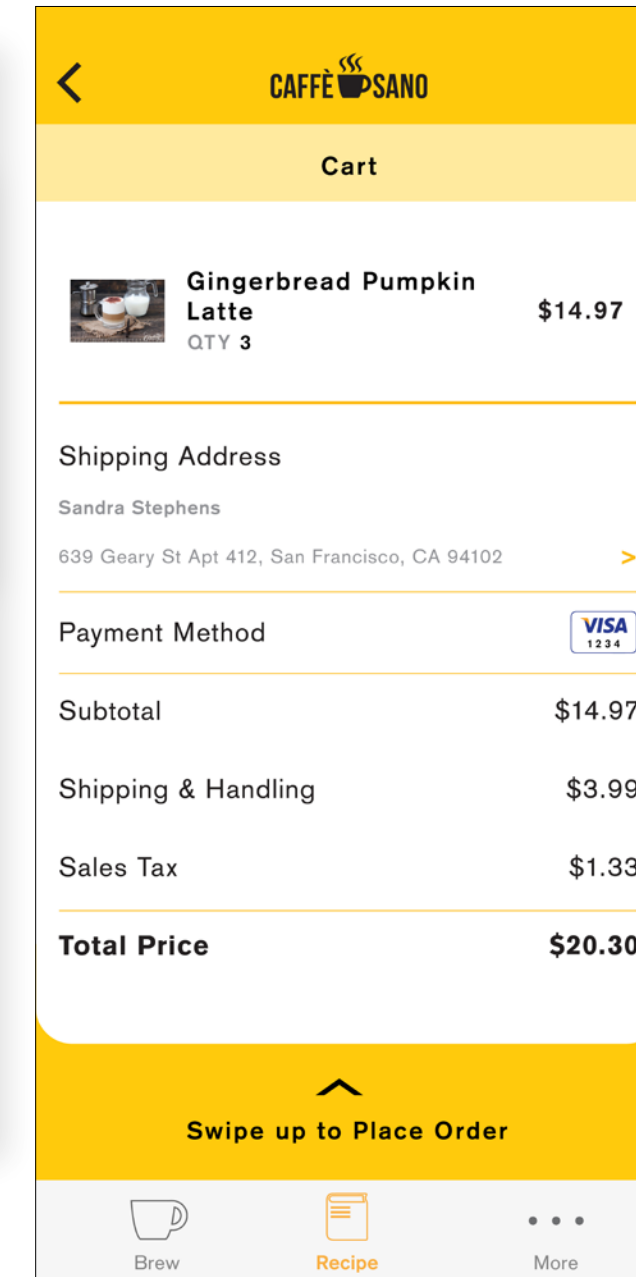

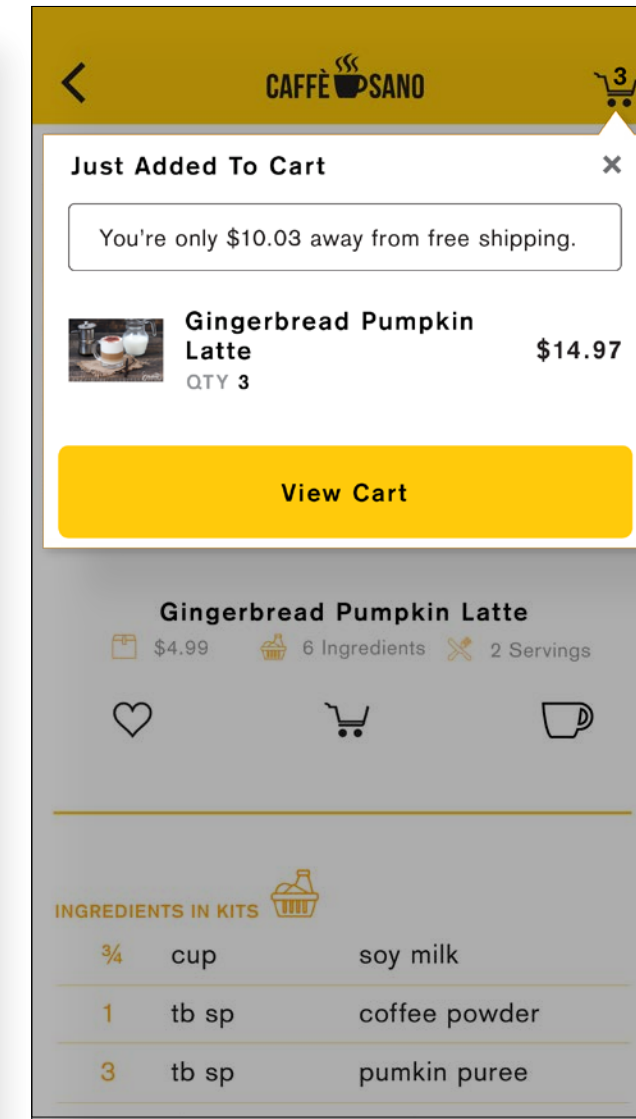

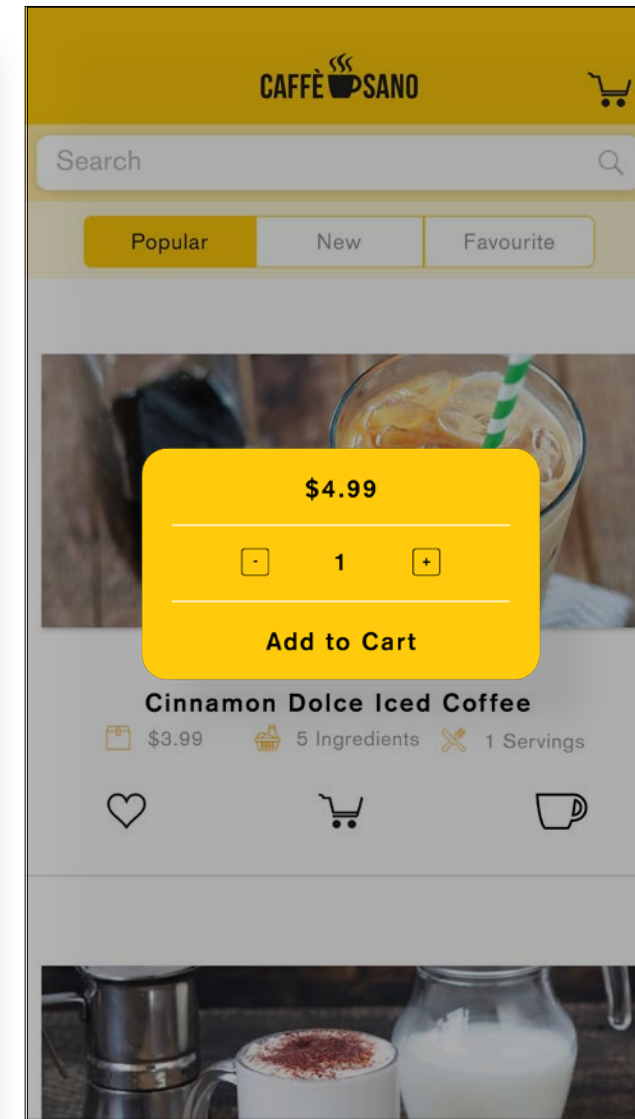

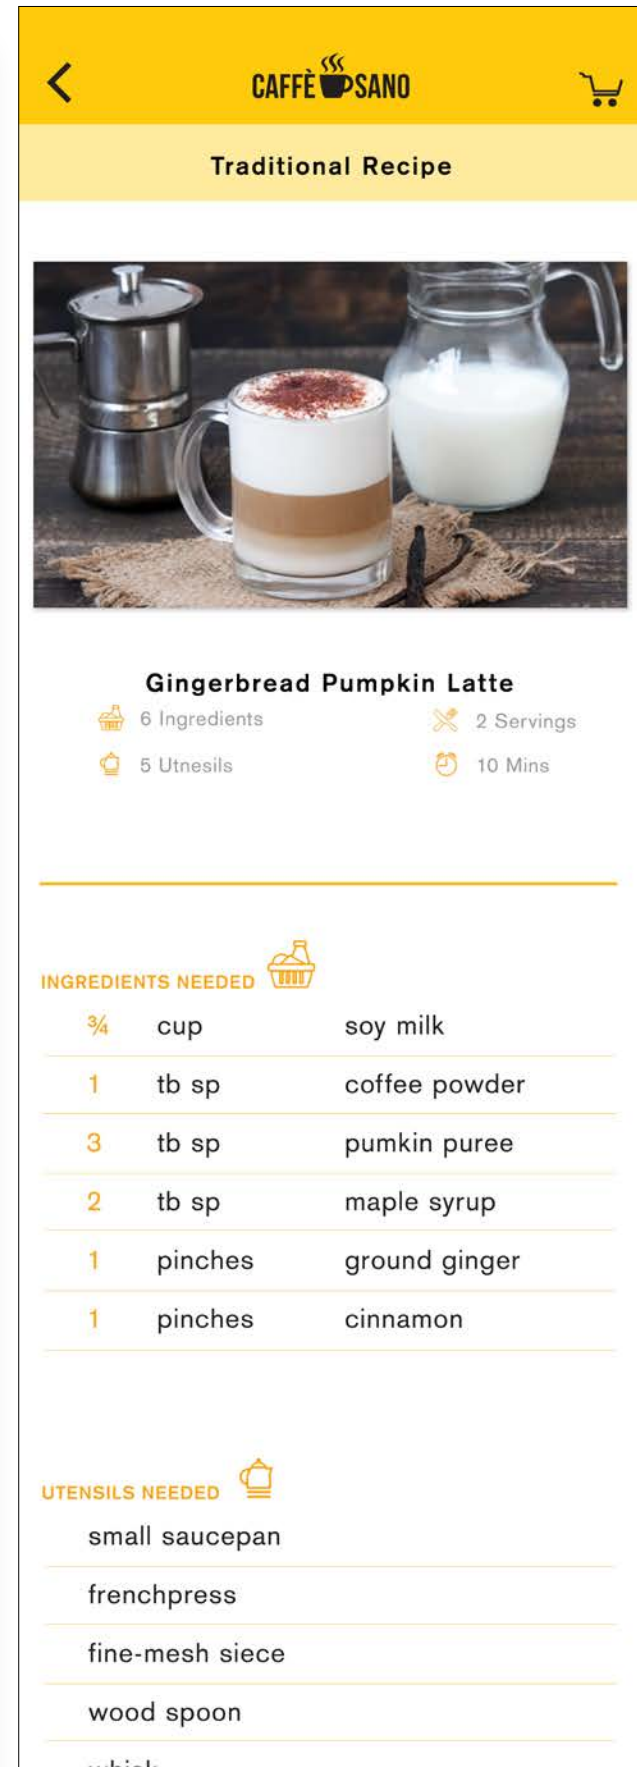

WIREFRAME ROUND 3_1

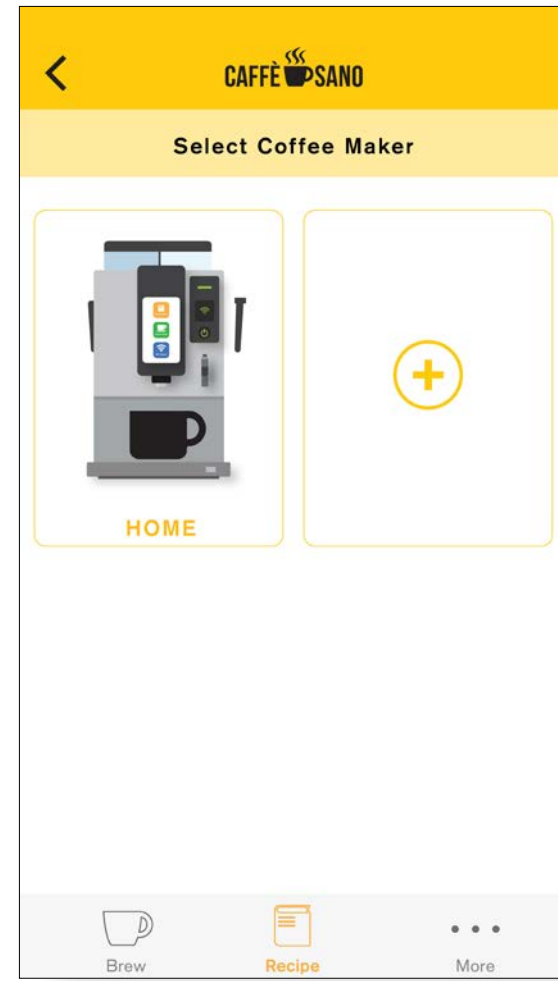

Wrong use icon

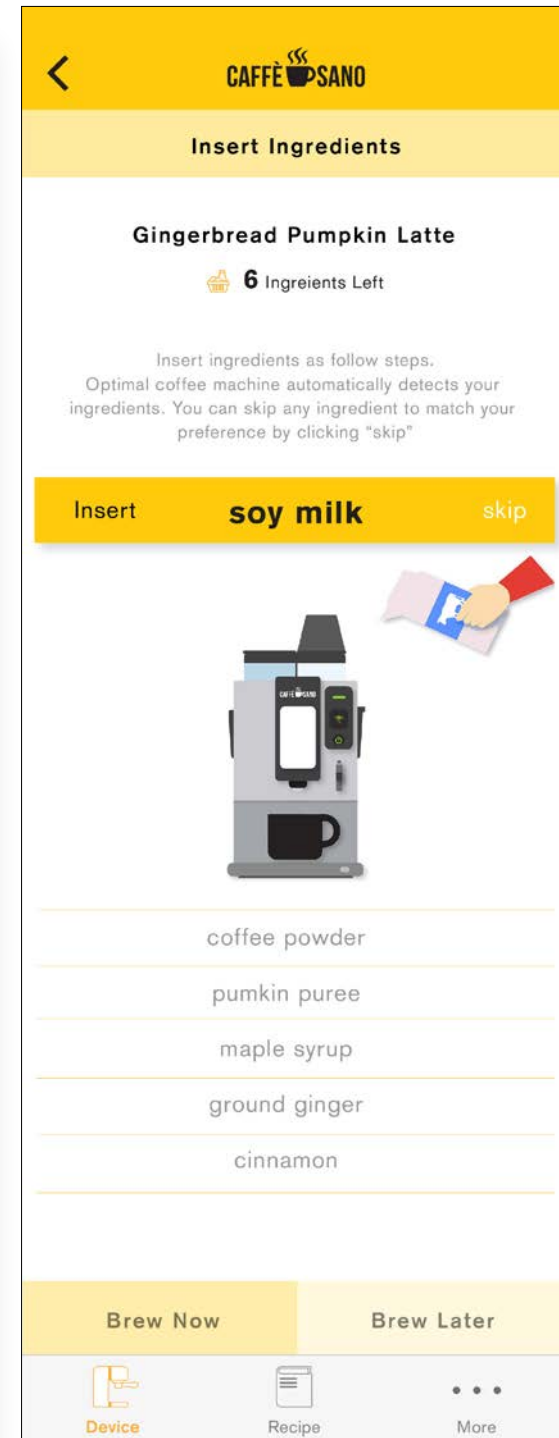

Confusing call to action button with same icon

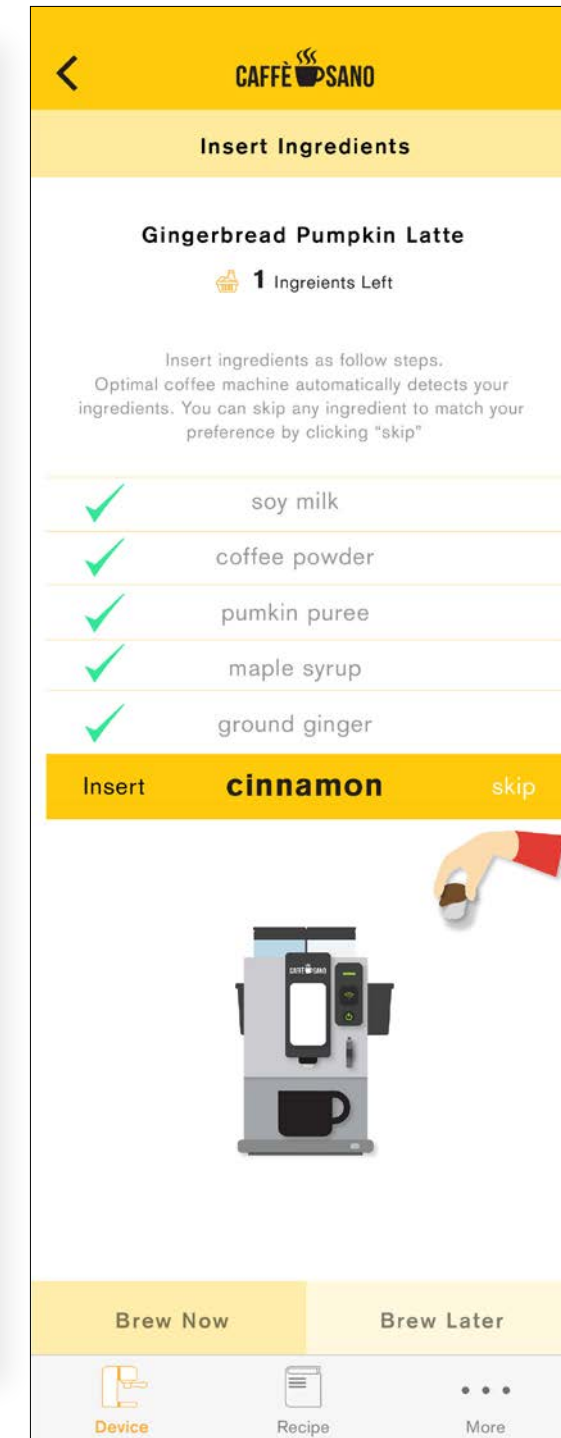

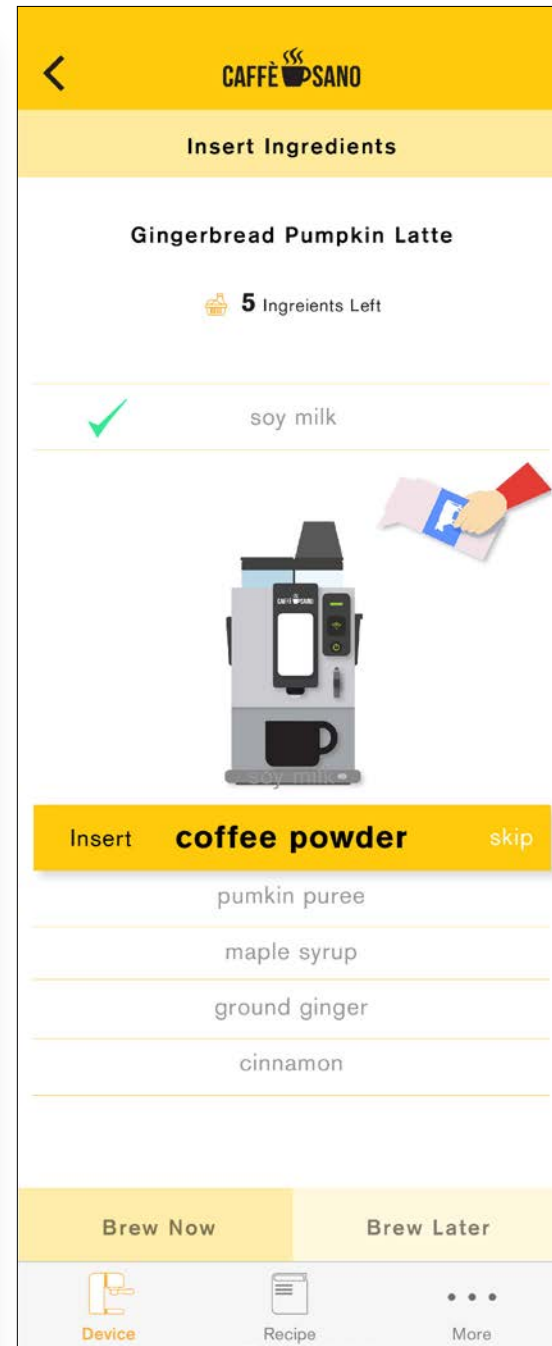

WIREFRAME ROUND 3_2

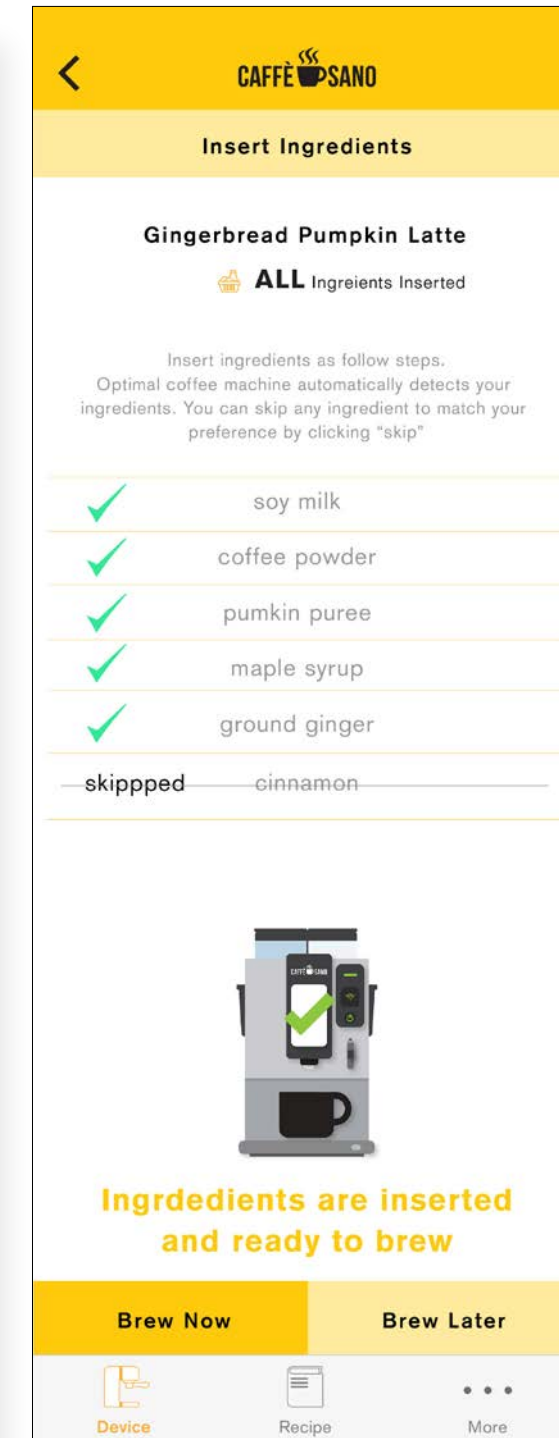

Boring tutorial

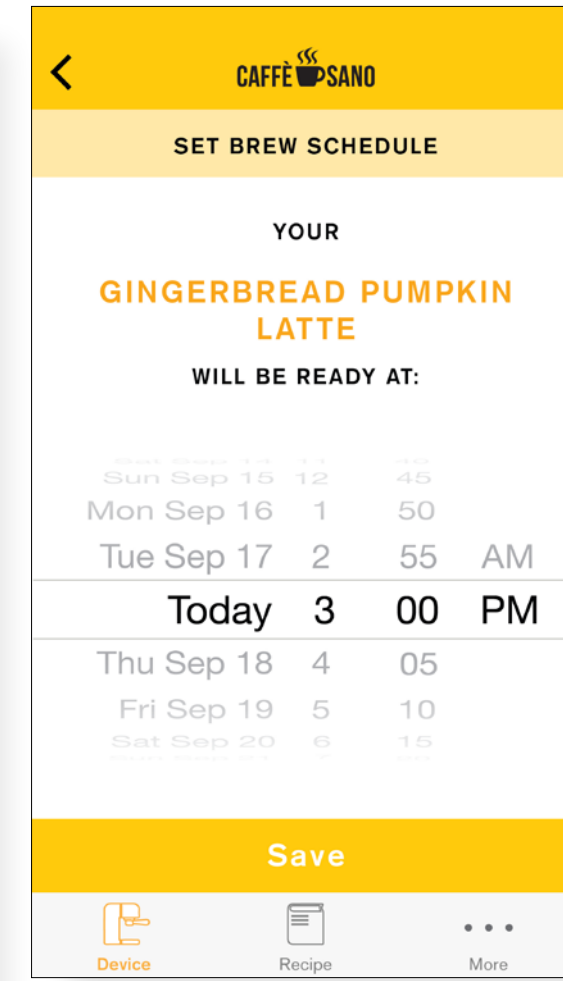

Too much instruction, feel confusing

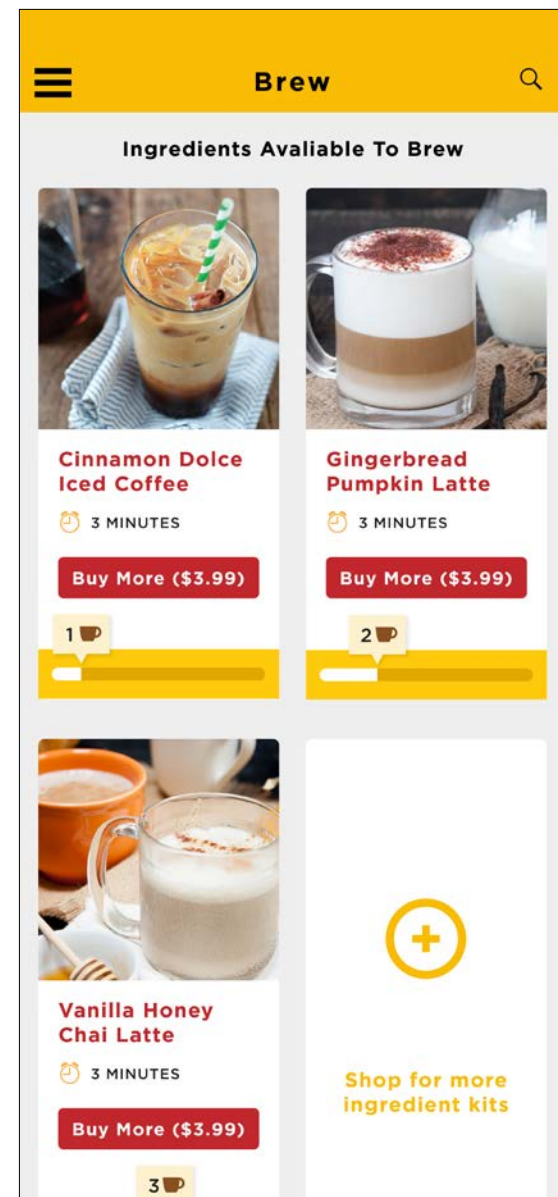

Not so sure about the process yet

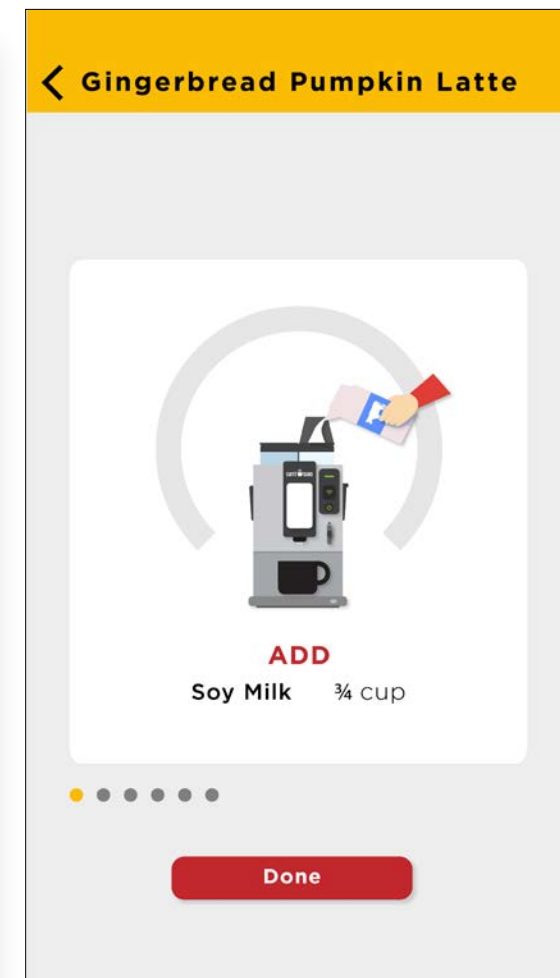

Too much going on

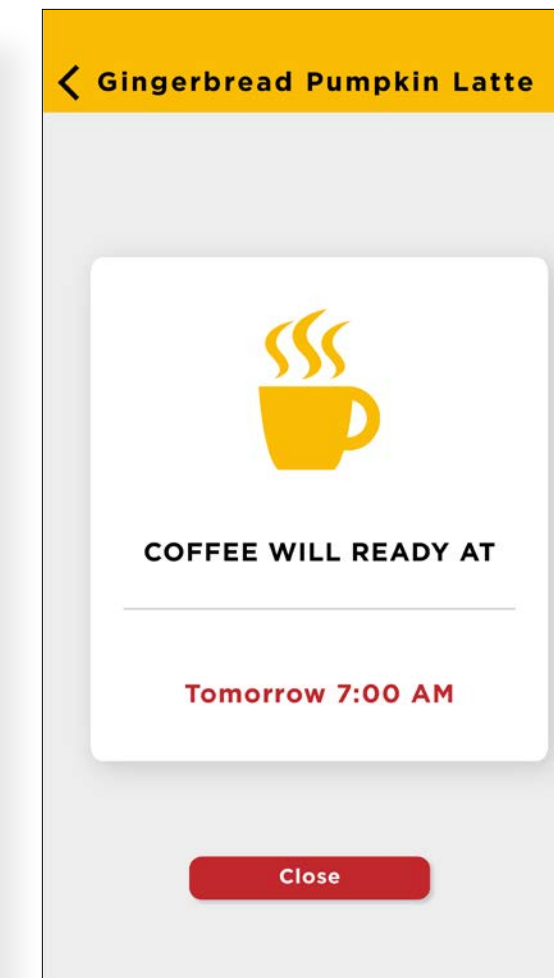

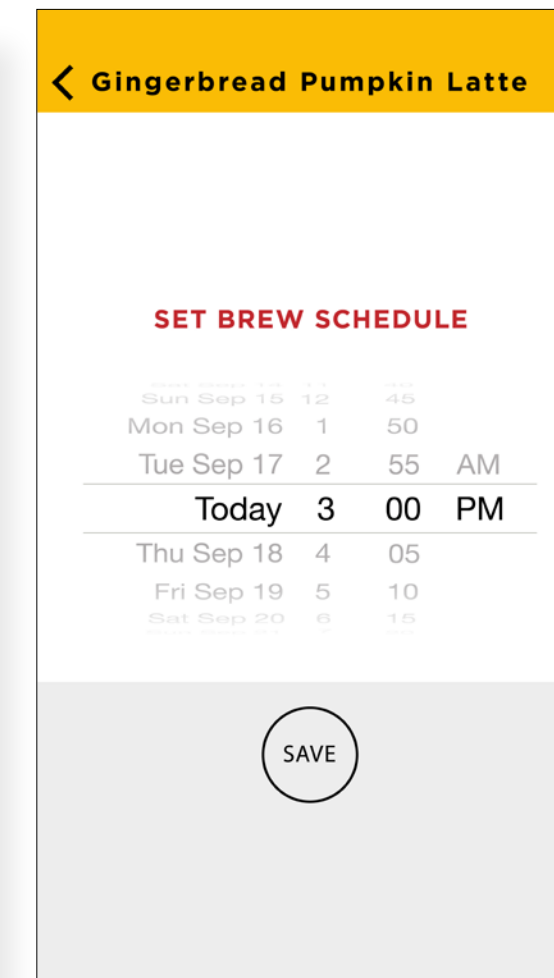

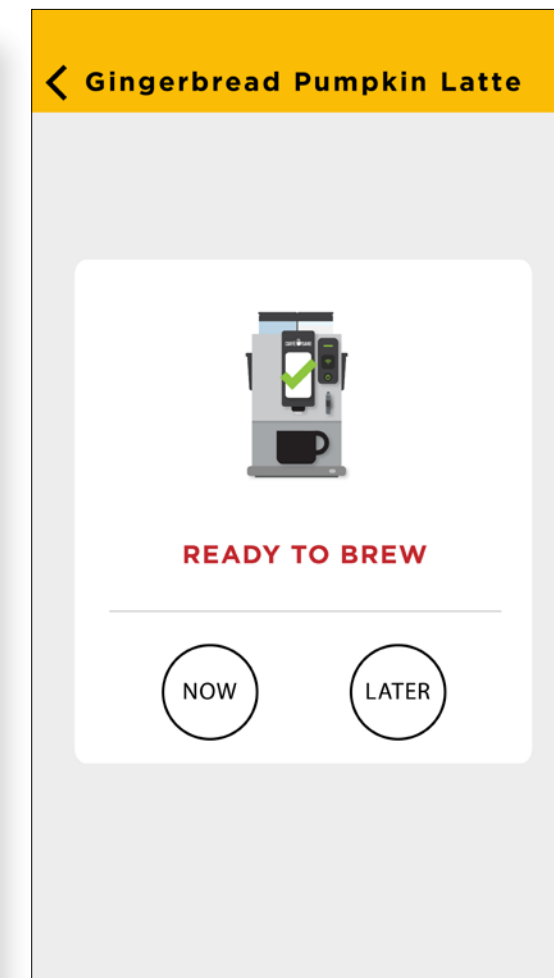

WIREFRAME ROUND 4_1

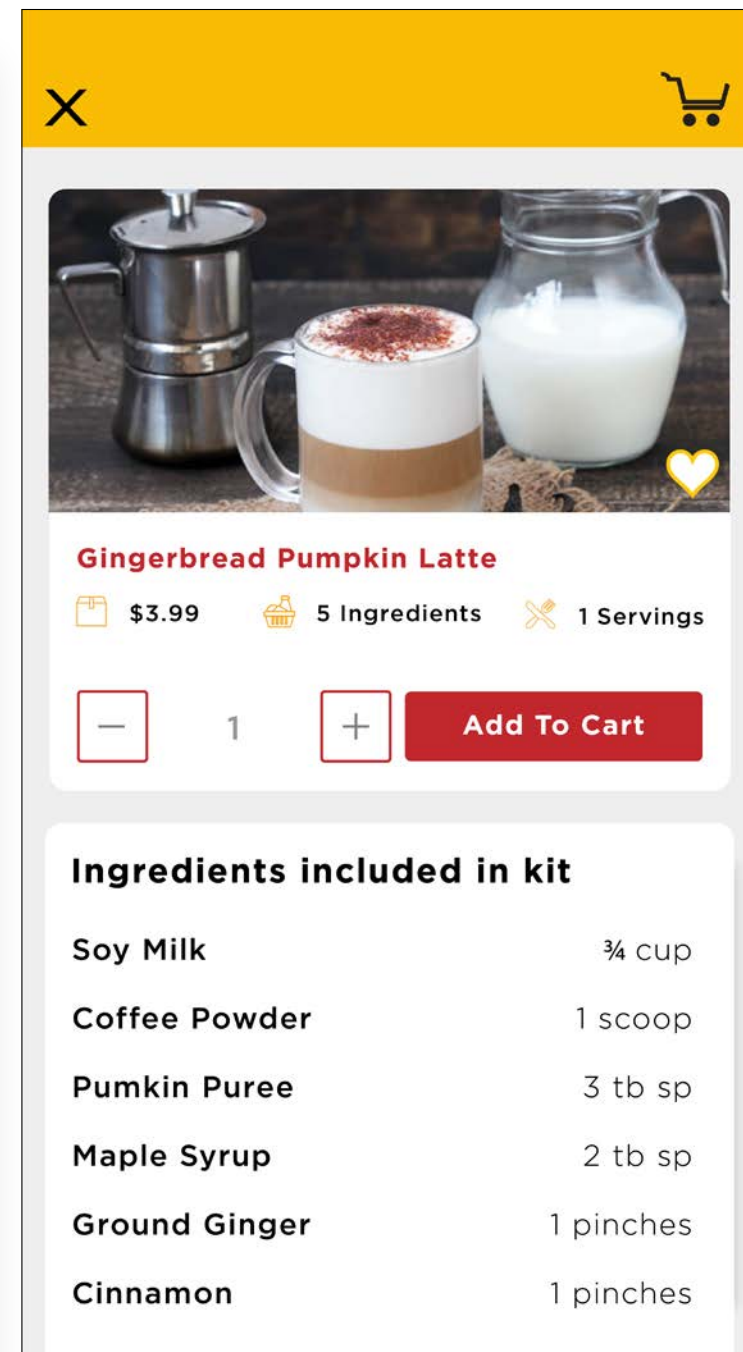

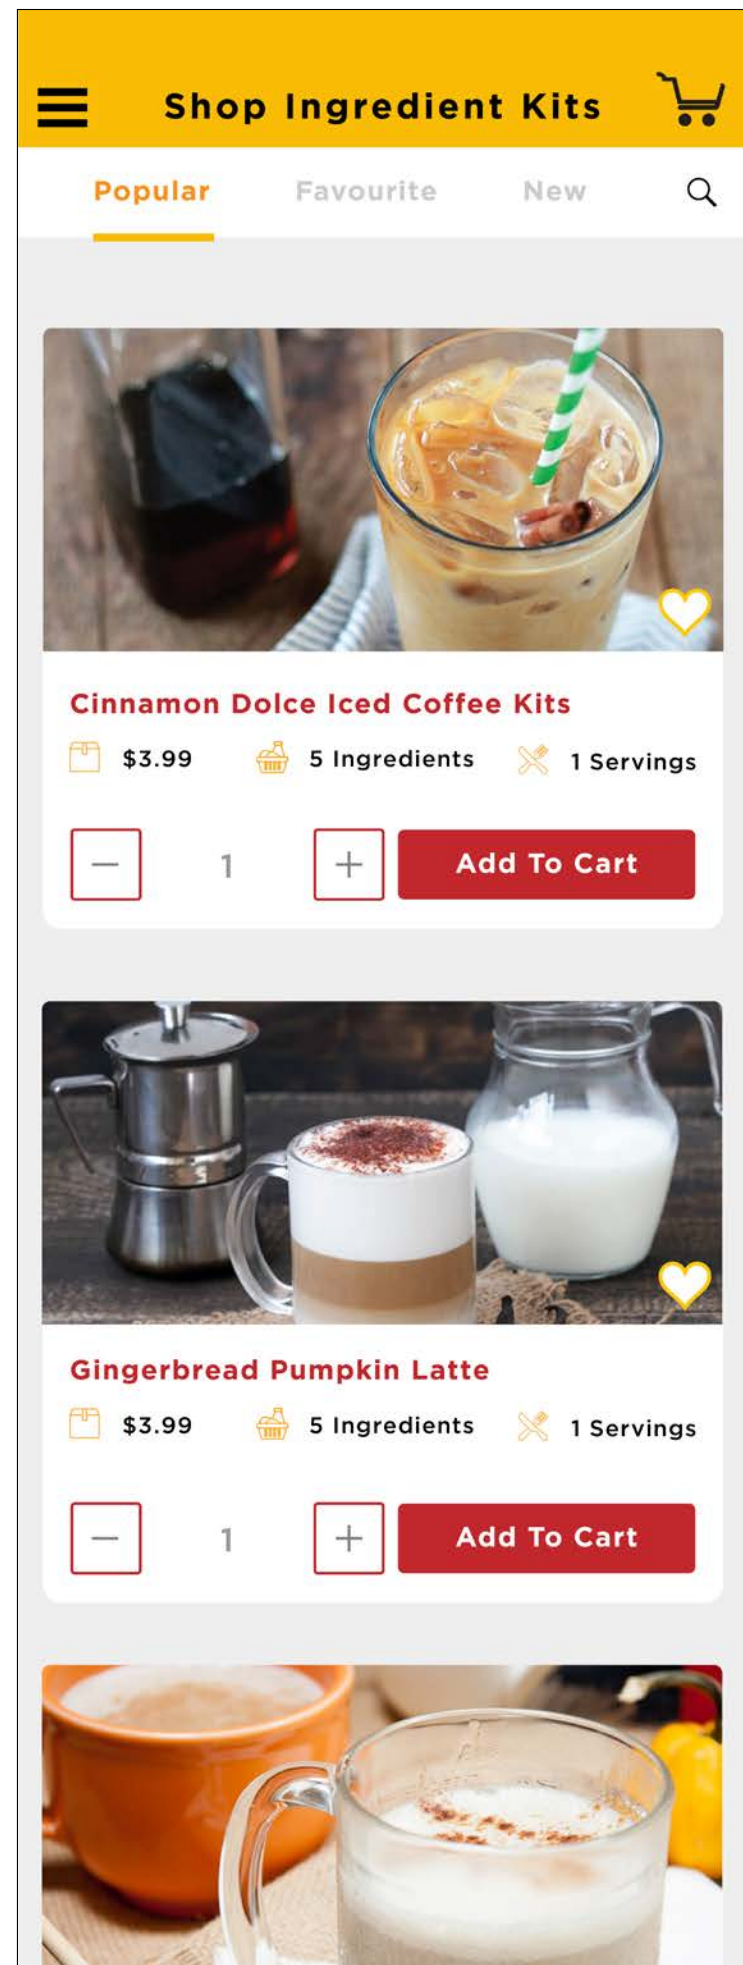

Progress bar hard to read amount

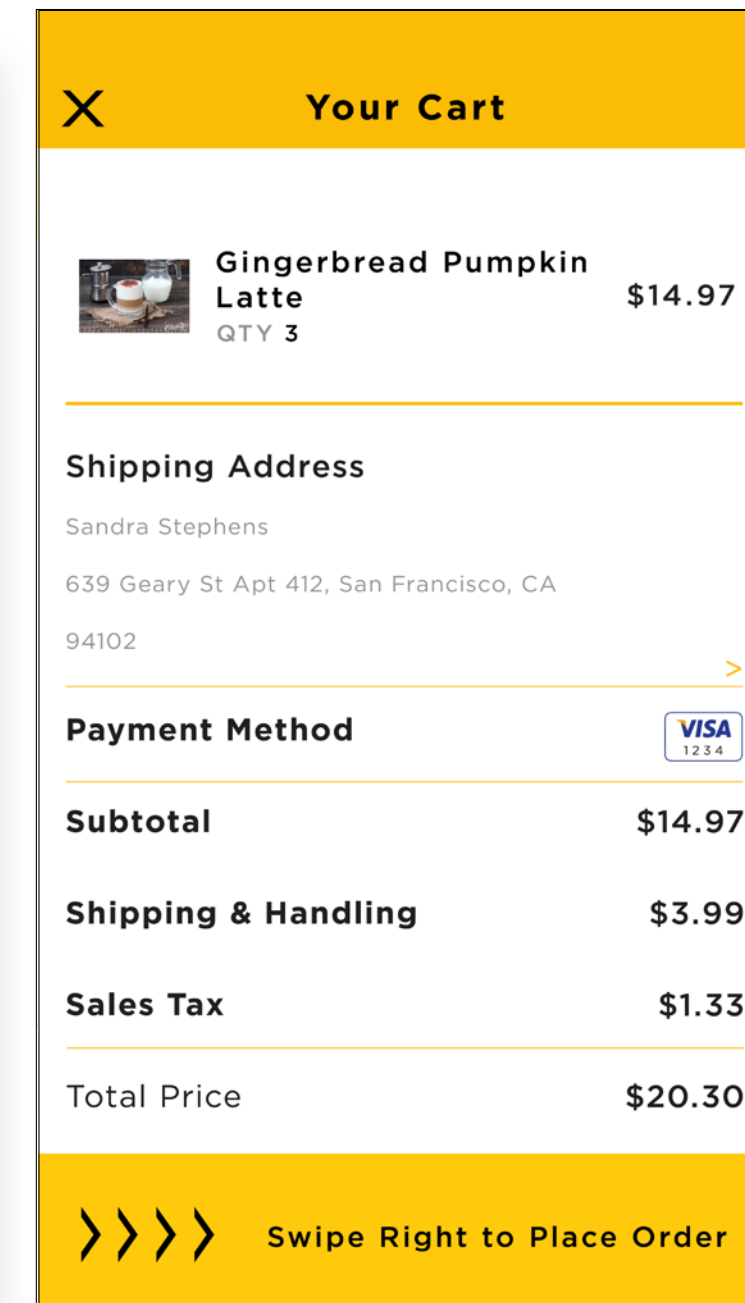

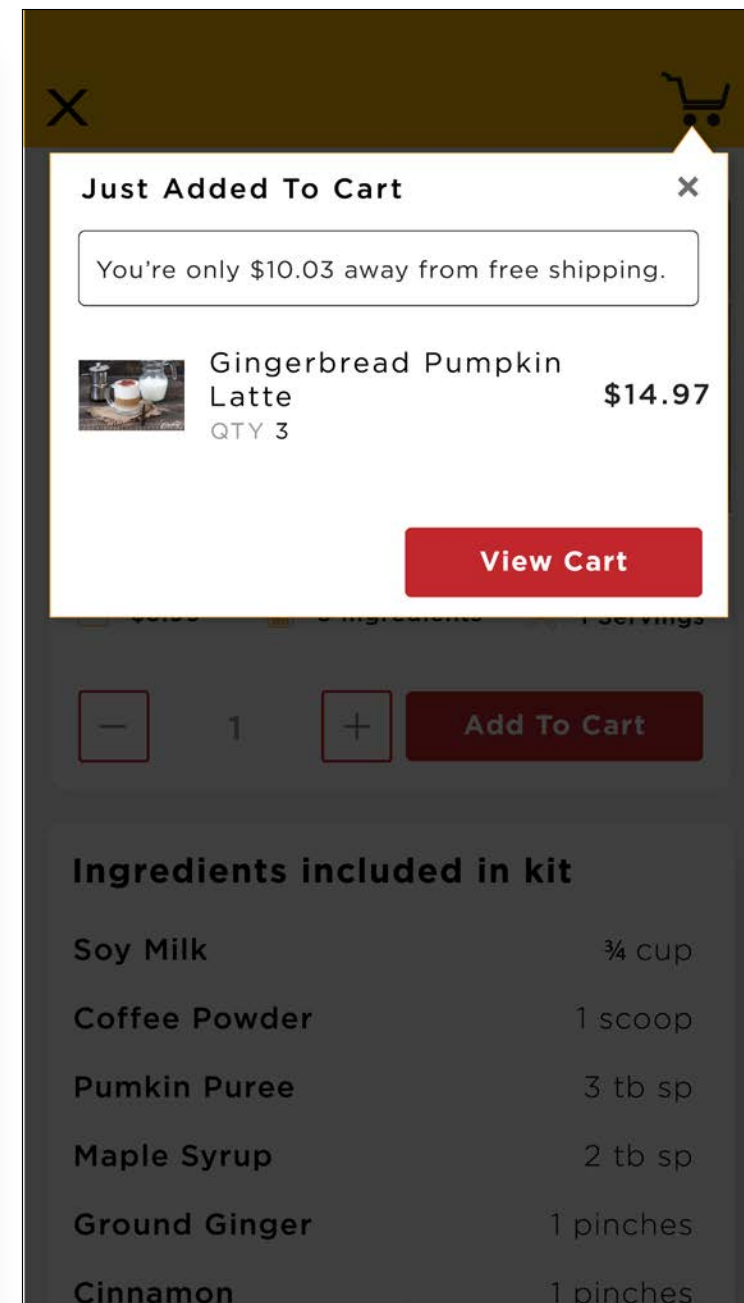

Do not understand add how much

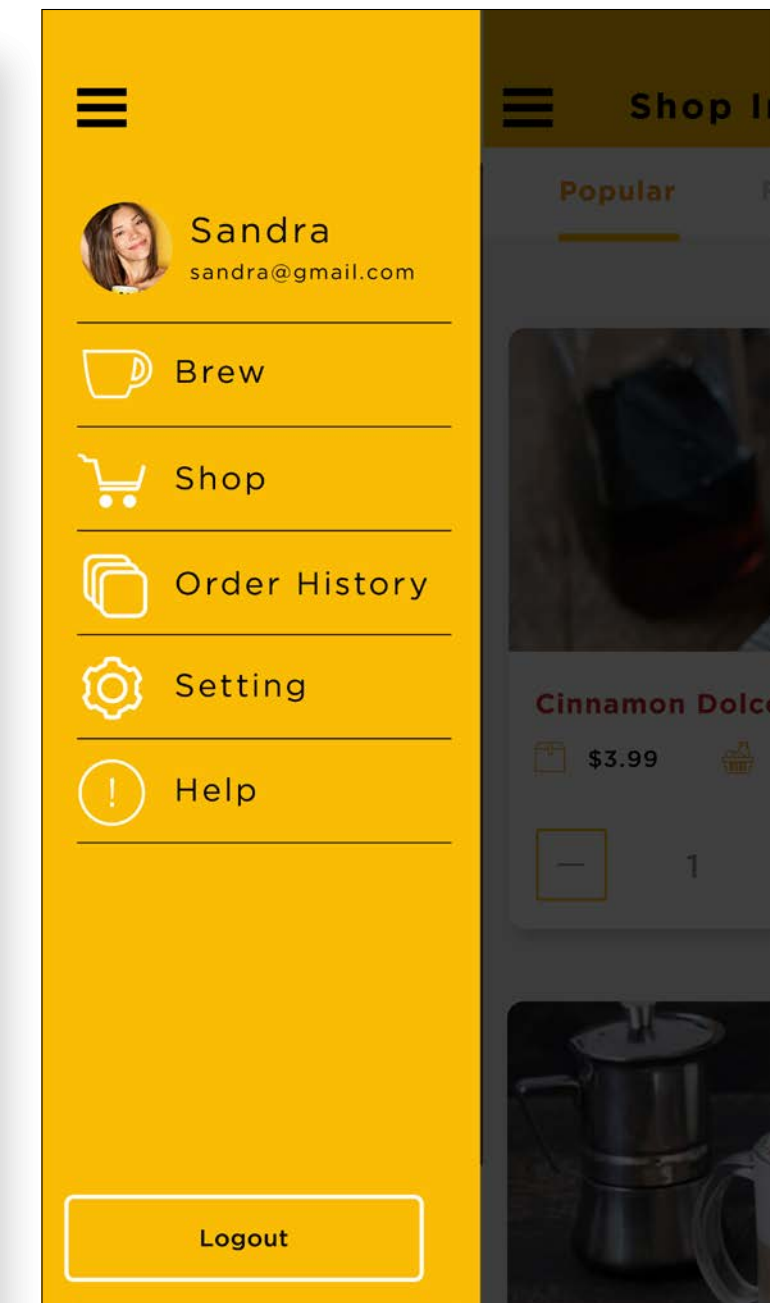

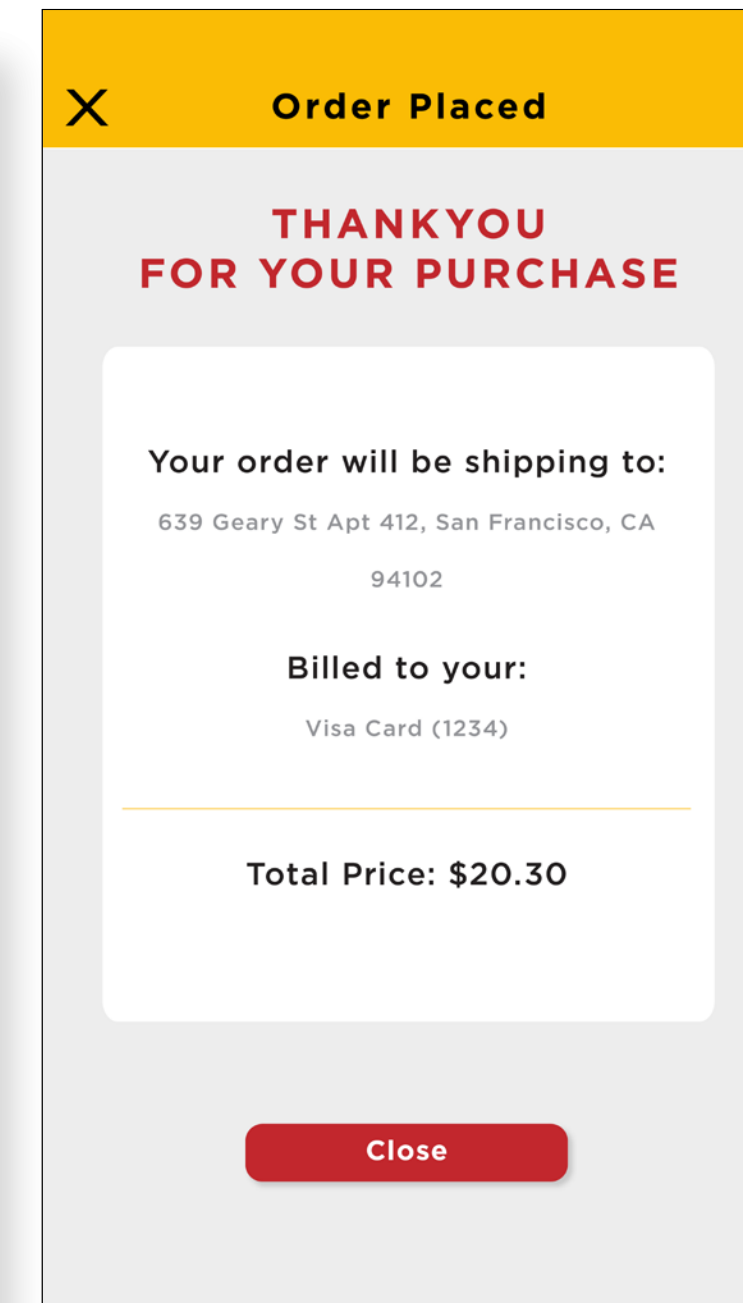

WIREFRAME ROUND 4_2

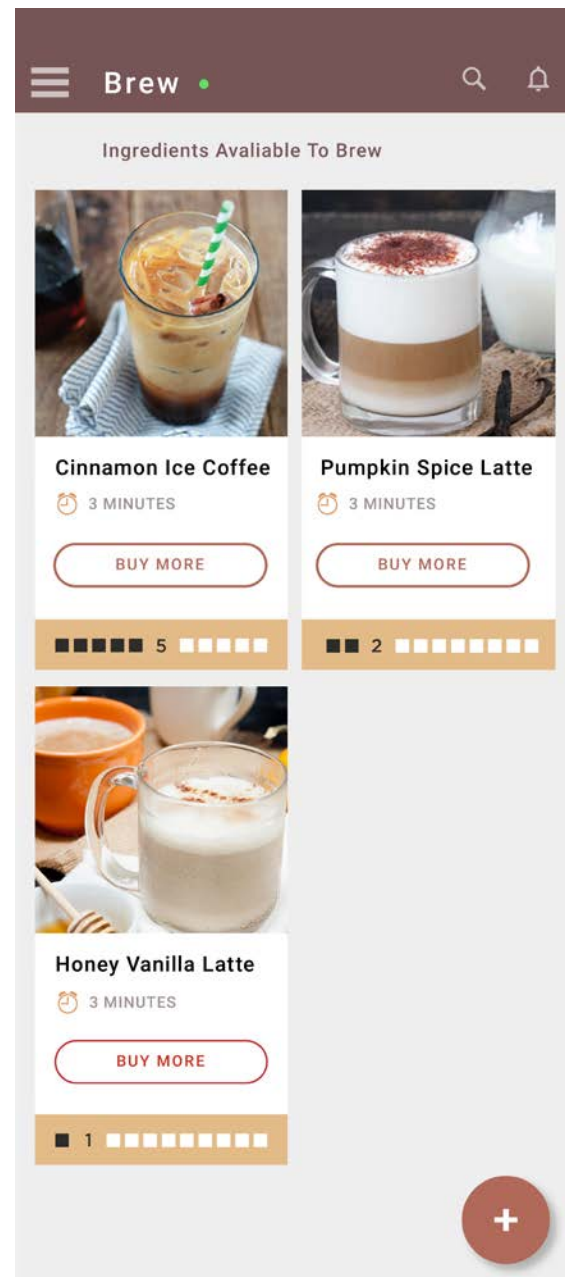

Do not understand add how much

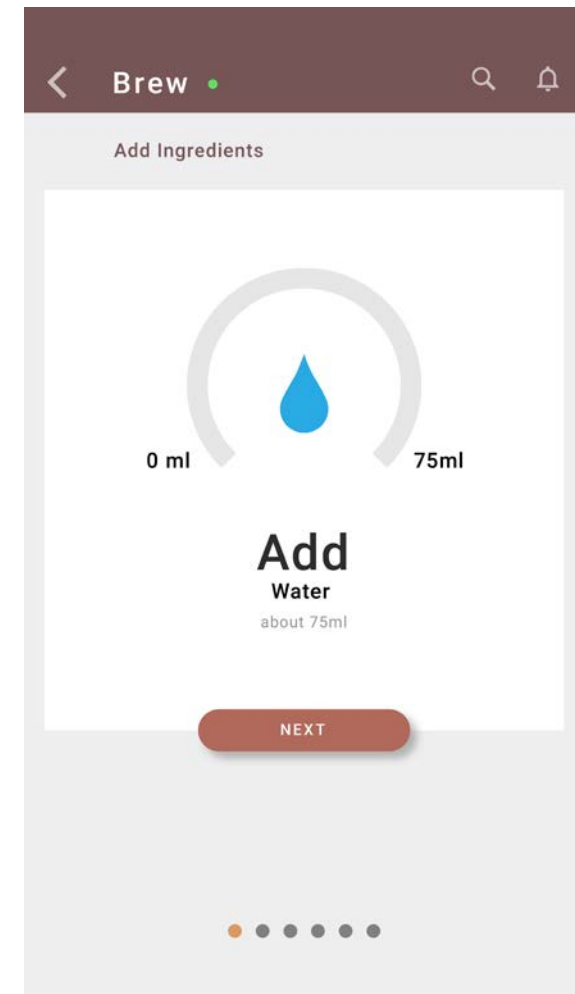

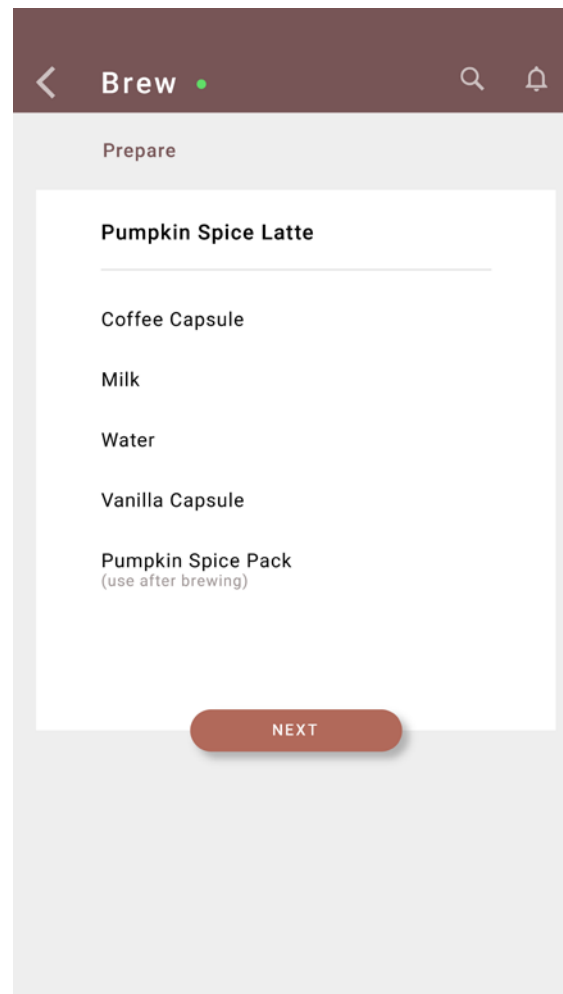

Do not understand about the swipe

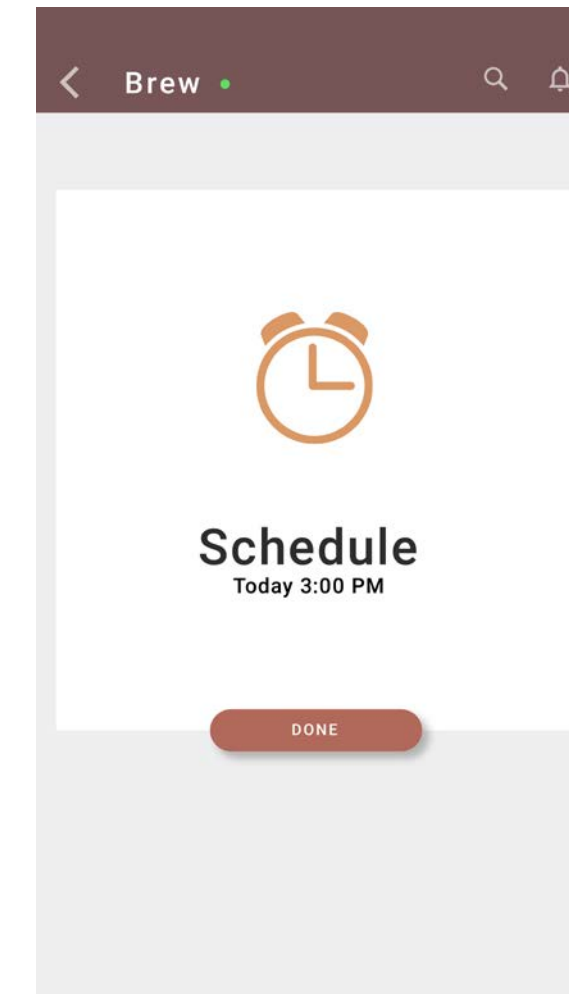

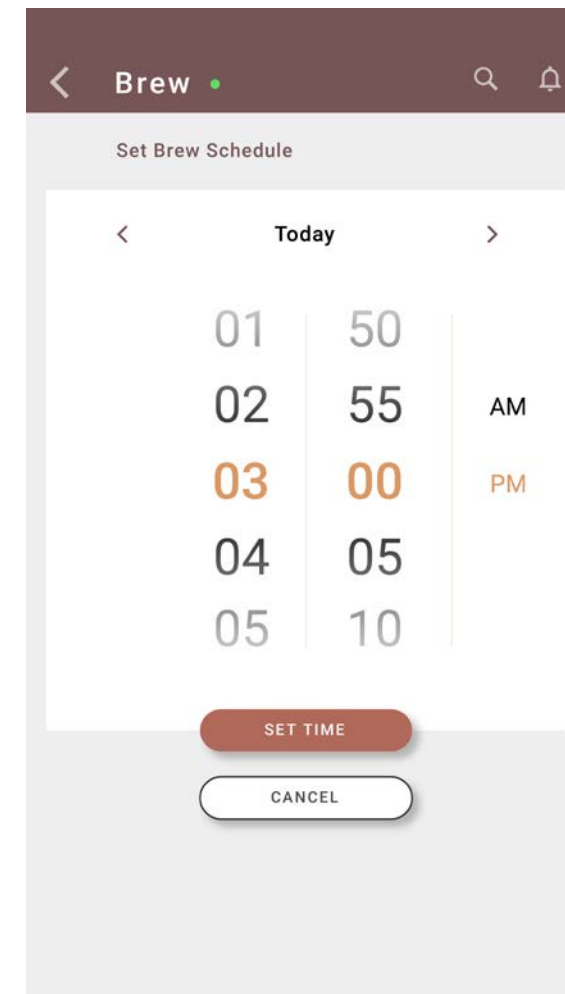

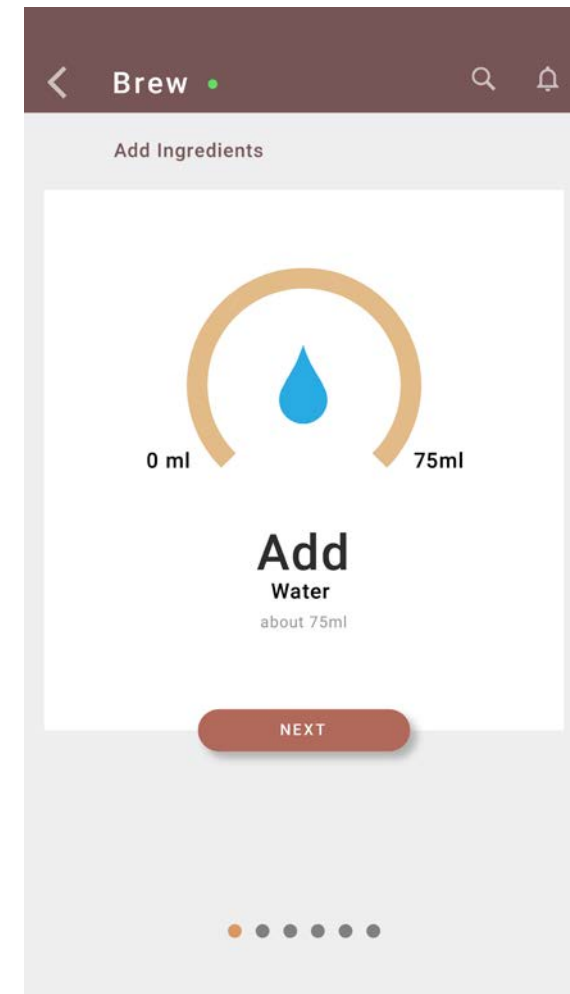

WIREFRAME ROUND 5

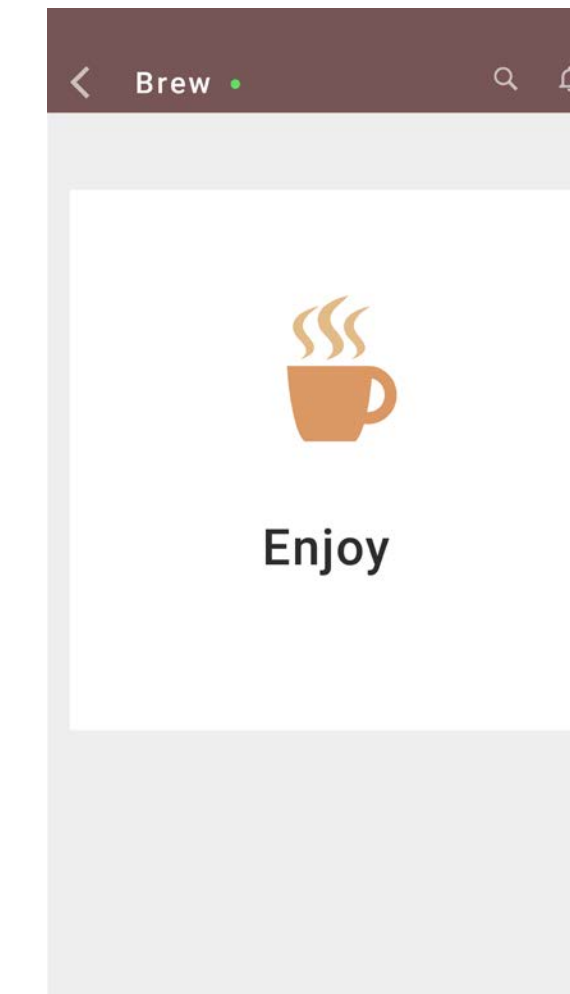

Not enough color contrast

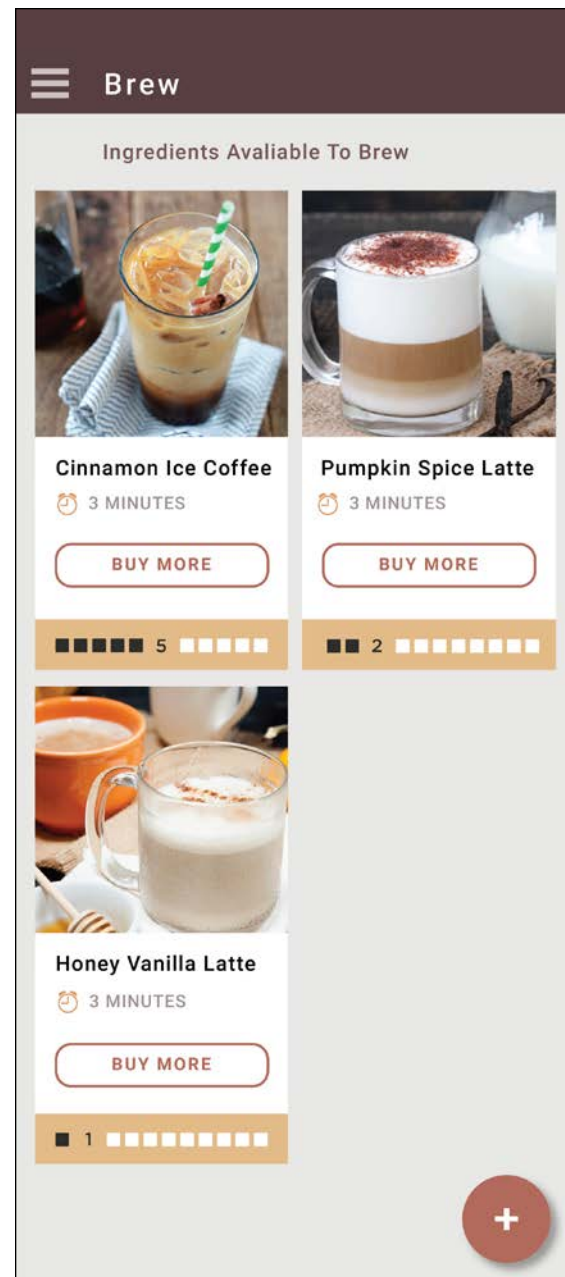

What if combing steps

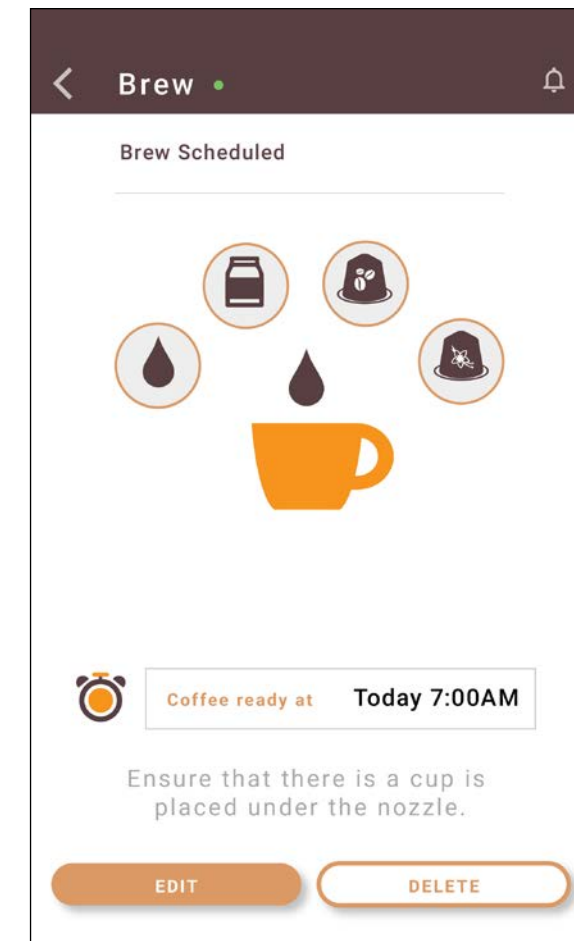

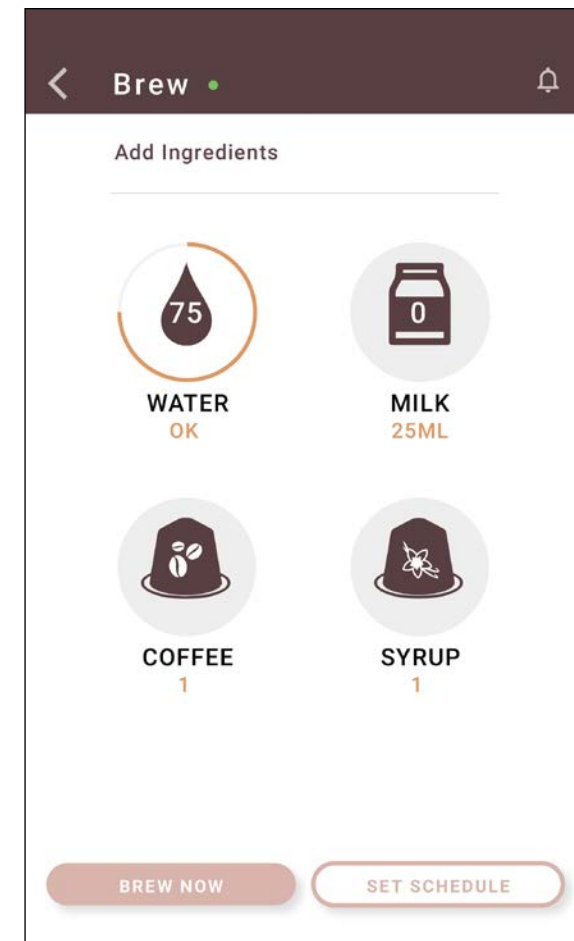

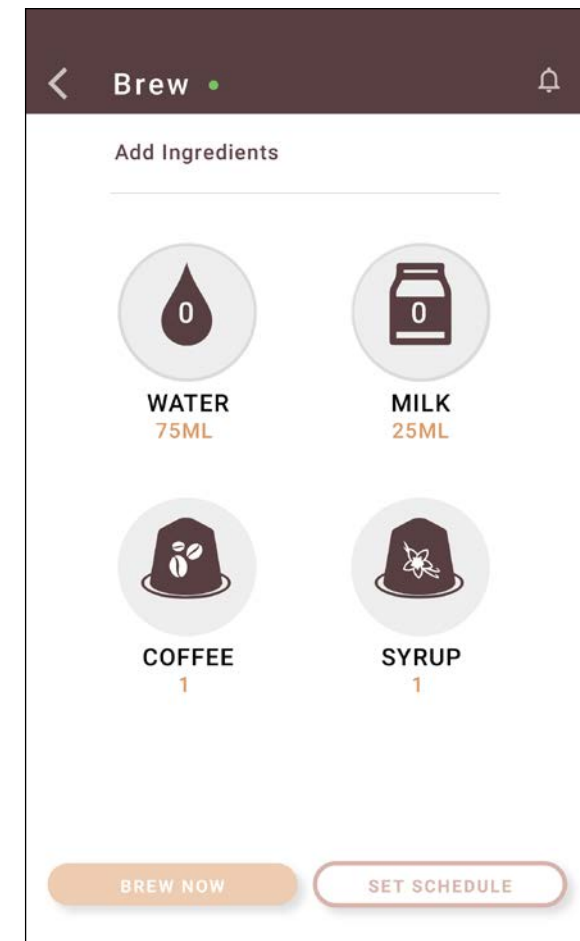

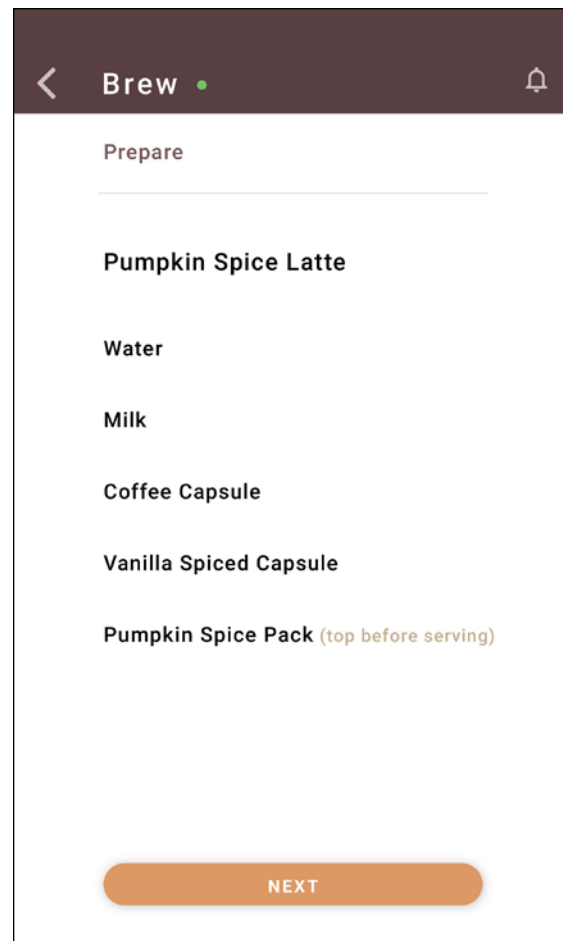

Need more work in icon

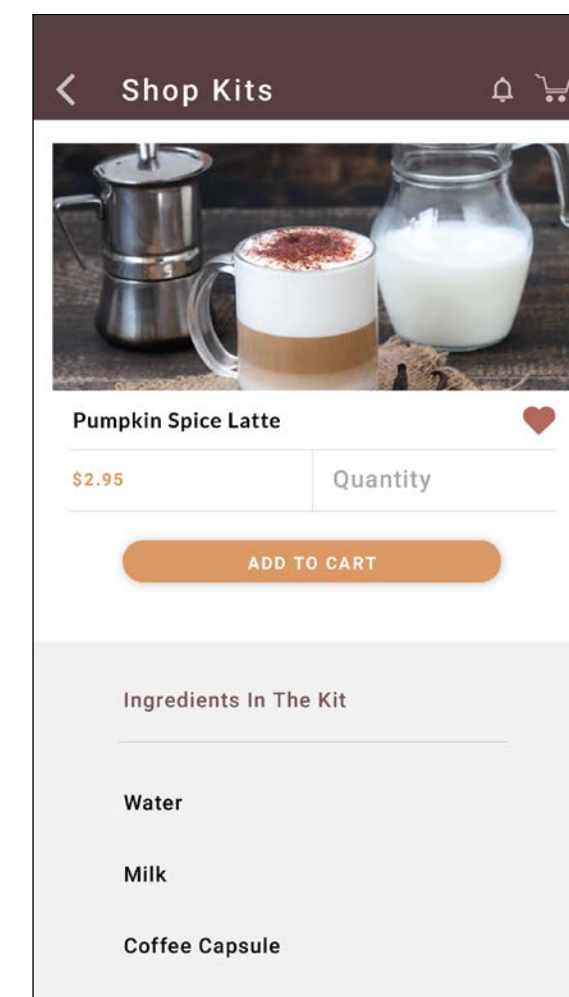

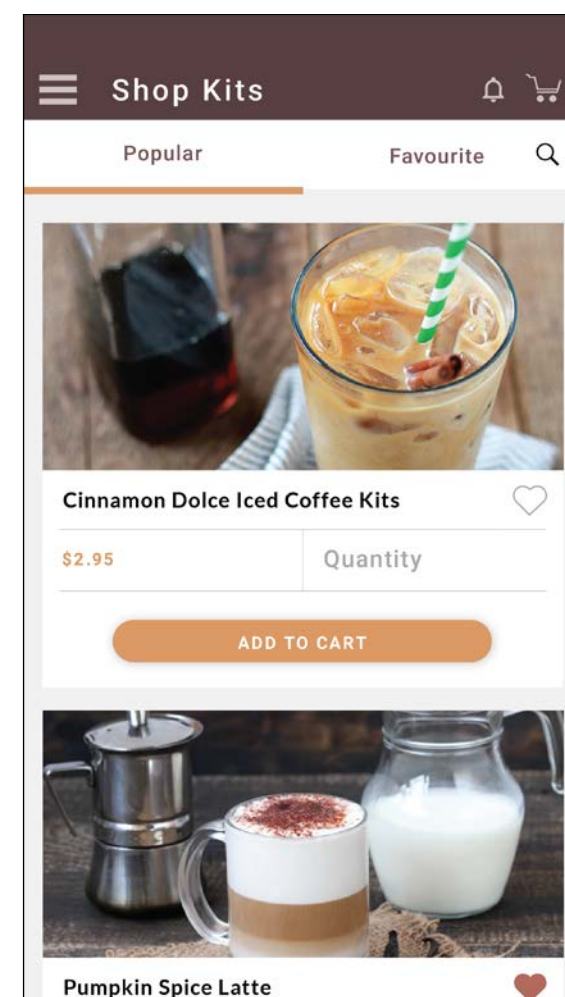

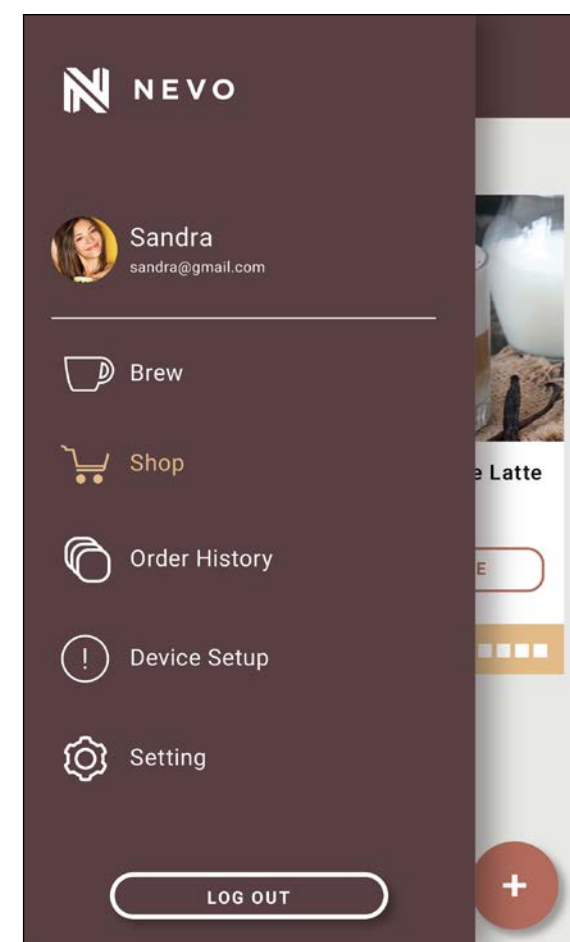

WIREFRAME ROUND 6

Not enough color contrast

Combining steps

TEST RESULTS

1ST ROUND RESULT

- Need to add more white space
- Too crowded layout
- Make button bigger
- Removing background color for product name
- Add favorite icon
- Do not understand what is the “instruction” section meaning
- Removing icon for ingredients

2ND ROUND RESULT

- Need to add more white space
- Too crowded layout
- Using more icon and call to action button
- Use hide and show button for traditional recipe instruction
- Adding indicator for added to cart
- Adding vector instruction for adding ingredients steps
- Changing circle icon to check mark
- Adding more instruction for adding ingredients process

3RD ROUND RESULT

- Changing horizontal layout to vertical card layout
- Adding secondary color
- Adding status bar for “how many cups left” of brewing inventory
- Added “buy more” button for instant shopping
- Splitting up steps into 1 per 1 page
- Adding interactive animation/process

4TH ROUND RESULT

- Changing new color scheme to softer color palette
- Reducing color contrast
- Using icon to represent ingredients
- Changing timer layout
- Changing status bar to thumbnails

5TH ROUND RESULT

- Darken color scheme to increase contrast slightly
- Combining ingredients into 1 page
- Avoid too much flipping pages
- Adding segment control tab
- Adding secondary instruction/reminder/captions on some pages

UI DESIGN : BREW

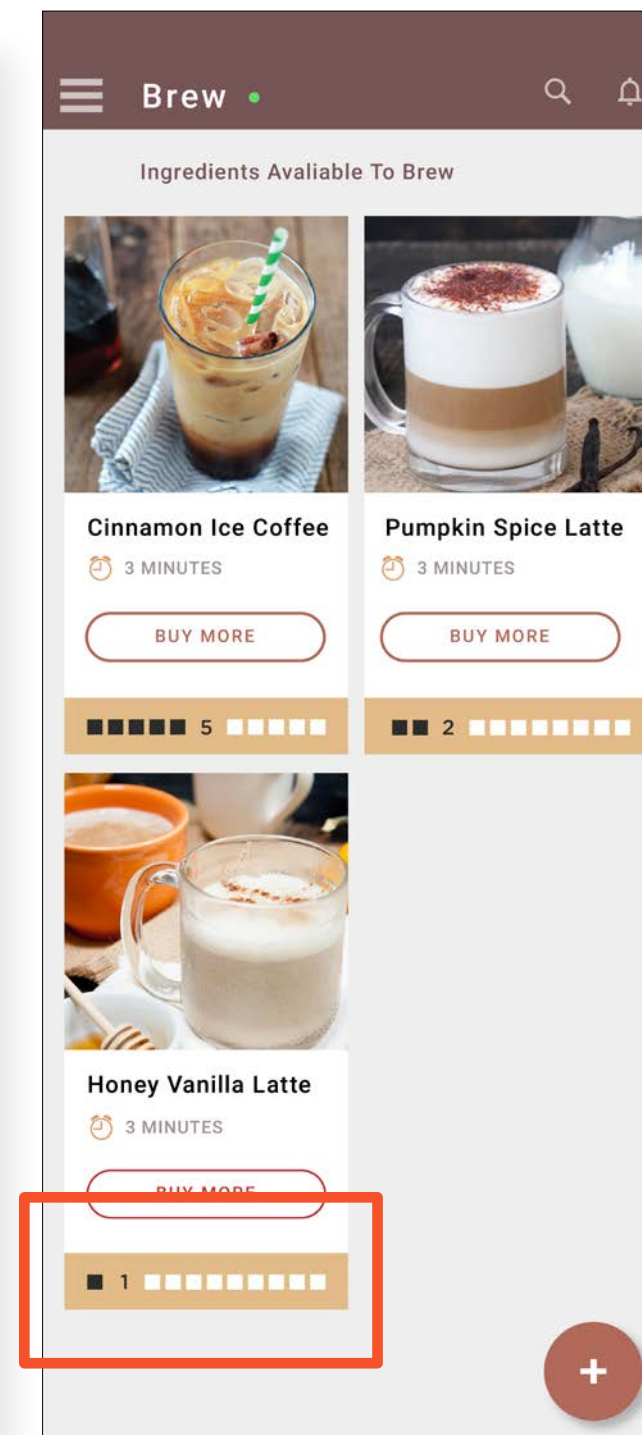

Adding white spaces between elements

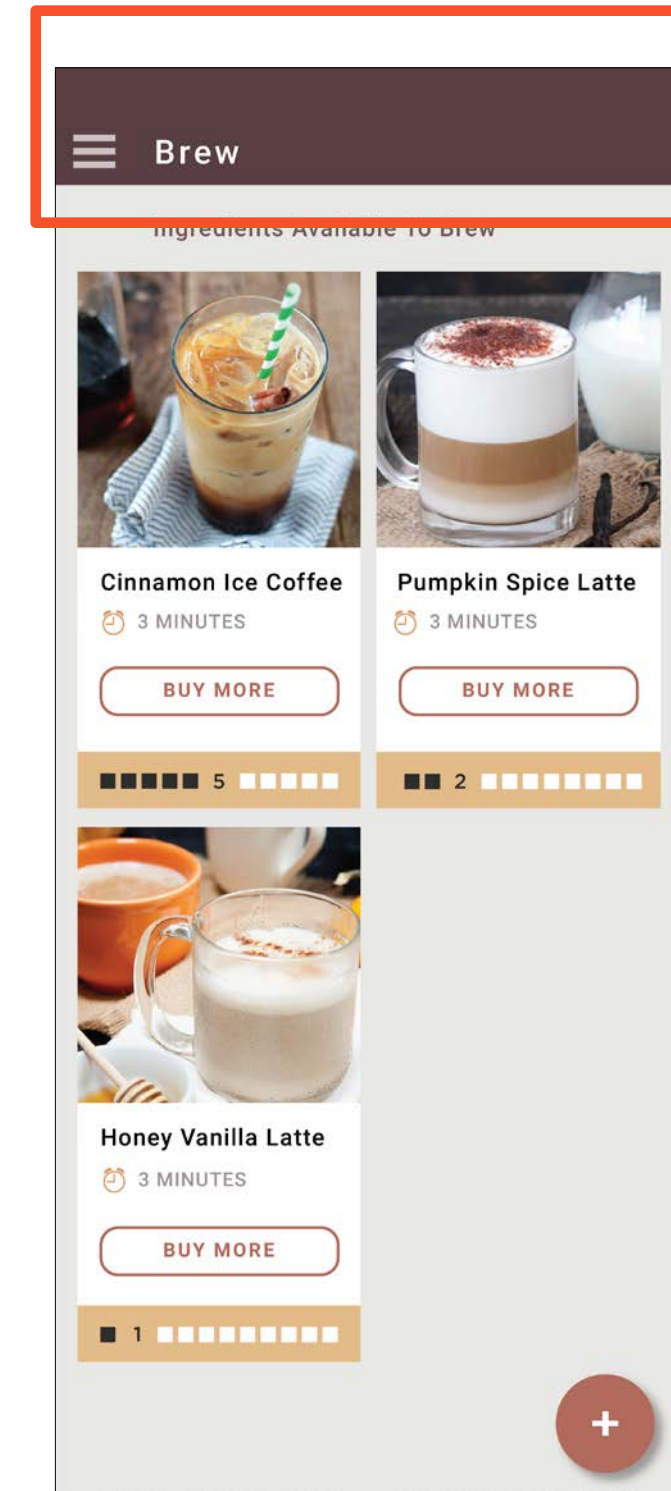

Using icon to simplify interface

- Change to vertical layout
- Adding instruction on the top
- Adding "number of cups left" progress

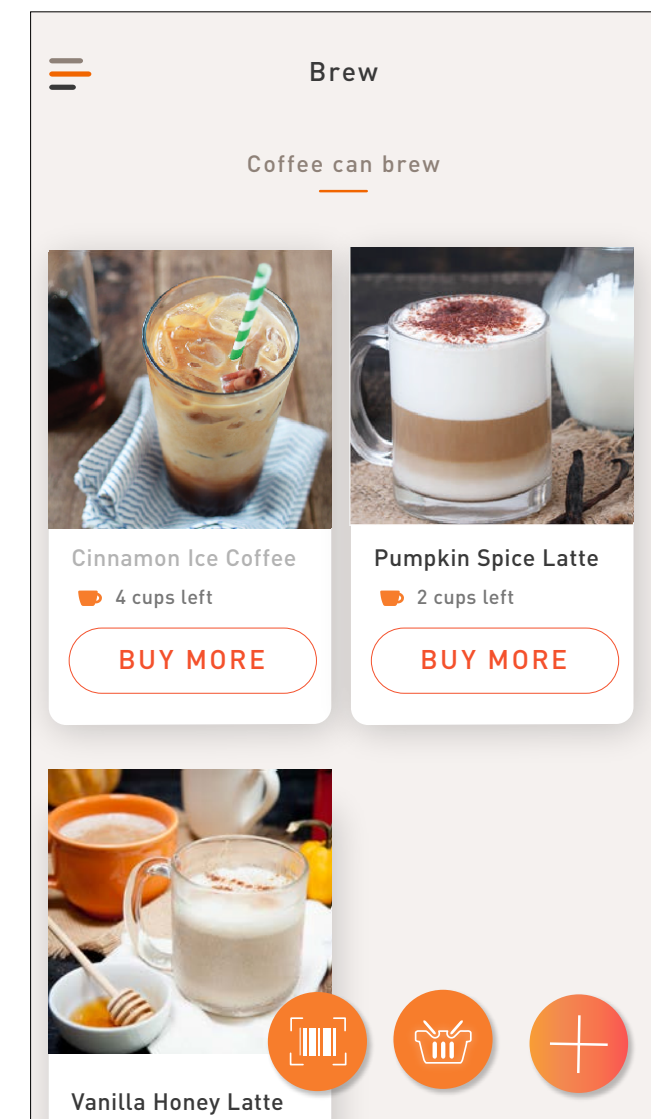

- Changing color scheme
- Changing the "number of cups left" to thumbnail display

- Trying to a new darker header

FINAL

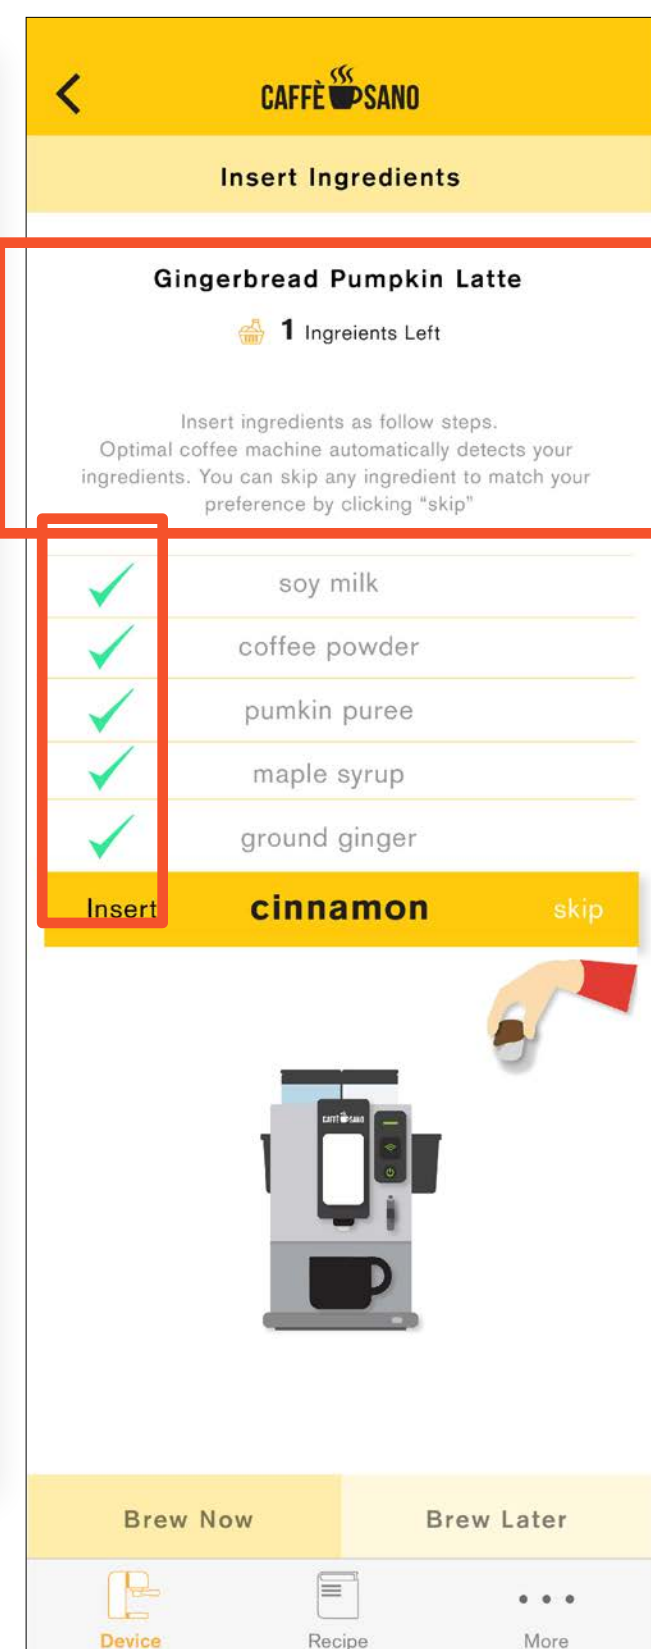

- Changing whole color scheme to a more energetic color
- Main text center alignment
- Bigger button size
- Changing "number of cups left" into text display for more clear understanding
- Adding shadow to card design

UI DESIGN : ADD

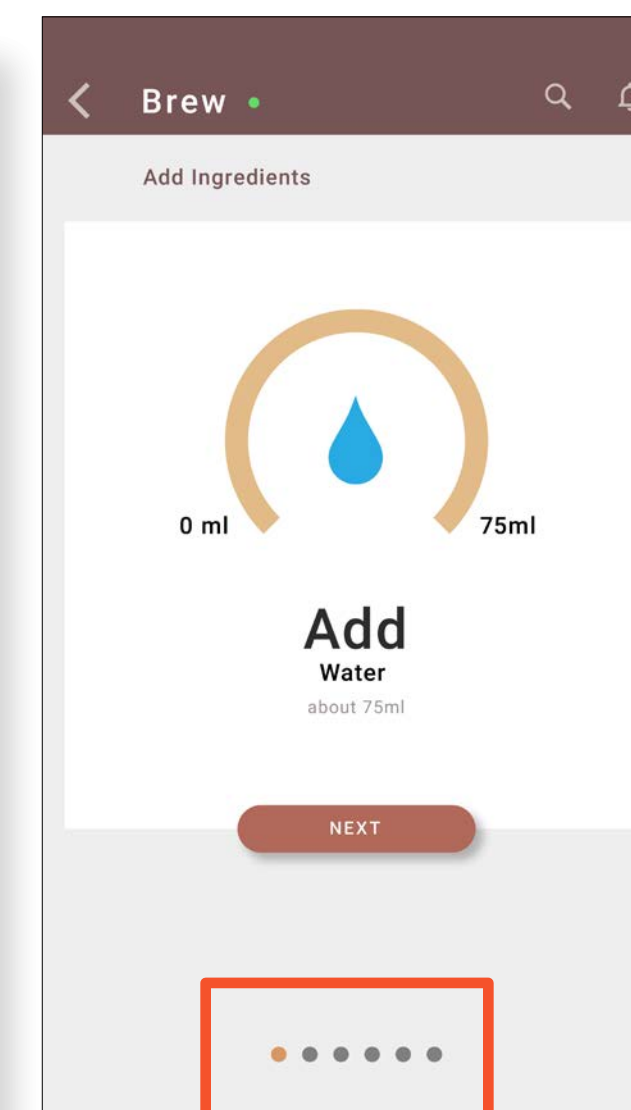

Change the adding steps into text only list
Cleaner design

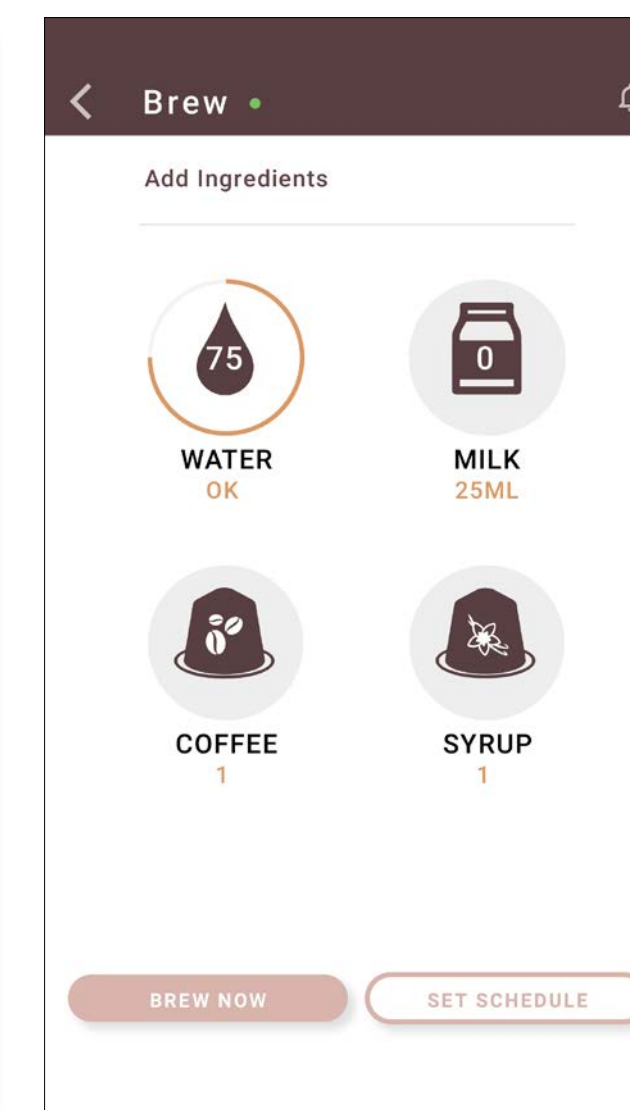

- Adding more instruction
- Changing the circle icon into a check-mark

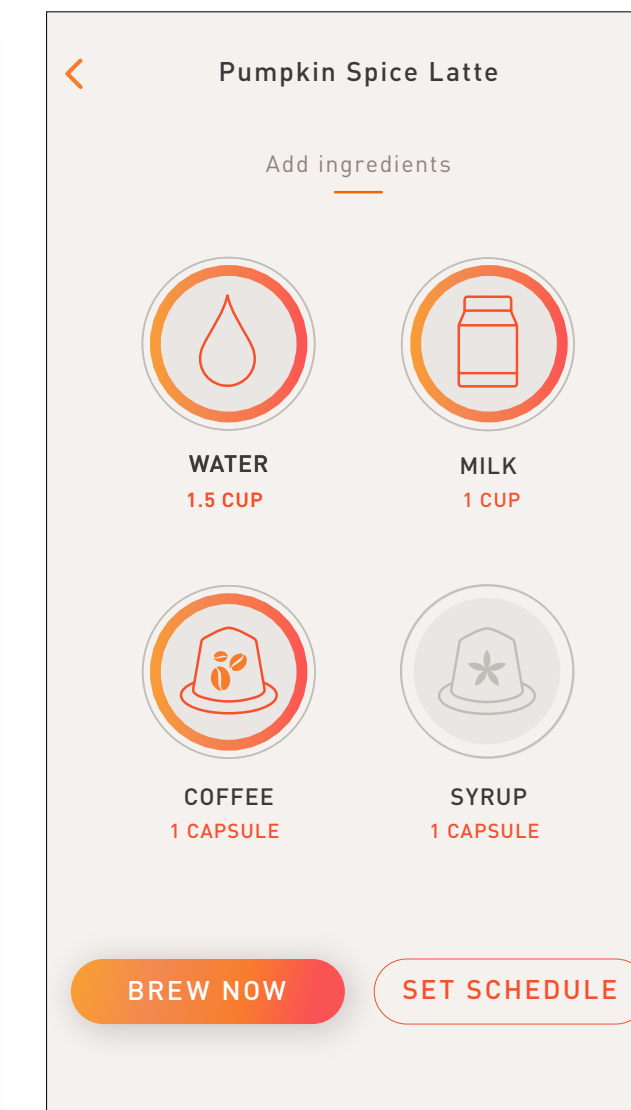

- Changing the adding steps into 1 step per page
- Adding the adding progress bar

- Changing the illustration to icon
- Moving the steps thumbnails dot into center

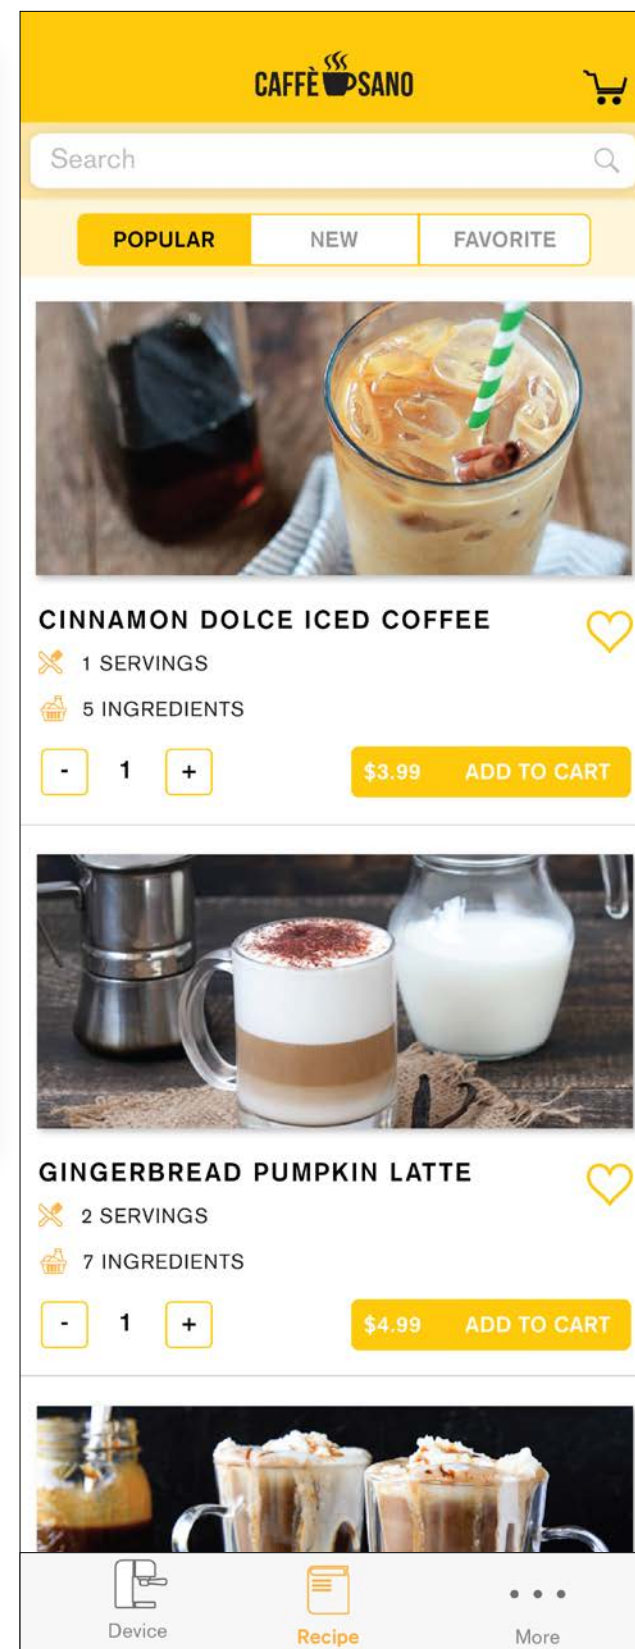

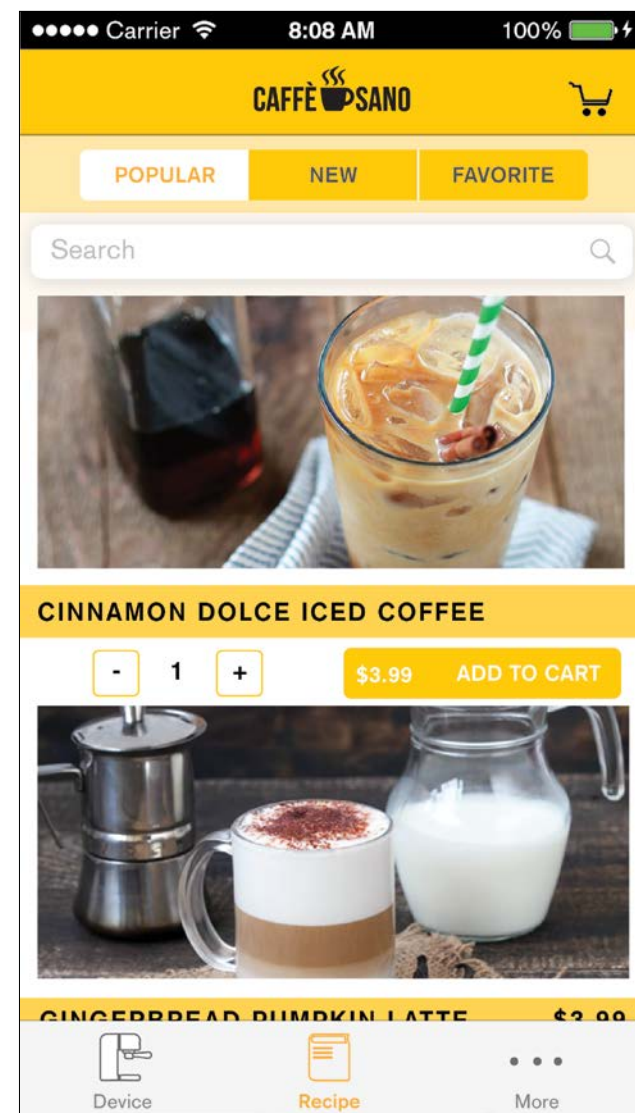

- Combining all steps into 1 page

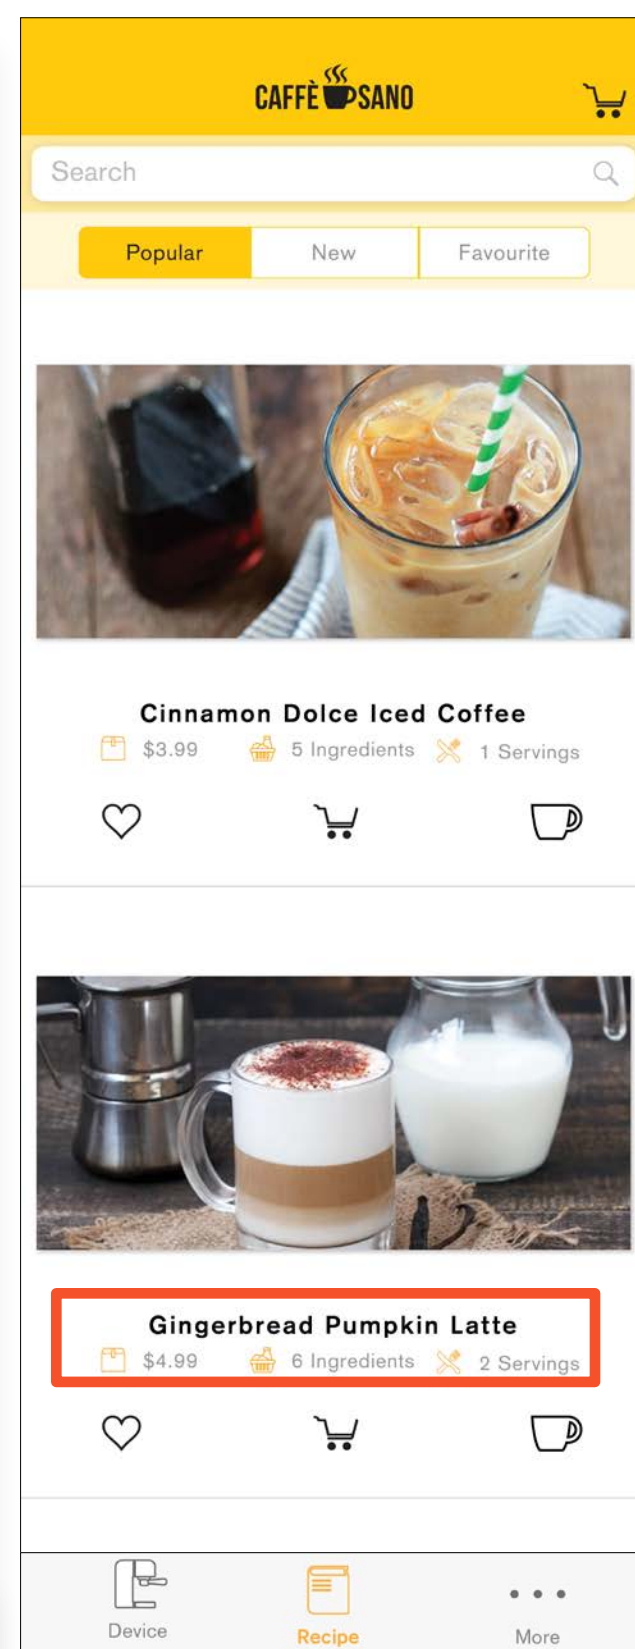

- Changing whole color scheme to a more energetic color
- Main text center alignment
- Bigger button size

FINAL

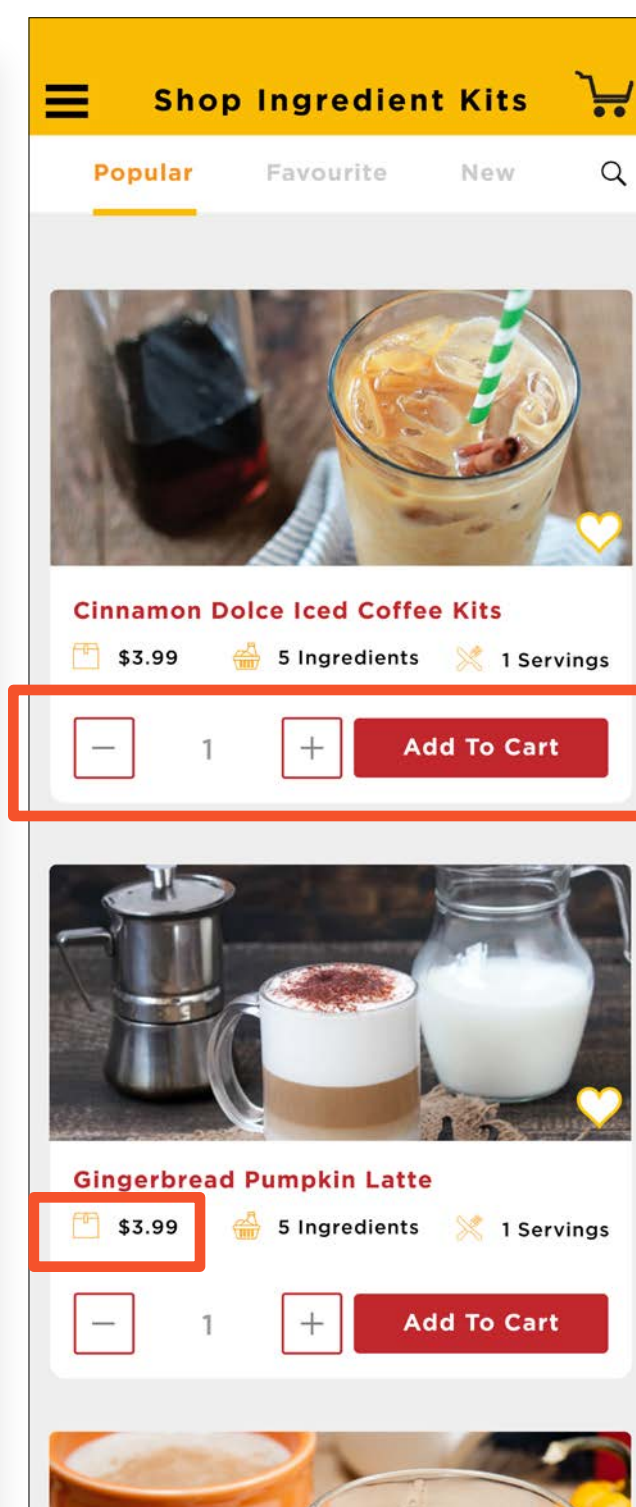

UI DESIGN : SHOP

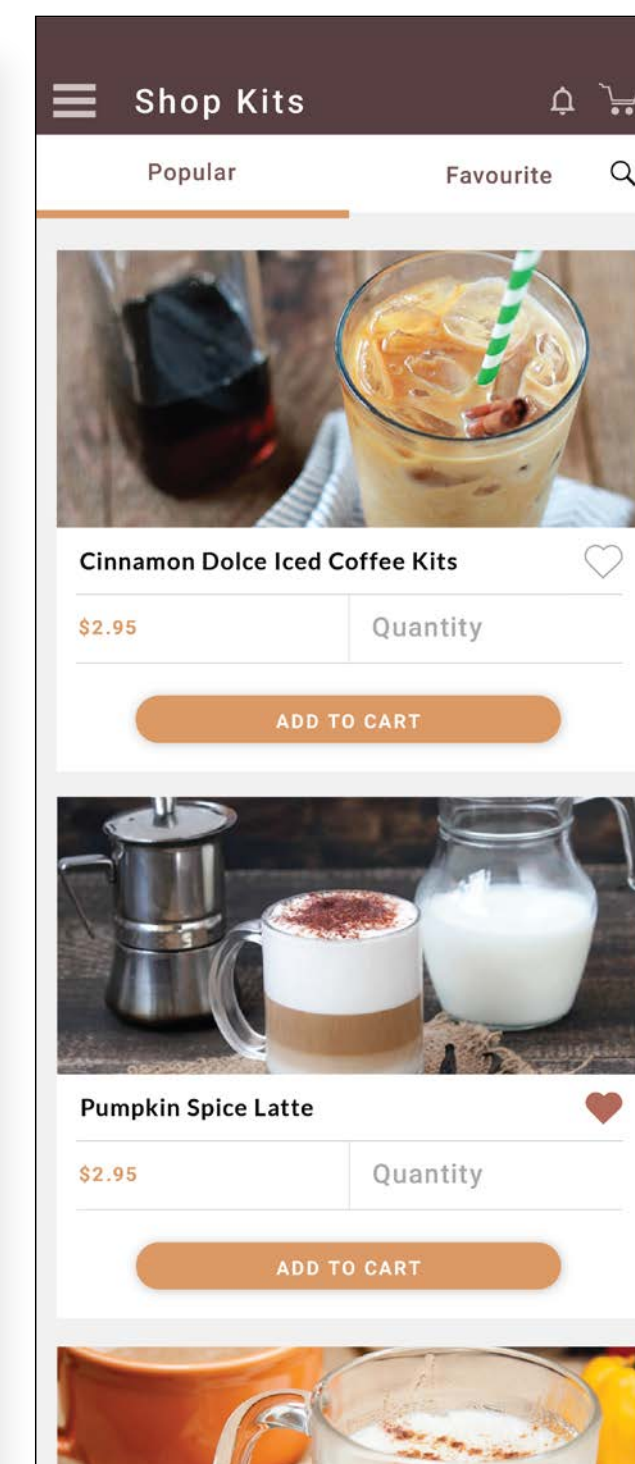

Adding white spaces between elements

Using icon to simplify interface

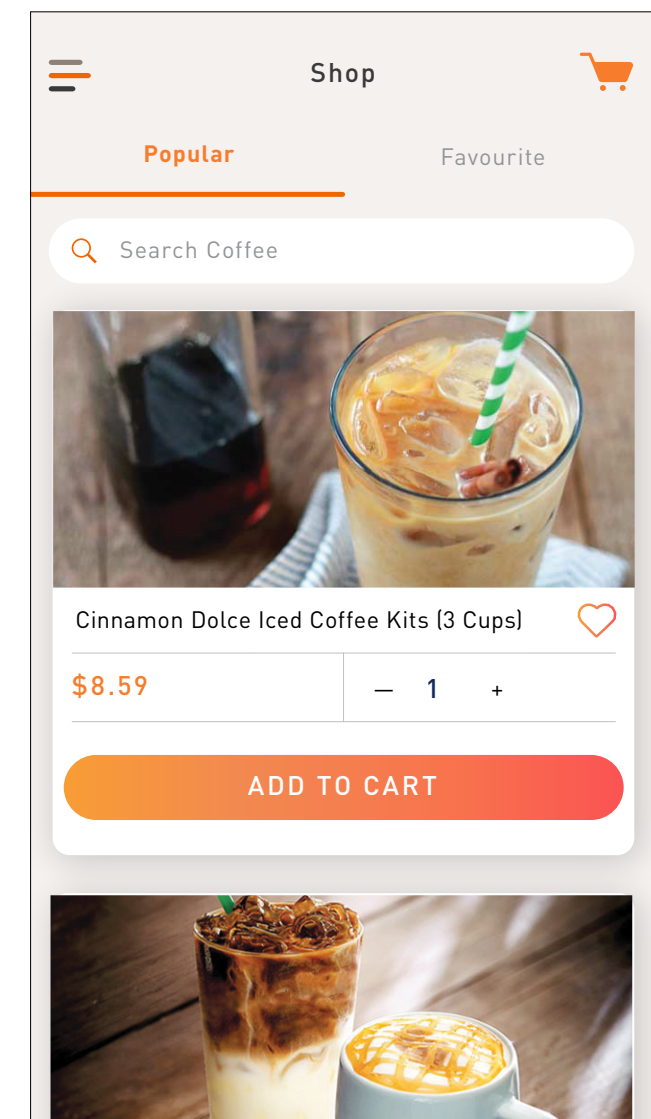

- Changing the color of price to black
- Bigger and more attractive button color

- Changing color scheme
- A cleaner layout

FINAL

- Changing whole color scheme to a more energetic color
- Bigger button
- Change Cart icon
- Change Menu icon

USABILITY TEST 3 SUMMARY

FEEDBACK

- Login before browsing?
- More information/ads to attract people to sign in
- Title under image clickable to avoid wrong pressing
- "view recipe" is too subtle, not even noticable
- Free shipping
- More attractive sentence to attract user to purchase the coffee maker
- Too much information in one page (product detail page)
- All caps is hard to read, too much all caps
- Background dimming on add to cart
- insert ingredients tutorial need more work
- Each ingredient to be insert need more work
- What if want to skip any one ingredients

REFINE

- Edit workflow, allow user to skip signup/login before browsing recipes
- Added discover(walkthrough) pages before login for more information about the app and explain the icon
- Clickable area is refine
- Added "brew with coffee maker 3 mins" and "brew with traditional recipe 10 mins" to:
 - Attract user purchasing coffee maker can be more convenient;
 - Allow user to have a choice brewing between coffee maker and traditional ways;
 - After clicking the traditional recipes will bring user to a new page (avoid too many information in one page, and will only show when user needed)
- Changing case of text in content (less all caps) for readability
- Refine content layout for more white space and hierarchy
- Adding icon for user to process brewing through recipe page, or directly

Introduction (5 min)

喝咖啡的習慣 / 取得咖啡材料的習慣 / 希望取得咖啡的途徑

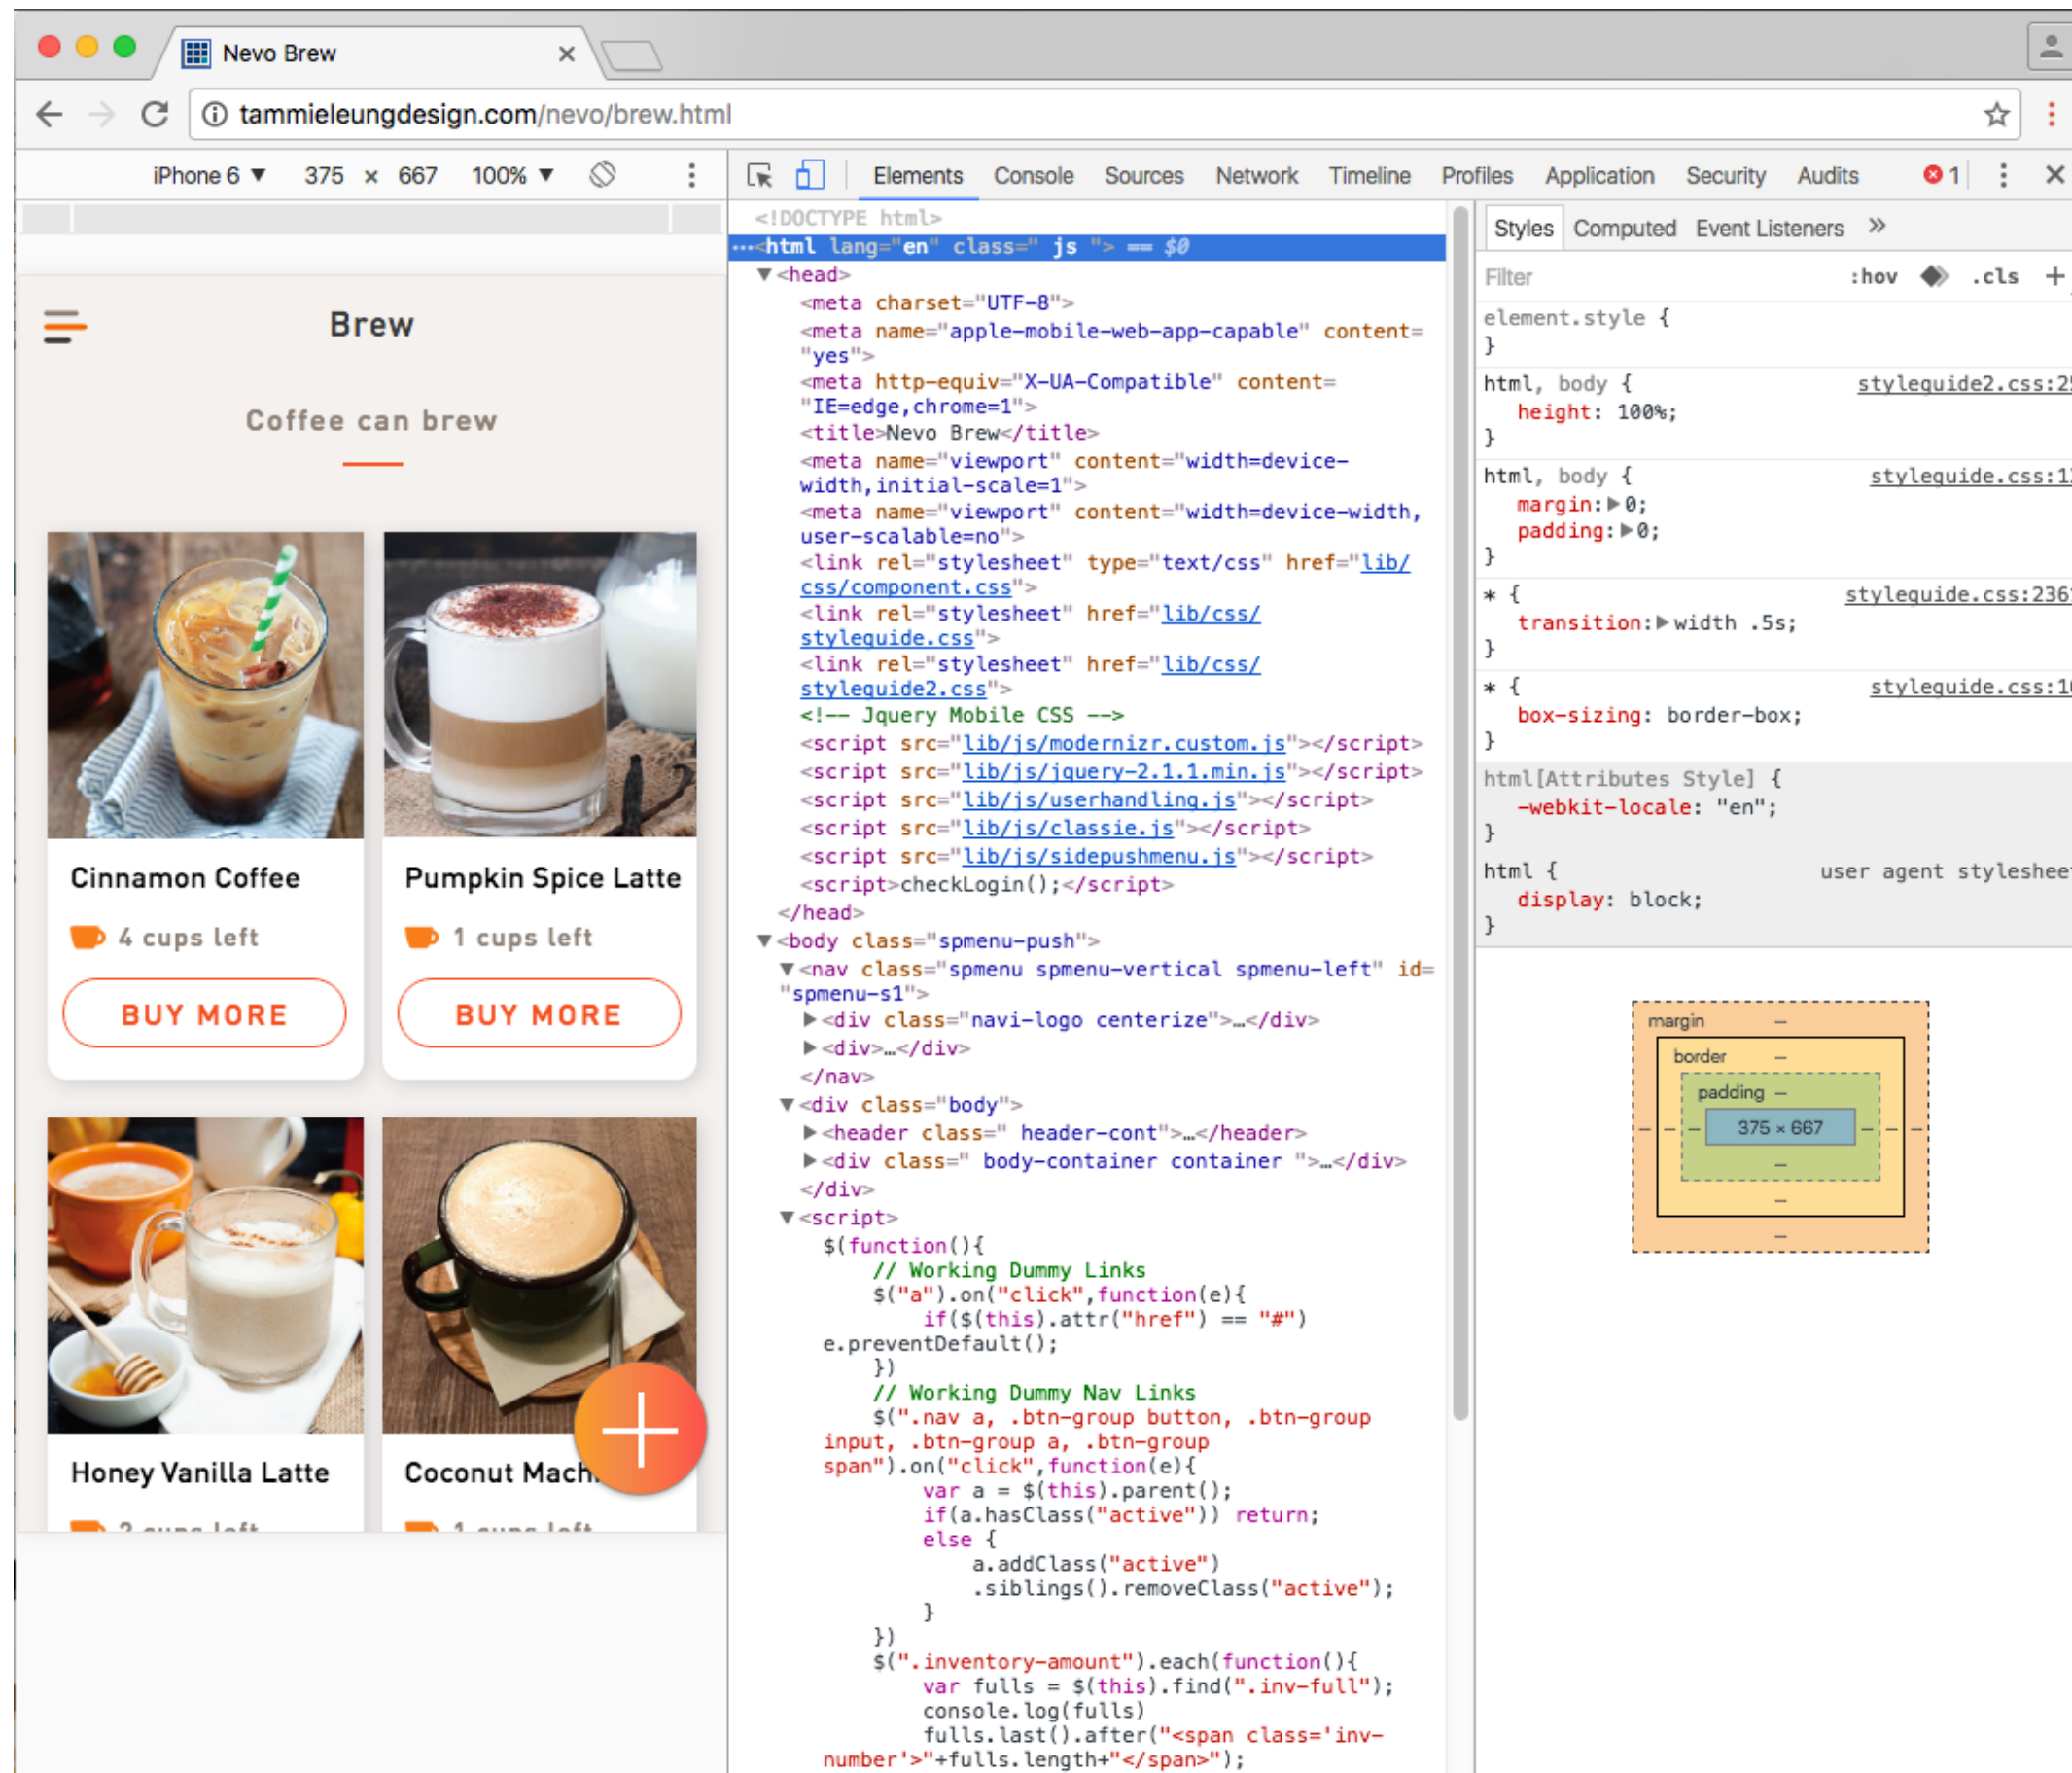

1. We'd like to talk with you today about (). We have lots of questions to ask you, and we're interested in hearing your stories and experiences.

Overview

1. Can you tell us a little about yourself—what you do, hobbies, etc.?
2. Can you tell me when is your last coffee drink? When? What is it?
3. Do you buy it from coffee shop or brew it?
4. Why do you drink coffee? Do you have a habit of drinking?

Task 1: Return user Brew Coffee

FUTURE DEVELOPMENT

SUBSCRIPTION FEATURES

This is a concept product projects which maybe hard to be complete in the real world. But I believe that it is a possible idea in the future. If this project will become real, I would like to extend it to a real company with a business model. I would like to add the weekly subscription features for coffee lovers that they can have regular delivery of coffee kit. This require a visual design which can logically guide user to have the choice of coffee kit if they want; if not it will automatically select for them. This will definitely help coffee lovers to enjoy the brewing experiences everyday more.

FUTURE DEVELOPMENT

SMARTWATCH

With the rapid growth of gadget, wearable devices have also raise the attention in the technology field. I am hoping to see Nevo being adapted into smartwatch in the near future.

CONCLUSION

There are 150 millions of coffee drinkers in the United State and there is an average of 3.1 cups of coffee drinks are consumed per day. The coffee drinks market has a huge consumption and yet how much coffee lovers can and will brew their own coffee drinks by themselves when there are so many different brewing equipment and brewing methods. It is understandable that brewing a coffee can be easy and hard, it depends on the equipment and the recipes. Moreover, there is not a single coffee machine or equipment can brew most kind of coffee beverages. My thesis project, Nevo, is designed for coffee lovers who would like to drink different kinds of coffee drinks and would like to brew it by themselves. This one single concept can help them to brew their coffee drinks precisely and tasty. It also provides scheduling features and pre-measured coffee kit ordering which helps coffee lovers to have a better brewing experiences. A comprehensive coffee experiences will helps a coffee lover to have a great start of the day when more than 60% of the coffee lovers in the United States claimed to need a coffee to start the day.

UX Challenges

At the early stages of building Nevo, I learned a lot through different kinds of market researches. Survey, interviews, user testing and reading helps me to build up my concept and receive many useful feedbacks on how to edit the experiences for users' need. In this stage, I mainly focusing on defining the task flow for target audiences' need and goals.

UI Challenges

When more and more detail defining the user experiences, the user interface will also be changing. More user testings are conducted in order to layout an effective interface which will not be confusing. I realized that the users' think and behave will be affected with the visual design.

Technical Challenges

The biggest challenges will be building it in actual code. This is a concept project, where many areas are not meant to be code. The combination of real codes and animation are necessary in order to demonstrate a full experience to elaborate the project tasks. A real big thank you for my coding instructor who helps me so much to create many beautiful quires in the codes.

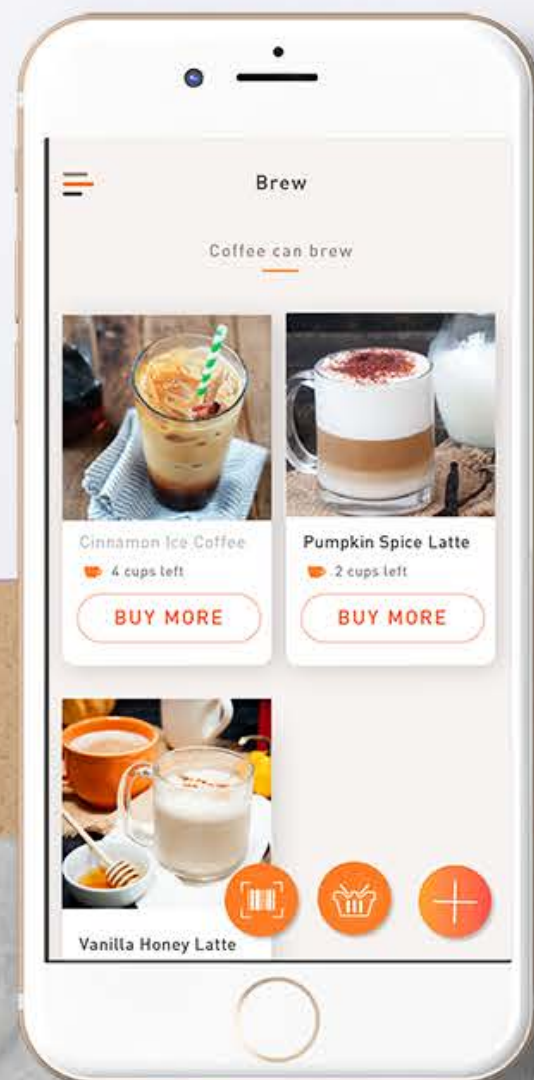

Future of Nevo

Although this project is a conceptualized topic which the site are not fully functional, I believe there is a possibilities that there will be a similar idea of real product will be invented and launched in the near future. I am hoping to see Nevo or similar products will be coming out in the real market for coffee lovers.
